The definitive guide to the international membrane industry. • Will help you to keep track of the major issues affecting the fast growing membrane market. • Will enable you to identify new business opportunities. • Includes Market forecasts, commentary and analysis supported by primary research. Completely revised and updated, the 3rd edition of Profile of the International Membrane Industry - Market Prospects to 2008 reviews the markets, technological trends and major manufacturers of industrial membranes. We have drawn on the expertise from our existing portfolio, Membrane Technology newsletter and Filtration & Separation magazine to bring you vital information, analyses and forecasts that cannot be found anywhere else. The report covers all industrial applications involving both liquid and gas separation, including: • Microfiltration. • Ultrafiltration. • Reverse osmosis and nanofiltration. • All other membrane separations. The study deals with all kinds of separating media that are now accepted as membranes, whether they are polymeric, ceramic, metallic or liquid. In broad terms the study covers microfiltration, ultrafiltration, reverse osmosis and nanofiltration and all other membrane separations. Profile of the International Membrane Industry covers the structure of the industry, highlighting developments, identifying future trends, and looking at recent mergers and acquisitions in the sector. Market estimates and forecasts to 2008, by region and membrane type, are presented along with an analysis of the main end-user markets for industrial membranes, and a technology overview. Forty leading international membrane manufacturers are profiled. A directory of membrane manufacturing companies is also included. For a PDF version of the report please call Steve Kimber on +44 (0) 1865 843666 for price details.

The four-volume set LNCS 8012, 8013, 8014 and 8015 constitutes the proceedings of the Second International Conference on Design, User Experience, and Usability, DUXU 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in

knowledge and effective use of computers in a variety of application areas. The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 83 papers included in this volume are organized in the following topical sections: DUXU in business and the enterprise, designing for the Web experience; product design; information and knowledge design and visualisation; and mobile applications and services.

For thousands of years, humans coped with heat by harvesting and storing natural ice and devising natural cooling systems that utilized ventilation and evaporation. By the mid 1800s, people began developing huge refrigeration machines to manufacture ice. By the early 1900s, engineers developed electric domestic refrigerators, which by 1927 were affordable convenient household appliances. By then, an increasingly sophisticated public demanded more modern-looking appliances than engineers could produce, and a new breed of designers entered the manufacturing world to provide them. During the Depression, modern designs not only increased sales but resulted in the kitchen appliances we now use. Today refrigeration preserves perishable food for worldwide distribution, makes tropical climates habitable for millions, saves lives with medical applications and enables space flight.

In today's world of global change, it has never been more critical for businesses to adapt their strategies, management styles, and policies to match that of the surrounding environment. Consumers are increasingly becoming more aware of the impact that businesses and product consumption have on environmental health. Thus, businesses have had to alter their production workflows to better suit a more environmentally conscious customer base. As society faces numerous issues related to the environment, health, poverty, and social justice, the need for socially responsible businesses is crucial to develop and improve the overall landscape of the business field. The Research Anthology on Developing Socially Responsible Businesses discusses the best practices, challenges, opportunities, and benefits of creating socially responsible businesses and provides a context of why these business models are needed. This essential text also considers how society has changed over time and how businesses must adjust their ideals and practices in order to survive in a changing world. Covering a range of topics such as accountability, environmental issues, and human rights, this major reference work is ideal for business owners, managers, policymakers, academicians, researchers, scholars, practitioners, instructors, and students.

In cinema studies today, rarely do we find a direct investigation into the culture of capitalism and how it has been refracted and fabricated in global cinema production under neoliberalism. However, the current economic crisis and the subsequent Wall Street bailout in 2008 have brought about a worldwide skepticism regarding the last four decades of economic restructuring and the culture that has accompanied it. In this edited volume, an international ensemble of scholars looks at neoliberalism, both as culture and political economy, in the various cinemas of the world. In essays encompassing the cinemas of Asia, Africa, Latin America, Europe, and the United States the authors outline how the culture and subjectivities engendered by neoliberalism have been variously

performed, contested, and reinforced in these cinemas. The premise of this book is that the cultural and economic logic of neoliberalism, i.e., the radical financialization and market-driven calculations, of all facets of society are symptoms best understood by Marxist theory and its analysis of the central antagonisms and contradictions of capital. Taking a variety of approaches, ranging from political economy, ideological critique, the intersection of aesthetics and politics, social history and critical-cultural theory, this volume offers a fresh, broad-based Marxist analysis of contemporary film/media. Topics include: the global albeit antagonistic nature of neoliberal culture; the search for a new aesthetic and documentary language; the contestation between labor and capital in cultural production; the political economy of hollywood, and questions of gender, sexuality, and the nation state in relation to neoliberalism.

A detailed look at the water industry and the trends that can lead to investment opportunities Water has quickly grown into a big global business, with annual revenues in the United States alone reaching over \$200 billion. In the years ahead, companies as well as governments must find innovative ways to address important issues within this field without sacrificing basic needs, such as safety of drinking water or the reliability of water for energy production. Nobody understands this better than author Neil Grigg, a forty-year veteran of the water industry, and now, with *Water Finance*, he shares his extensive experience with you. Most of the water business operates under the radar, but with this reliable resource, Grigg shines a bright light on this essential area and offers comprehensive coverage of the public responsibilities and private opportunities associated with it. While *Water Finance* does contain many facts and figures, it also takes the time to pull together the various aspects of water, going far beyond water as just a commodity, to skillfully explain it as the integrated business that it is. Opens with a detailed discussion of the water industry before turning its focus to water handling, which includes water supply, wastewater, industrial water, storm water, irrigation and drainage, and instream flows Reveals the different driving forces, and issues, surrounding the water industry such as government involvement, privatization, law and regulations, financial structure, water and health, and workforce capacity Offers insights on water industry business, careers, and investments Organized around the idea that the water business is about all aspects of handling water, from the global environment to your tap, *Water Finance* contains the information you need to succeed in this dynamic field.
