Indiana Jones and the Dinosaur Eggs
Simon & Schuster

What would it be like to live as a dinosaur? Young readers will discover that dinosaur lives had many similarities to present-day animals: they hatched, ran, hunted, hid from predators, and grew to adulthood. However, the world these creatures from the far past inhabited was very different from that of today; a great example is that a simple thing like grass didn't yet exist. Repetitive sight words make this a great story for beginning readers and dinosaur enthusiasts alike.

Far-Seer Orchard Books

From the first illustrated edition of Jules Verne's *Journey to the Center of the Earth* in 1867, dinosaurs and prehistory have fascinated readers. Writers would time and again come back to dinosaurs as an element of fantastic fiction, often using these creatures--through the venue of the written word--to reflect the world of the writers' own time. This literary survey examines how "paleoliterature" originated, developed and matured to the present day. Also discussed are the ways in which dinosaur fiction mirrors contemporary ideas about subjects such as geology, the Cold War, environmentalism, time travel, evolution and bioengineering. Featured authors include Ray Bradbury, H.G. Wells, and Poul Anderson, among others. In select cases, the novelizations of movie scripts are also examined. An appendix provides brief summaries of deserving dinosaur texts.

For the younger fact-fan, this book depicts and describes nearly 100 different dinosaurs, pterosaurs, ichthyosaurs and other prehistoric creatures. The emphasis is on SIZE: how big, tall and heavy were these creatures? Which was the biggest (and smallest) of all? Each page has either two giant folding flaps, to reveal more dinosaurs underneath, or a 4-page concertina-fold pull-out, to reveal the very LONGEST creatures, on land and under the sea. Watch out for the life-size (young) T. rex footprint - big enough for young readers to fit their own foot inside!

Stampede of the Edmontosaurus My First Big Book of . . .

From the New York Times bestselling novelist, a stunning historical novel that follows the story of Mary Anning and Elizabeth Philpot, two extraordinary 19th century fossil hunters who changed the

scientific world forever. On the windswept, fossil-strewn beaches of the English coast, poor and uneducated Mary learns that she has a unique gift: "the eye" to spot ammonites and other fossils no one else can see. When she uncovers an unusual fossilized skeleton in the cliffs near her home, she sets the religious community on edge, the townspeople to gossip, and the scientific world alight. After enduring bitter cold, thunderstorms, and landslips, her challenges only grow when she falls in love with an impossible man. Mary soon finds an unlikely champion in prickly Elizabeth, a middle-class spinster who shares her passion for scouring the beaches. Their relationship strikes a delicate balance between fierce loyalty, mutual appreciation, and barely suppressed envy, but ultimately turns out to be their greatest asset. From the author of *At the Edge of the Orchard* and *Girl With a Pearl Earring* comes this incredible story of two remarkable women and their voyage of discovery.

A Dinosaur Ate My Sister National Geographic Books

Dinosaur memories are hard to forget! Most who revel in the current renaissance in dinosaur science, art, fiction and movies, or who enjoy the other appealing prehistoric animals so well popularized by the media have fond recollections of what it was like "growing up dinosaur."

Together with wife Diane and his father Allen G. Debus, Allen A. Debus unveils treasured dinosaur memories and stories about prehistoric animals and paleo-people, spanning from the cold-blooded

dinosaur 'era,' to the modern wave dinosaur renaissance. Beginning with fondly recalled roadtrips to prehistoric places where T. rex still reigns, *Dinosaur Memories* ventures into the realm of

thunder beasts and explores the rich 'pop-cultural' appeal of prehistoric animals. If you've ever collected dinosaurs, enjoyed fossil hunting or visits to see the old bones in museums, *Dinosaur Memories* is a book you'll still recall years from now! Thirty-

five chapters are grouped into seven sections titled, "Roads Into Prehistory," "Thunder Beasts," "Dinosaur Worlds," "Fantasy Dinosaurs," "Fossil Trickery," "Paleo-people," and "Rustlin' up Dinos."
