Rod Angell has woven the details of his eventful life into a vivid story of "rags to a comparatively comfortable retirement." He was born in 1929, the year of the Wall Street Crash and the poverty of his family, struggling in the Depression to live and care for their children on a scanty income; however, all this was of lesser importance to him in later life than being born in the same year as Popeye! Follow the account of a Yorkshire tyke as he reveals in quite vivid detail the life of a childhood in the '30s, enduring all the gamut of childhood ailments and disease in a time before drugs, antibiotics, and the wonder of penicillin. He discusses life as a wartime evacuee, progressing with humorous anecdotes and drama into a challenging, action-filled life as a Grenadier Guardsman on active service and then a drummer to the Royal Household, with all the pomp and ceremony that was his lot. He also tells of the many royal and state occasions he was part of. The final part of his working life was as a firefighter, with its many challenges, ending his

career in the rank of divisional commander. This book is not the story of two men, but of one who, after a demanding life as a soldier, followed by a dangerous one as a firefighter, surely became twice the man he was.

For the British, the Battle of the Atlantic was a fight for survival. They depended on the safe transit of hundreds of convoys of merchant ships laden with food, raw materials and munitions from America to feed the country and to keep the war effort going, and they had to export manufactured goods to pay for it all. So Britain's merchant navy, a disparate collection of private vessels, became the country's lifeline, while its seamen, officially non-combatants, bravely

endured the onslaught of the German U-boat offensive until Allied superiority overwhelmed the enemy. In this important, moving and exciting book, drawing extensively on first-hand sources, the acclaimed maritime historian Richard Woodman establishes the importance of the British and Allied merchant fleets in the struggle against Germany and elevates the heroic seamen who manned them to their rightful place in the history of the Second World War.

Offers a new and original account of the efforts made by the Royal Navy to prepare for war with Germany in the decade and a half before 1914. Seligmann demonstrates that from being unready for an assault on British seaborne trade, the Royal Navy had given a great deal of thought to its protection.
