In 1995, Witkin and Altschuld proposed a three phase process model of needs assessment: - Preassessment (learning as much as possible from existing, inexpensive sources) - Assessment (collecting new information about the needs in consideration) - Postassessment (prioritizing needs, understanding their causes, and translating priorities into action plans for organizations). The model has been extensively re-conceptualized and forms the basis for this book. The content includes a user-oriented approach to a comprehensive overview of the three phases and the 14 key steps necessary to implement them. Numerous examples and practical illustrations are given throughout the text as guidance for needs assessors and those who do research on the topic. An extensive glossary of needs-related terms and an outline of a final report are also provided. The book is the first one in the Needs Assessment KIT with connections to the other four.

Every day for the next twenty years, more than 10,000 people in the United States will turn 65. With life expectancies increasing as well, many of these Americans will eventually require round-the-clock attention—and we have only begun to prepare for the challenge of caring for them. In *Labors of Love*, Jason Rodriguez examines the world of the fast-growing elder care industry, providing a nuanced and balanced portrait of the day-to-day lives of the people and organizations that devote their time to supporting America's aging population. Through extensive ethnographic research, interviews with staff and management, and analysis of internal documents, Rodriguez explores the inner workings of two different nursing homes—one for-profit and one non-profit—to understand the connections among the administrative regulations, the professional requirements, and the type of care provided in both types of facilities. He reveals a variety of challenges that nursing home care workers face day to day: battles over the budget; the administrative hurdles of Medicaid and Medicare; the employees' struggle to balance financial stability and compassionate care for residents. Yet, Rodriguez argues, nursing home workers give meaning and dignity to their work by building emotional attachments to residents and their care. An unprecedented study, *Labors of Love* brings new insight into the underlying structures of a crucial and expanding sector of the American health care system.
