Streamlined in this edition, the text offers a coherent conceptualization of the problems of students with emotional and behavioral disorders and the common challenges for

teachers. Its four-part format examines the background of EBD, the origins of disordered behaviors, types of disorders and the procedures and problems associated with assessment. This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Author Karen Seccombe encourages students to think about

families beyond their own personal experiences, and even beyond family structure in the United States. Integrated coverage of important policy considerations throughout each chapter illustrates what is currently being done, and perhaps more importantly what can be done, to strengthen families and intimate relationships.

Working with Families of Children with Special Needs Campbell Biology, Books a la Carte Edition

This textbook presents a survey of physical anthropology, the branch of anthropology that studies the physical development of the human species. It plays an important part in the study of human origins and in the analysis and identification of human remains for legal purposes. It draws upon human body measurements, human genetics, and the study of human bones and includes the study of human brain evolution, and of culture as neurological adaptation to environment. The authors use the progressive term "biological anthropology" to mean "an integrative combination of information from the fossil record and the human skeleton, genetics of individuals

and of populations, our primate relatives, human adaptation, and human behavior."
