This book is about the pragmatics of language and it illustrates how pragmatics transcends the boundaries of linguistics. This volume covers Gricean pragmatics as well as topics including: conversation and collective belief, the norm of assertion, speech acts, what a context is, the distinction between semantics and pragmatics and implicature and explicature, pragmatics and epistemology, the pragmatics of belief, quotation, negation, implicature and argumentation theory, Habermas' Universal Pragmatics, Dascal's theory of the dialectical self, theories and theoretical discussions on the nature of pragmatics from a philosophical point of view. Conversational implicatures are generally meaning augmentations on top of explicatures, whilst explicatures figure prominently in what is said. Discussions in this work reveal their

characteristics and tensions within current theories relating to explicatures and implicatures. Authors show that explicatures and implicatures are calculable and not (directly) tied to conventional meaning. Pragmatics has a role to play in dealing with philosophical problems and this volume presents research that defines boundaries and gives a stable picture of pragmatics and philosophy. World renowned academic experts in philosophy and pragmalinguistics ask important theoretical questions and interact in a way that can be easily grasped by those from disciplines other than philosophy, such as anthropology, literary theory and law. A second volume in this series is also available, which covers the perspective of linguists who have been influenced by philosophy. George Simling has grown up in the city-state of Illyria, an enclave of logic and reason founded as a refuge from the Reaction, a wave of religious fundamentalism that swept away the nations of the twenty-first century. Yet to George, Illyria's militant rationalism is as stifling as the faith-based superstition that dominates the world outside its walls. For George has fallen in love with Lucy. A prostitute. A robot. She might be a machine, but the semblance of life is perfect. To the city authorities, robot sentience is a malfunction, curable by erasing and resetting silicon minds. But George knows that Lucy is something more. His only alternative is to flee Illyria, taking Lucy deep into the religious Outlands where she must pass as human because robots are seen as mockeries of God, burned at the stake, dismembered, crucified. Their odyssey leads them through betrayal, war and madness, ending only at the monastery of the Holy

Machine...
