Anti-Proverbs in Five Languages Teach Yourself

Translating Chinese Culture is an innovative and comprehensive coursebook which addresses the issue of translating concepts of culture. Based on the framework of schema building, the course offers helpful guidance on how to get inside the mind of the Chinese author, how to understand what he or she is telling the Chinese-speaking audience, and how to convey this to an English speaking audience. A wide range of authentic texts relating to different aspects of Chinese culture and aesthetics are presented throughout, followed by close reading discussions of how these practices are executed and how the aesthetics are perceived among Chinese artists, writers and readers. Also taken into consideration are the mode, audience and destination of the texts. Ideas are applied from linguistics and translation studies and each discussion is reinforced with a wide variety of practical and engaging exercises. Thought-provoking yet highly accessible, Translating Chinese Culture will be essential reading for advanced undergraduates and postgraduate students of Translation and Chinese Studies. It will also appeal to a wide range of language studies and tutors through its stimulating discussion of the principles and purposes of translation.

A vivid chronicle of events in the feudal states of China between 722 and 468 B.C., the Tso Chuan has long been considered both a major historical

document and an influential literary model. Covering over 250 years, these historical narratives focus not only on the political, diplomatic, and military affairs of ancient China, but also on its economic and cultural developments during the turbulent era when warring feudal states were gradually working towards unification. Ending shortly after Confucius' death in 479 B.C., the Tso Chuan provides a background to the life and thought of Confucius and his followers that is available in no other work.

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent

language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

'Of ways you may speak, but not the Perennial Way; By names you may name, but not the Perennial Name.' The best-loved of all the classical books of China and the most universally popular, the Daodejing or Classic of the Way and Life-Force is a work that defies definition. It encapsulates the main tenets of Daoism, and upholds a way of being as well as a philosophy and a religion. The dominant image is of the Way, the mysterious path through the whole cosmos modelled on the great Silver River or Milky Way that traverses the heavens. A life-giving stream, the Way gives rise to all things and holds them in her motherly embrace. It enables the individual, and society as a whole, to harmonize the disparate demands of daily life and achieve a more profound level of understanding. This new translation draws on the latest archaeological finds and brings out the word play and poetry of the original. Simple commentary accompanies the text, and the introduction provides further historical and interpretative context. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

The Routledge Book of World Proverbs invites the reader to travel the globe in search of the origins of such words of wisdom, experiencing the rich cultural traditions reflected in each nation's proverbs. This collection contains over 16,000 gems of humour and pathos that draw upon themes from our shared experiences of life. And we are not just invited to learn about other cultures; proverbs are 'bits of ancient wisdom' and thus teach us about our own history. Drawing together proverbs that transcend culture, time and space to provide a collection that is both useful and enjoyable, The Routledge Book of World Proverbs is, unquestionably, a book of enduring interest.

Ever since the start of Chinese linguistic studies, the description of the Chinese particle LE has remained elusive. The classification has evolved from a listing of sentences and the discussion of contrastive pairs to a more context and discourse-oriented analysis. The development in recent years of inferential models and situation semantics has opened the way for a renewed study of the use of the Chinese particle LE. This book discusses the Chinese data from a 'mental space' perspective and finally reveals the role so-called Chinese 'sentence LE' plays in the construction and maintenance of discourse.

During the Spring-Autumn period (722-420 BCE) and the time of the Warring States (480-222 CE), China was in great turmoil. Intellectuals and social reformers sifted through their wisdom and knowledge of China's experiences up to then, attempting to find a solution to their situation. The Tao Te Ching, one of the foremost products of the era, is a metaphysical book, a source of the highest political thought. Many readers have found in it representations of the highest ideals of human endeavors. Yet given its likely oral origin and the technological limitations of its early textual transmission, the Tao Te Ching raises numerous questions related to authorship, date of origin, internal organization, textual coherence, and editorial history. Of the scores of translations of the Tao Te Ching, the great majority are based on the edition prepared by the third-century scholar Wang Pi. Wang's profound commentary is itself a deeply influential text in the development of Taoist thought. Paul Lin presents the commentary, otherwise unavailable in English, in the form of footnotes accompanying his meticulous rendition of the Taoist classic.

Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, Fluent In 3 Months. Lewis is a full-time "language hacker," someone who devotes all of his time to finding better, faster, and more efficient ways to learn languages. Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such as adults not being as good of language learners as children.

Acting Chinese is a year-long course that, together with the companion website, integrates language learning with the acquisition of cultural knowledge, and treats culture as an integral part of human behavior and communication. Using modern day examples of Chinese discourse and behavioral culture, it trains students to perform in culturally appropriate fashion, whilst developing a systematic awareness and knowledge about Chinese philosophy, values and belief systems that will prepare them for further advanced study of Chinese language and culture. Each lesson contains simulated real-life communication scenarios that aim to provide a concrete opportunity to see how native speakers generally communicate or behave in social situations. An essential guide for intermediate to advanced level second language learners, Acting Chinese provides a unique and modern approach to the acquisition of both cultural knowledge and language proficiency.

This book is the first comparative study of English, German, French, Russian and Hungarian anti-proverbs based on well-known proverbs. Proverbs are by no means fossilized texts but are adaptable to different times and changed values. While anti-proverbs can be considered as variants of older proverbs, they can also become new proverbs reflecting a more modern worldview. Anti-proverbs are therefore a lingo-cultural phenomenon that deserves the attention of cultural and literary historians, folklorists, linguists, and general readers interested in language and wordplay.
