The former fitness editor of Men's Health magazine presents the ultimate no-excuses workout book for time-pressed men and women at every fitness level. For most people, the hardest hurdle to overcome in following a fitness regimen is simply finding the time to do it. But as this book shows, it is possible to burn fat, build muscle, and stay fit—no matter how much (or little) time one has! That's the promise fitness expert Myatt Murphy makes in this fabulous new exercise guide—the first book that offers a wide range of workouts catered to any schedule. Workouts are organized by how many days a week individuals have to exercise, and subdivided into 10-, 20-, 30-, 45-, and 60-minute exercise blocks. There are four variations on each of the above regimens—one for building lean muscle, one for weight loss, one for muscle power, and one that gives the best of all three. All in all, there are 120 workout choices, each specifically created to match the exerciser's current goals! Murphy shows how to complete any workout in a time-efficient way and how to compensate for limited time with different exercises that will keep muscles challenged. More than 250 photographs illustrate the exercises, and sound nutritional tips round out this all-new approach to fitness—destined to be the workout bible for countless busy people.

Men love shortcuts. If there's a way to accomplish a job quicker

and more efficiently, they're all for it. That goes for work and working out. Now, new research shows that as little as 15 minutes of resistance training is just as effective in spiking a man's metabolism—his fat-burning furnace—as a workout lasting more than twice as long. All it takes is 15 minutes to achieve lifelong results—and men are more likely to stick to an exercise plan if it's chopped down to those 15 minutes. The Men's Health Big Book of 15-Minute Workouts contains fast-paced circuit training and interval workouts that boost calorie burn, build muscle, and fry belly fat in half the time of regular workouts. Readers can choose from at-home, body-weight-only workouts and total-body barbell programs to exercises that target major muscle groups—the chest, arms, legs, and back—and sport-specific workouts. Other highlights include: - a special section of 15-minute core workouts to build a rock-hard six-pack - an eating plan with delicious meals that take 15 minutes or less to prepare - workouts for the office or when you're traveling and can't make it to the gym - hundreds of tips from America's best trainers, nutritionists, and exercise scientists
