**Writing Mathematically** National Council of Teachers of  
 In the decade before he became the highly controversial director  
 of psychedelic drug research at Harvard, Timothy Leary was one  
 of the leading clinical psychologists practicing in the U.S.,  
 heading the prestigious Kaiser Foundation Psychological  
 Research Center in Oakland. **INTERPERSONAL DIAGNOSIS OF  
 PERSONALITY** (1957), his first full-length book, summarizes the  
 innovative experimental studies in interpersonal behavior  
 performed by the author and his associates at the Kaiser  
 Foundation and in private practice between 1950 and 1957.  
*The Life and Science of Richard Feynman* Routledge  
 The Handbook of Motivation at School presents the first  
 comprehensive and integrated compilation of theory and  
 research on children's motivation at school. It covers the major  
 theoretical perspectives in the field as well as their application to  
 instruction, learning, and social adjustment at school. Key  
 Features: Comprehensive - no other book provides such a  
 comprehensive overview of theory and research on children's

motivation at school. Theoretical & Applied - the book provides a  
 review of current motivation theories by the developers of those  
 theories as well as attention to the application of motivation  
 theory and research in classrooms and schools. Chapter Structure  
 - chapters within each section follow a similar structure so that  
 there is uniformity across chapters. Commentaries - each section  
 ends with a commentary that provides clear directions for future  
 research.

*Let Our Children Grow Tall* Gyldendal Uddannelse  
 Debates in Physical Education explores major issues physical  
 education teachers encounter in their daily professional lives. It  
 engages with established and contemporary debates, promotes  
 and supports critical reflection and aims to stimulate both novice  
 and experienced teachers to reach informed judgements and  
 argue their own point of view with deeper theoretical knowledge  
 and understanding. In addition, concerns for the short, medium  
 and long term future of the subject are voiced, with a variety of  
 new approaches proposed. Key issues debated include: What are  
 the aims of physical education? What should be covered in a  
 physical education curriculum? How should we judge success in  
 physical education? Is physical education really for all or is it just  
 for the gifted and talented? Can physical education really combat

the rise in obesity? What is the future for physical education in the 21st Century? *Debates in Physical Education* makes a timely and significant contribution to addressing current contentious issues in physical education. With its combination of expert opinion and fresh insight, this book is the ideal companion for all student and practising teachers engaged in initial teacher education, continuing professional development and Masters level study.

**Baboon** Headline

This stimulating study focuses on mathematics as a language with its own rules and conventions and explores the implications of this for classroom practice.

**Speaking Mathematically** World Scientific

Many of the essays pinpoint the stagnancy of teaching methods today and discuss the reductive parameters enforced by the current curriculum. The radical tone that echoes through the entire series of papers is unmistakable. Throughout the book, postmodern theory informs the polemical debate concerning new directions in educative practice. Contributors shed new light on a postmodern view of art in education with emphasis upon difference, plurality and independence of mind. Ultimately, the paper provides a detailed insight into the various concepts that shape and drive the contemporary art world and expands the debate regarding the impression of postmodern thinking in art education.

**Bogmarkedet** Routledge

New York Times Bestseller: This life story of the quirky physicist is "a thorough and masterful portrait of one of the great minds of the century" (The New York Review of Books). Raised in Depression-era Rockaway Beach, physicist Richard Feynman was irreverent, eccentric, and childishly enthusiastic—a new kind of scientist in a field that was in its infancy. His quick mastery of quantum mechanics earned him a place at Los Alamos working on the Manhattan Project under J. Robert Oppenheimer, where the giddy young man held his own among the nation's greatest minds. There, Feynman turned theory into practice, culminating in the Trinity test, on July 16, 1945, when the Atomic Age was born. He was only twenty-seven. And he was just getting started. In this sweeping biography, James Gleick captures the forceful personality of a great man, integrating Feynman's work and life in a way that is accessible to laymen and fascinating for the scientists who follow in his footsteps.

**Mathematics by Experiment** Intellect Books

From the No 1 Bestselling author PENNY VINCENZI - *LOVE IN THE AFTERNOON AND OTHER DELIGHTS* brings together searing journalism, ten short stories and other work in a single edition for the first time. 'A charming miscellany... brought to life with touching, Nora Ephron-like honesty' Daily Mail As well as ten stunning short stories, Penny also shares some of her thoughts on a huge range of subjects from love and relationships to work and families, and gives us a peek at the tantalising first chapter of her new novel, *A KIND OF PROMISE* - making *LOVE IN THE AFTERNOON AND OTHER DELIGHTS* a must-have for any Vincenzi fan.

**Selected Speeches, 1975-1977** Routledge

We have evolved to enjoy sleep, sex and sweets— and so we do. But negativity permeates our lives too: we are drawn to murder and violence on the news; we remember the schoolyard bully as if it was yesterday, and we are taught to accept boring education. It is in our genes, but it is also deeply ingrained in our culture. We must pull ourselves together! This is the message from Hans Henrik Knoop, Associate Professor at Aarhus University, President of the European Network for Positive Psychology. If we create the right conditions for growth and self-regulation, we can raise ourselves above primitive desires to achieve far greater well-

being.

**Love in the Afternoon and Other Delights** Springer

The past few decades have witnessed a dramatic expansion of management education, consulting, and the formalization of management practice, with a widespread diffusion of management ideas across sectors and continents. This book describes and analyzes this worldwide flow of management ideas and the key carriers of these ideas.

**Why Johnny Can't Add** Reaktion Books

This volume provides an up-to-date study of theory and practice on the importance of technology in teaching and learning. The contributions are carefully peer-reviewed from over 100 submissions to the International Conference on Teaching and Learning 2006, held in Hong Kong. Sample Chapter(s). Chapter 1: Faculty Perceptions of ICT Benefits (391 KB). Contents: Faculty Perceptions of ICT Benefits (R Fox et al.); Thinking about Thinking Online (K Downing et al.); Teacher's Sharing Pedagogical Experiences in a Learning Environment that Supports Self-Regulated Learning (G Dettori et al.); Online Interaction: Trying to Get It Right (L Chow and R Sharman); Crossing Borders: How Cross-Cultural Videoconferencing can Satisfy Course Goals in Dissimilar Subjects (J S Wilkinson & A-L Wang); The Evaluation of Information and Communication Technology Use in Professional Schools (P Gabor & C Ing); Using Technology in Education: The Application of Data Mining (K H Chye et al.); A Comparison of WebCT, Blackboard and Moodle for the Teaching and Learning of Continuing Education Courses (K S Cheung); The Object-Oriented Database Application and the System Architecture of a National Learning Objects Repository for Cyprus (P Pouyioutas et al.); and other papers. Readership: Graduate students, researchers and practitioners involved in the development and education of e-learning.

**Genius** Aviation Maintenance Technica

I acknowledge a deep debt of gratitude to my coeditors: my wife Irene, and my friend and colleague Tom Draper. They have worked with diligence and insight to bring this work to completion. They have delegated the task of writing the Preface to me. As the scientific study of human development matures it is not only natural, but it is necessary to reach beyond understanding the ways humans develop capacities, to study the ways emerging capacities fit into the larger sphere of human undertakings. Music is one of the most significant of those endeavors. As I attend the several piano competitions that are on my agenda each year, and see children seated at the keyboard drawing forth the magnificent sounds of Bach, Chopin, and Ravel, I am always a little awed. Surely, it seems to me, the piano\* is among the best of man's creations; the creative energies of great composers are among mankind's greatest expressions; and encouraging children to associate themselves seriously with both instrument and composer can be one of the great blessings to their young lives and, by association, to the larger society. Music touches the entire range of our lifespan on a daily basis. Involving children with music and music training has high market, and common sense, validity. Parents understand intuitively that children will benefit, and their lives will be enriched, if they are influenced by music and music training.

**Language Online** Taylor & Francis

Elizabeth A. Kaye specializes in communications as part of her coaching and consulting practice. She has edited *Requirements for Certification* since the 2000-01 edition.

**Destination England** CRC Press

In *Language Online*, David Barton and Carmen Lee investigate the impact of the online world on the study of language. The effects of language use in the digital world can be seen in every aspect of language study, and new ways of researching the field

are needed. In this book the authors look at language online from a variety of perspectives, providing a solid theoretical grounding, an outline of key concepts, and practical guidance on doing research. Chapters cover topical issues including the relation between online language and multilingualism, identity, education and multimodality, then conclude by looking at how to carry out research into online language use. Throughout the book many examples are given, from a variety of digital platforms, and a number of different languages, including Chinese and English. Written in a clear and accessible style, this is a vital read for anyone new to studying online language and an essential textbook for undergraduates and postgraduates working in the areas of new media, literacy and multimodality within language and linguistics courses.

Part-66 Certifying Staff Cambridge University Press

With its inevitable dependency on the essential, and often contested, nature of art, the subject of assessment or evaluation in art and design education remains a matter of continuing controversy. This collection of essays examines the principal issues as they relate to the main phases of formal education, from primary to post-compulsory. Together, the papers provide an historical and philosophical analysis of the present state of assessment in art and design in our schools and colleges, and significantly, they map out some possible directions for reform.

A. Simon and Schuster

Called "brilliantly devastating" in a starred review from Kirkus Reviews, this award-winning, mesmerizing novel, based on the chilling true story of the last execution in Denmark's history, asks a question that plagues a small Danish town: does a fifteen-year-old boy deserve to be put to death? On February 22, 1853, a fifteen-year-old Niels Nelson is prepared to be executed on Gallows Hill. The master carpenter comes to measure Niels for his coffin. The master baker bakes bread for the spectators. The messenger posts the notice of execution in the town square. The poet prepares his best pen to record the events as they unfold. A fly, Niels's only companion in the cell, buzzes. A dog hovers by his young master's window. A young girl hovers too, pitying the boy. The executioner sharpens his blade. This remarkable, wrenching story is told with the alternating perspectives of eleven different bystanders—one per hour—as the clock ticks ever closer to the moment when the boy must face his fate. Niels Nielson, a young peasant, was sentenced to death by beheading on the dubious charges of arson and murder. Does he have the right to live despite what he is accused of? That is the question the townsfolk ask as the countdown begins. With strong social conscience, piercing intellect, and masterful storytelling, Jesper Wung-Sung explores the age-old question: who determines who has the right to live or die?

An Agenda for Action Springer Science & Business Media

Dyslexia is seen primarily as a limitation in the ability to deal with symbolic material. As far as the symbols of mathematics are concerned, therefore, special teaching techniques are needed,

just as they are for the teaching of reading and spelling. The book contains a wealth of material on individual cases and on children of different ages. Two central themes are discussed: first, that dyslexics need to carry out the operations of adding, dividing, and so on, before being introduced to the symbolism; and second that, because of their difficulties with rote learning, they need to be shown the many regularities and patterns which can be found in the number system. All the contributors have had experience of teaching dyslexic children at various levels.

**Enhancing Learning Through Technology** Love in the Afternoon and Other Delights

Briefly discusses the traditional mathematics formerly taught in American schools and views the language and weaknesses of the modern math curriculum

The Dynamics of Rules Psychology Press

School mathematics curricula internationally tend to emphasise problem-solving and have led to the development of opportunities for children to do maths in a more open, creative way. This has led to increased interest in 'performance-based' assessment, which involves children in substantial production of written language to serve as 'evidence' of their mathematical activity and achievement. However, this raises two important questions. Firstly, does this writing accurately present children's mathematical activity and ability? Secondly, do maths teachers have sufficient linguistic awareness to support their students in developing skills and knowledge necessary for writing effectively in their subject area? The author of this book takes a critical perspective on these questions and, through an investigation of teachers' readings and evaluations of coursework texts, identifies the crucial issues affecting the accurate assessment of school mathematics.

**Dyslexia and Mathematics** Stanford University Press

Beginning in the middle of crisis, then accelerating through plots that grow stranger by the page, Naja Marie Aidt's stories have a feel all their own. Though they are built around the common themes of sex, love, desire, and gender, Aidt pushes them into her own desperate, frantic realm. In one, a whore shows up unannounced at a man's apartment, roosts in his living room, and then violently threatens him when he tries to make her leave. In another, a wife takes her husband to a city where it is women, not men, who are the dominant sex?but was it all a hallucination when she finds herself tied to a board and dragged back to his car? And in the unforgettable "Blackcurrant," two young women who have turned away from men and toward lesbianism abscond to a farm, where they discover that their neighbor's son is experimenting with his own kind of sexuality. The first book from the widely lauded Aidt to reach the English language, Baboon delivers audacious writing that careens toward bizarre, yet utterly truthful, realizations.

Investigating Digital Texts and Practices Intellect Books

The subject matter of Some Random Series of Functions is important and has wide application in mathematics, statistics, engineering, and physics.
