It gives me a great pleasure and satisfaction to present this book "An ultimate book of COST ACCOUNTING". The book will explain the need, purpose, and usefulness of accounting for cost. I have given the most valuable solved problems with clear working notes in step by step manner with suitable formulas. The glossary (141 terms) at the end of this book will serve as a quick reference to the reader. Chapter wise hyperlink will help the reader to go quickly to the desired chapter. The main features of the book are simple understanding and key concepts. This book is useful to everyone in Cost accounting field like students, Accounts executives, Cost analysts etc. I hope that the book will help the readers to study in a focused manner. Any criticism and constructive suggestion in the direction of making the book a better teaching and studying manual will be gratefully acknowledged by the author. Suggestions will be incorporated in the subsequent editions. All the best ...

Year after year, this book has immensely helped students in their comprehension of the subject and score good marks in examinations. It has been written specifically for the prescribed syllabus of Cost Accounting Paper of BCom (Hons) Semester IV of the University of Delhi and of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC-recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on 'first things first' basis to sustain the interest of the students.

Every discussion involving conceptual difficulties is immediately followed by a numerical example.
