A New York Times Bestseller Detroit, mid-1930s: In a city abuzz over its unrivaled sports success, gun-loving baseball fan Dayton Dean became ensnared in the nefarious and deadly Black Legion. The secretive, Klan-like group was executing a wicked plan of terror, murdering enemies, flogging associates, and contemplating armed rebellion. The Legion boasted tens of thousands of members across the Midwest, among them politicians and prominent citizens—even, possibly, a beloved athlete. Terror in the City of Champions opens with the arrival of Mickey Cochrane, a fiery baseball star who roused the Great Depression's hardest-hit city by leading the Tigers to the 1934 pennant. A year later he guided the team to its first championship. Within seven months the Lions and Red Wings follow in football and hockey—all while Joe Louis chased boxing's heavyweight crown. Amidst such glory, the Legion's dreadful toll grew unchecked: staged "suicides," bodies dumped

along roadsides, high-profile assassination plots. Talkative Dayton Dean's involvement would deepen as heroic Mickey's Cochrane's reputation would rise. But the ballplayer had his own demons, including a close friendship with Harry Bennett, Henry Ford's brutal union buster. Award-winning author Tom Stanton weaves a stunning tale of history, crime, and sports. Richly portraying 1930s America, Terror in the City of Champions features a pageant of colorful figures: iconic athletes, sanctimonious criminals, scheming industrial titans, a bigoted radio priest, a love-smitten celebrity couple, J. Edgar Hoover, and two future presidents, Gerald Ford and Ronald Reagan. It is a rollicking true story set at the confluence of hard luck, hope, victory, and violence. .

A New York Times Bestseller! Ming Tea Murder Prentice Hall

A stunning work of narrative history revealing how and why Adolf Hitler targeted the children of the assassinated Archduke Franz Ferdinand, making the Archduke's sons the first two Austrians deported to the Dachau concentration camp, and how the family fought back Five youthful years in Vienna. It was then and there that Adolf Hitler's obsession with the Habsburg Imperial family became the catalyst for his vendetta against a vanished empire, a dead archduke, and his royal orphans. That hatred drove Hitler's rise to power and led directly to the tragedy of the Second

World War and the Holocaust. The royal orphans of Archduke Franz Ferdinand--offspring of an upstairs-downstairs marriage that scandalized the tradition-bound Habsburg Empire--came to personify to Adolf Hitler, and others, all that was wrong about modernity, the twentieth century, and the Habsburg's multi-ethnic, multi-cultural Austro-Hungarian Empire. They were outsiders in the greatest family of royal insiders in Europe, which put them on a collision course with Adolf Hitler. As he rose to power Hitler's hatred toward the Habsburgs and their diverse empire fixated on Franz Ferdinand's sons, who became outspoken critics and opponents of the Nazi party and its racist ideology. When Germany seized Austria in 1938, they were the first two Austrians arrested by the Gestapo, deported to Germany, and sent to Dachau. Within hours they went from palace to prison. The women in the family, including the Archduke's only daughter Princess Sophie Hohenberg, declared their own war on Hitler. Their tenacity and personal courage in the face of betrayal, treachery, torture, and starvation sustained the family during the war and in the traumatic years that followed. Through a decade of research and interviews with the descendants of the royal Habsburgs, scholar James Longo explores the roots of Hitler's determination to destroy the family of the dead Archduke. And he uncovers the family members' courageous fight against the Führer.

Murder, Baseball, and the Secret Society that Shocked Depression-era Detroit Diversion Books

A memoir by the mustachioed baseball pitcher who went playing rocky, trash-ridden fields in Castro's Cuba to becoming a Boston Red Sox legend. Luis Tiant is one of the most charismatic and accomplished players in Boston Red Sox and Major League Baseball history. With a barrel-chested physique and a Fu Manchu mustache, Tiant may not have looked like the lean, sculpted ace he usually played against, but nobody was a tougher competitor on the diamond, and few were as successful. There may be no more qualified twentieth-century pitcher not yet enshrined in the National Baseball Hall of Fame. His big-league dreams came at a price: racism in the Deep South and the Boston suburbs, and nearly fifteen years separated from a family held captive in Castro's Cuba. But baseball also delivered World Series stardom and a heroic return to his island home after close to a half-century of forced exile. The man whose name—"El Tiante"—became a Fenway Park battle cry has never fully shared his tale in his own words, until now. In *Son of Havana*, Tiant puts his heart on his sleeve and describes his road from torn-up fields in Havana to the pristine lawns of major league ballparks. Readers will share Tiant's pride when appeals by a pair of US senators to baseball-fanatic Castro secure freedom for Luis's parents to fly to Boston and witness the 1975 World Series glory of their child. And readers will join the big-league ballplayers for their spring 2016 exhibition game in Havana, when Tiant—a living link to the earliest, scariest days of the Castro regime—threw out the first pitch.

Squamous cell cancers of the head and neck (SCCHN), also known as head and neck cancers (HNC) encompass malignancies of the oral cavity, larynx, nasopharynx and pharynx, and are diagnosed in over 500,000 patients worldwide each year, accounting for 5% of all malignancies. In the past several years, there have been significant developments in understanding of HNC. It is now recognized that although alcohol and tobacco use has represented the likely predominant cause of SCCHN, the incidence of a second class of SCCHN related to oncogenic human papillomavirus

(HPV) infection is increasing, with a four-fold increase in the past 2 decades, and now thought to represent up to 30% of cases. The first effective target for SCCHN, the EGFR-targeting antibody cetuximab, was approved as recently as in 2006; since then, a growing body of research has identified additional signaling pathways as important in disease pathogenesis, and in resistance to treatment. Proteins such as c-Met, Src, and HER2 are emerging as new therapeutic targets, with a considerable ferment in the clinical trial community. As a capstone of research progress, 2011 marked the first reports of high throughput sequencing of SCCHN tumors, with these efforts identifying unexpected players such as Notch as frequent subject of mutation, spawning new hypotheses for future research. This book will be of interest to researchers who are interested in better understanding the biology of head and neck cancers, with the goals of better designing therapies, identifying risk factors, or investigating the molecular basis of the disease.

The weld toe is a primary source of fatigue cracking because of the severity of the stress concentration it produces. Weld toe improvement can increase the fatigue strength of new structures significantly. It can also be used to repair or upgrade existing structures. However, in practice there have been wide variations in the actual improvements in fatigue strength achieved. Based on an extensive testing programme organised by the IIW, this report reviews the main methods for weld toe improvement to increase fatigue strength: burr grinding, TIG dressing and hammer and needle peening. The report provides specifications for the practical use of each method, including equipment, weld preparation and operation. It also offers guidance on inspection, quality control and training as well as assessments of fatigue strength and thickness effects possible with each technique. IIW recommendations on methods for improving the fatigue strength of welded joints will allow a more consistent use of these methods and more predictable increases in fatigue strength.
