Positing that a radical
utopianism is one of the
most vital impulses of
feminist politics, *Partial
Visions* traces the
articulation of this impulse
in the work of Euro-
American, French and
German women writers of
the 1970s. It argues that
this feminist utopianism
both continued and
reconceptualized a critical
dimension of Left politics,
yet concludes that
feminist utopianism is not

just visionary, but myopic
- time and culture bound -
as well.

Depression and Personality

Dysfunction Hueber
Verlag

This book analyses the clinical interaction between depression and personality dysfunction to help clinicians better understand and treat patients with complex depression. It proposes an innovative perspective to clinical work that moves away from a disorder-centered approach to a person-centered approach

by analysing complex depression through the lens of functional domains related to personality functioning and applying Research Domain Criteria to diagnosis and treatment planning. By doing so, it aims to contribute to the development of precision psychotherapy by applying the principles of precision medicine to mental health care. The book is divided in two parts. Chapters in the first part review problems in five domains of personality dysfunction

that drive complex depressive presentations - identity, affect regulation, self-other regulation, social dysfunction and self-criticism - and the neurobiological findings underlying them. In the second part, authors present integrative models of depression and personality dysfunction and their implications for diagnosis and treatment. Depression and Personality Dysfunction: An Integrative Functional Domains Perspective is a scientific and clinical

guide for the understanding and treatment of patients with depression complicated by personality dysfunction. It will be a useful tool for clinicians looking for resources to develop a more person-centered and evidence-based approach to mental health care.

This book critically

engages with the idea of

transparency whose

ubiquitous demand stands

in stark contrast to its lack

of conceptual clarity. The book carefully examines this notion in its own right, traces its emergence in Early Modernity and analyzes its omnipresence in contemporary rhetoric. Today, transparency has become a catchword outplaying other Enlightenment values like empowerment, sincerity and the notion of a public sphere. In a suspicious manner, transparency is entangled in the discourses on power, surveillance, and self-exposure. Bringing

together prominent scholars from the emerging field of Critical Transparency Studies, the book offers a map of the various sites at which transparency has become virulent and connects the dots between past and present. By studying its appearances in today's hyper-mediated economies of information and by linking it back to its historical roots, the book analyzes transparency and its discontents, and scrutinizes the reasons why it has become the

imperative of a supposedly post-ideological age. The Awful German Language BookRix The young student Nathanael remains haunted by his childhood fears: he is convinced that Coppelius, a strange night-time visitor who used to come to his house to conduct alchemical experiments with his father - the latter dying as a consequence of one of these sessions - was none other than the Sandman, a mythical figure who was said to steal the eyes of

children who refused to go to sleep. When a mysterious Italian salesman with a beautiful daughter moves into town, Nathanael's suspicions are reawakened, pushing him to the brink of madness as extraordinary events unfold. First published in 1816, this classic of German Gothic fiction has enthralled generations ever since, and has spawned countless interpretations by critics intrigued by its powerful symbolism. Sigmund Freud famously examined

the novella in relation to his concept of the "uncanny", and an extract from this analysis is included in this volume.

The papers in this volume study the relationship between language use and the concept of the “tourist gaze” through a range of communicative practices from different cultures and languages. From a pragmatic perspective, the authors investigate how language

constantly adapts to contextual constraints which affect tourism discourse as a strategic meaning-making process that turns insignificant places into desirable tourist destinations. The case studies draw on both, in situ interactions with visitors, such as

guided tours and counter information, old and new mediatized genres, i.e. guide books, travelogues, print advertising as well as TV-commercials, service web-sites and apps. Despite the diversity of data, one of the common findings in the volume is that staging

the sensory 'lived' tourist experience is the lynchpin of all communicative practices. Hence, the use of tourism language reveals itself as the mirror of how 'people on the move' continuously enact as 'tourists' and 'places' are constructed as must-see 'sights'.
