Bringing Metal to the Children is a
handbook to all things Heavy Metal,
brought to you by insane prankster and
guitar god Zakk Wylde, of Ozzy Osbourne
and Black Label Society fame. This
“Complete Berzerker’s Guide to World
Tour Domination” provides tips and tests
for the True Rocker—as wild man Zakk

Wylde invites all who dare onto the tour
bus for brain-bursting tales of glory,
debauchery, and general mayhem in the
dangerous metal universe.

Defenders Of The Faith is what heavy
metal fans have been waiting for. This epic
biography of Judas Priest includes over 50
interviews with prominent musicians,
producers, record company personnel,
journalists, childhood friends and ex-band
members. From their deprived beginnings
in late-sixties West Bromwich, through the

numerous line-up changes of the 1970s to
the controversial sell-out US tours in the
1980s, here is the complete history of the
band up to and beyond their meltdown in
the 1990s. The story continues with their
re-invention in 1996 after the defection of
Rob Halford... and Halford's eventual
return to the fold in 2003. Defenders Of
The Faith is also about the music. From
the band's earliest demos to their
contentious contract with Gull Records and
breakthrough success with CBS, every
album and tour is examined and assessed
in detail. The result is the fullest and most
authentic portrait of Judas Priest there has

ever been!

With a foreword by Freddy Cricien of Madball, who made his stage debut with Agnostic Front at age 7, NYHC slams the pavement with savage tales of larger-than-life characters and unlikely feats of willpower. The gripping and sometimes hilarious narrative is woven together like the fabric of New York itself from over 100 original interviews with members of the key bands of the era of New York Hardcore.

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar

consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

A History of American Literary Journalism Kent State University Press
Due to a burgeoning print marketplace during the late nineteenth century, urban newspapers felt pressure to create

entertaining prose that appealed to readers, drawing on popular literary genres such as travel adventures, detective tales, and historical romances as a way of framing the news for readers. Using current events for their source documents, reporters fashioned their own dramas based on those that readers recognized from a broadly drawn literary culture. The desire to spin attractive, popular tales sometimes came at the expense of factual information. This novel, commercialized, and sensationalistic style of reporting, called new journalism, was closely tied to American fiction. In *Narrating the News* Karen Roggenkamp examines five major stories featured in three respected New York newspapers during the 1890s - the story of two antebellum hoaxes, Nellie Bly's around-the-world journey, Lizzie Borden's sensational trial, Evangelina Cisneros's rescue from her Spanish captors, and the Janet Cooke Jimmy's World scandal - to illustrate how new journalism manipulated specific segments of the literary marketplace. on vital topics in literary and cultural studies - gender, expansionism, realism, and professionalization. Unlike

previously published studies of literature and journalism, which focus only on a few canonical figures, Roggenkamp looks at part of the history of mass print communications more generally exposing the competitive and reinforcing interplay between specific literary genres and their journalistic revisions. Narrating the News provides an original, significant contribution to the fields of literature, journalism history, and cultural studies. *The Ballad Poetry of Ireland*. Univ of California Press

Despite various poststructuralist rejections of the idea of a singular author-genius, the question of a textual archetype that can be assigned to a named author is still a common scholarly phantasm. The Romantic idea that an author created a text or even a work autonomously is transferred even to pre-modern literature today. This ignores the fact that the transmission of medieval and early modern literature creates variances that could not be justified by means of singular authorships. The present volume offers new theoretical approaches from English, German, and Scandinavian studies to provide a historically more adequate

approach to the question of authorship in premodern literary cultures. Authorship is no longer equated with an extra-textual entity, but is instead considered a narratological, inner- and intertextual function that can be recognized in the retrospectively established beginnings of literature as well as in the medial transformation of texts during the early days of printing. The volume is aimed at interested scholars of all philologies, especially those dealing with the Middle Ages or Early Modern Period.

This Handbook surveys the state of the art in literary authorship studies. Its 27 original contributions by eminent scholars offer a multi-layered account of authorship as a defining element of literature and culture. Covering a vast chronological range, Part I considers the history of authorship from cuneiform writing to contemporary digital publishing; it discusses authorship in ancient Egypt, Greece, Rome, early Jewish cultures, medieval, Renaissance, modern,

postmodern and Chinese literature. The second part focuses on the place of authorship in literary theory, and on challenges to theorizing literary authorship, such as gender and sexuality, postcolonial and indigenous contexts for writing. Finally, Part III investigates practical perspectives on the topic, with a focus on attribution, anonymity and pseudonymity, plagiarism and forgery, copyright and literary property, censorship, publishing and marketing and institutional contexts.

As with every other region of Europe and the world, the traditional folklore of Ireland abounds with tales involving the supernatural and the fantastic, but nowhere else have these tales so influenced the literature and the shaping of that country, and no other country has produced so many world-famous authors whose work has shown those influences. *Everybody Wants Some* University Press of Kentucky

In this study, Charles Fanning has written the first general account of the origins and development of a literary tradition among American writers of Irish birth or background who have explored the Irish immigrant or ethnic experience in works of fiction. The result is a portrait of the evolving fictional self-consciousness of an immigrant group over a span of 250 years. Fanning traces the roots of Irish-American writing back to the eighteenth century and carries it forward through the traumatic years of the Famine to the present time with an intensely productive period in the twentieth century beginning with James T. Farrell. Later writers treated in depth include Edwin O'Connor, Elizabeth Cullinan, Maureen Howard, and William

Kennedy. Along the way he places in the historical record many all but forgotten writers, including the prolific Mary Ann Sadlier. *The Irish Voice in America* is not only a highly readable contribution to American literary history but also a valuable reference to many writers and their works. For this second edition, Fanning has added a chapter that covers the fiction of the past decade. He argues that contemporary writers continue to draw on Ireland as a source and are important chroniclers of the modern American experience.

Geological processes affect the earth itself and human society. Solutions to geological problems, whether natural or man-made, demand close international collaboration. This book presents new approaches to current problems of environmental assessment, demonstrates the interactions between those involved in addressing global problems, and represents a means for the education of others. The book focuses on four major themes: geoenvironmental models, GIS methods and techniques, assessment and resource management, and resource policies and sustainable development. The major topics falling under each theme are introduced, followed by discussions of

specific applications. Reports of the discussions of working groups are also presented to round out the individual contributions. The disciplines represented include geology, geophysics, geochemistry, remote sensing, economics, biology, mining engineering, resource analysis, mathematics and statistics.

Behind the Curtain re-introduces the fiction of Fitz-James O'Brien to modern readers by presenting fourteen of his works, five here reprinted for the first time, that together suggest the development and range of his accomplishment as a short story writer. Editorial commentary on individual stories reveals O'Brien's attunement to the fashions, fads, interests, and concerns that manifested themselves in his adopted country, especially in New York City. The volume comprises, first, an introduction that sketches O'Brien's literary career and traces his development as a fiction writer.

The stories appear next, arranged chronologically in the order of their publication. Each is preceded by information about its place in the author's career and circumstances surrounding its publication. O'Brien's frequent references to persons, places, books, and events that may require identification are explained in the notes that follow each story.

Mark Twain was an American author and humorist. He is noted for his novels *Adventures of Huckleberry Finn* (1885), called "the Great American Novel", and *The Adventures of Tom Sawyer* (1876). He achieved great success as a writer and public speaker. His wit and satire earned praise from critics and peers, and he was a friend to presidents, artists, industrialists, and European royalty.

The Uppsala Edda Omnibus Press

An absorbing and haunting collection of early science fiction tales by an Irish-

American author Fitz-James O'Brien capitalized on the success of his predecessors Edgar Allan Poe and Mary Shelley in writing disturbing stories with demented protagonists, and this collection of three tales shows his mastery of the macabre. "The Diamond Lens" tells of a lone scientist's discovery of a microcosmic world within a drop of water, and his growing obsession with the beautiful Animula, a fair maiden within this world which he can see but never enter. His uncompromising pursuit of knowledge at any cost foreshadows the mad scientist familiar to readers in a multitude of works. In "What Was It?" an invisible man is discovered by residents of a boarding house. The residents' capture and investigation of the creature blends the fantastic with the scientific as they seek rational explanations for this extraordinary phenomenon. "The Wondersmith" is a macabre tale of an embittered toymaker who seeks revenge upon the society that has persecuted him by creating demonic mannequins and imbuing them with life in order to slaughter the masses— a fantastic melodrama in which the cunning Wondersmith is offset by the unassuming

and unlikely hero Solon the hunchback, in love with the villain's daughter.

Nothing frightens a parent more than feeling totally helpless when their child reports, "I'm scared. There's a ghost in my room. I won't sleep there." Onerous questions come to mind, "Is my kid nuts? Am I nuts for believing them? How can I help with something invisible? How am I supposed to fight a phantom?" For the

first time, *Kids Who See Ghosts* provides the answers to these questions, and offers adults guidance in tackling the subject with children. The highly intuitive child is empathic, psychic, or sensitive and can see ghosts. Parental responses to such events range from abject fear, to supporting their child, being unable to act, to visiting doctors and therapists. This guide bridges the gap from mainstream to the metaphysical, providing answers and guidance. It doesn't matter whether parents believe in ghosts to know how to

help children through frightening experiences. Goode challenges readers to open their minds for the journey through ghost tales and to learn empowerment strategies for their kids. *Kids Who See Ghosts* includes interviews with experts from diverse backgrounds, from Dr. Bruce Lipton to Lynn Andrews, from science to shamanism, to give a well rounded perspective on our perception of the afterlife, intuition, psychic abilities, and belief.
