Finally, here is the definitive glossary of the book, offering readers all the terms they will need for thorough understanding of how books are made, the materials they are made of, and how they are described in the bookselling, book collecting, and library worlds. Every key term --- over 1,300 different words --- that could be used in booksellers' catalogs, library records, and collectors' descriptions of their holdings is represented in this dictionary. This authoritative source covers all areas of book knowledge: the book as physical object, typeface terminology, paper, printing, book collecting, book design, bibliography, calligraphy, the language of manuscripts, writing implements, librarianship, legal issues, the parts of a book, and much more. The definitions are supplemented by more than 100 illustrations showing the book as a physical object: parts of books, kinds of illustrations, kinds of printing techniques, tools that librarians, booksellers, and collectors refer to that are used in the making of books, kinds of binding structures and decoration, kinds of paper decoration, and other things.

Save money now and learn how to make your own cosmetics at home! Wouldn't it be amazing if you could make your own beauty products? You could have complete control over what goes into your cosmetics and be confident that they are just the way you like them. And wouldn't it be incredible if you could start a side business and sell something you've created with your own hands? Making cosmetics sounds very difficult, whereas, in reality, it is a very easy process that can turn into a productive hobby. With some pointers and tips from the experts, you can get started with making your favorite cosmetics much less expensively than store-bought. All it takes are some normal cooking utensils, a few basic ingredients, and a little bit of time. In this book, you'll: Uncover the chemistry behind product formulation Understand how you can do things like making emulsions at home with minimal gear Familiarize yourself with the core principles of cosmetic manufacturing Learn to preserve your creations with preservatives and antioxidants Master different recipes to create all kinds of products Achieve so much knowledge that you'll be

able to make customized products that meet your exact needs If you suffer from a particular medical condition or off-the-shelf products don't seem to be working well for you, there's no reason to fret! With the guidelines in this book and experts' actionable advice, you can start making your own products today. So, click the "add to cart" button and don't spend another dollar on cosmetics when you can easily make them yourself at home.

The 2nd Edition of Chemical Peels, by Drs. Mark G. Rubin and Rebecca Tung, shows you how to get great results by performing the newest techniques and treatments. Explore new chapters devoted to body peeling, review adjunct therapies and various methods used internationally, master chemical peeling for darker skin types, and examine case studies with before-and-after clinical photographs. This new edition in the Procedures in Cosmetic Dermatology Series lets you offer your patients the best skin rejuvenation methods available today. Learn the "tricks of the trade" from practically minded, technically skilled, hands-on clinicians. Review a wealth of color illustrations and photographs that depict cases as they present in practice. Improve your technique by examining common pitfalls and how to optimize outcomes. Get a look at emerging topics in the field, with guidance on the newest developments in cosmetic procedures Confidently meet the growing demand for chemical body peeling with a targeted chapter addressing the stronger chemical concentrations and added skills needed, the extent of treatments, and the body areas that prove the most resistant. Enhance outcomes for your patients with new coverage of the CROSS technique for improving hard-to-treat scars. Explore new chapters on comprehensive complications with expert advice on how to avoid them and details on corrective management. Know how to vary your technique for patients with darker skin types, and learn alternate approaches used internationally. Get expert tips by viewing case study details with "before-and-after" clinical photographs.

Booklist Books

Today, young cosmetics researchers who have completed their graduate studies and have entered a cosmetics company are put through several years of training before they become qualified to design cosmetics formulations themselves. They are trained so that they can design formulas not by a process of logic but by heart, like craftsmen, chefs, or carpenters. This kind of training seems a terrible waste of labor and time. To address this issue and allow young scientists to design novel cosmetics formulations, effectively bringing greater diversity of innovation to the industry, this book provides a key set of skills and the knowledge necessary for such pursuits. The volume provides the comprehensive knowledge and instruction necessary for researchers to design and create cosmetics products. The book's chapters cover a comprehensive list of topics, which include, among others, the basics of cosmetics, such as the raw materials of cosmetics and their application; practical techniques and technologies for designing and manufacturing cosmetics, as well as theoretical knowledge; emulsification; sensory evaluations of cosmetic ingredients; and how to create products such as soap-based cleansers, shampoos, conditioners, creams, and others. The potential for innovation is great in Japan's cosmetics industry. This book expresses the hope that the high level of dedicated research continues and proliferates, especially among those who are innovators at heart.
