It's Sapiens for teenagers.' The Times LIFE IS WEIRD. Nothing gives you a sense of perspective like finding out just how weird.

I'm an extremely curious chap and with this book I wanted to share the content of my noggin, because I think these are the 147 things that have helped me through this thing we call life.

Sometimes because it shows how lucky we are to be here at all, but often because I'm a moron and learned whatever lesson it taught me the hard way, and I'd like to save you the pain of

making the same mistakes (I refer here to the waxing of my pubic hair). Ever wondered if first times are over-rated (hint: they are), whether you'll ever find the one (hint: there are 7 billion of us) or pondered the sheer unlikelihood of the you who is you being in the world right now? If so, then YouTube superstar and fact-obsessed, over-sharer Jim Chapman is here to explain it all - whether it's why your heart actually aches after a break-up, what's happening when you get hangry, or why people are just so plain RUDE online. Along the way, we'll find out how much fun he has when Tanya's sleep-talking and why he looked like a gangly T-rex with wonky teeth when he was a teenager. As with his videos, no subject is off-limits, as Jim lifts the lid on his life and his relationships, sharing embarrassing stories and things he's learnt along the way (trust us, the thing about kangaroos will really freak you out).

With the ancient epic Mahabharat as her source, and the battle of Kurukshetra as a central motif, Mahasweta Devi weaves three stories in which we visit unexpected alleys and by-lanes of the traditional epic saga, and look at events from the eyes of women marginalized, dispossessed, dalit. Their eyes condemn the wanton waste and inhumanity of war. This Kurukshetra is not the legendary Dharmayuddha of the popular imagination but rather a cold-blooded power game sacrificing countless human lives. How do the women's quarters of the palace, a colourless place of shadowy widowhood, appear to five peasant women whose lives are no less shattered by the Kurukshetra massacre, but who are used to dealing with trauma in a more robust manner? How does their outlook on life and survival influence the young pregnant princess who is abruptly plunged into the half-life of upper caste widowhood? How does a lower caste serving woman, who was brought in to service king Dhritarashtra when his queen was with child, view her half-royal offspring and his decision to perform the last rites for a father who never acknowledged him as a son? How does an ageing Kunti, living out her last years in the forest, come to terms with her guilt over her unacknowledged son, Karna? And, having finally voiced her shame aloud, how then does she face up to a crime she has not even remembered: the murder of a family of nishad forest dwellers? These tales, brewed in the imagination of a master story-teller, make us look at the Mahabharata with new eyes, insisting as they do on the inclusion, within the master

narrative, of the fates and viewpoints of those previously unrepresented therein: women and the underclass. MAHASWETA DEVI is one of India's foremost writers. Her powerful, satiric fiction has won her recognition in the form of the Sahitya Akademi (1979), Jnanpith (1996) and Ramon Magsaysay (1996) awards, the title of Officier del Ordre Des Arts Et Des Lettres (2003) and the Nonino Prize (2005), amongst several other literary honours. She was also awarded the Padmasree in 1986, for her activist work amongst dispossessed tribal communities. ANJUM KATYAL is as an editor who has also translated several plays and short stories.

**Colored Pencil Painting Portraits** McGraw-Hill Science, Engineering & Mathematics

Create art that's more attractive, interesting and eye-catching! Even if your perspective is accurate, your subject realistic and colors vibrant, a weak composition - predictable, repetitious or monotonous - means a weak painting. The Simple Secret to Better Painting ensures that your compositions work every time. It's an insightful artistic philosophy that boils down the many technical principles of composition into a single master rule that's easy to

remember and apply: Never make any two intervals the same. You can make every painting more interesting, dynamic and technically sound by varying intervals of distance, length and space, as well as intervals of value and color. The rule also applies to balance, shape and the location of your painting's focal point. Greg Albert illustrates these lessons with eye-opening examples from both beginning and professional artists, including Frank Webb, Tony Couch, Kevin Macpherson, Charles Reid, Tony Van Hasselt and more. You'll discover that the ONE RULE is the only rule of composition you need to immediately improve your work - the moment your brush touches the canvas.
