Fiscal Decentralization in Zambia BPP Learning Media
 Some see trade in services as irrelevant to the development agenda for least developed countries (LDCs). Others see few benefits from past market openings by LDCs. This book debunks both views. It finds that serious imperfections in Zambia's reform of services trade deprived the country of significant benefits and diminished faith in liberalization. What is to be done? Move aggressively and consistently to eliminate barriers to entry and competition. Develop and enforce regulations to deal with market failures. And implement proactive policies to widen the access of firms, farms, and consumers to services of all kinds. These lessons from Zambia are applicable to all LDCs. In all this, international agreements can help. But to succeed, LDCs must commit to open markets and their trading partners must provide assistance for complementary reforms. Zambia, which leads the LDC group at the World Trade Organization, can show the way.

 How do scientific conjectures become laws? Why does proof mean different things in different sciences? Do numbers exist, or were they invented? Why do some laws turn out to be wrong? In this wide-ranging book, Brian Davies discusses the basis for scientists' claims to knowledge about the world. He looks at science historically, emphasizing not only the achievements of scientists from Galileo onwards, but also their mistakes. He rejects the claim that all scientific knowledge is provisional, by citing examples from chemistry, biology and geology. A major feature of the book is its defence of the view that mathematics was invented rather than discovered. While experience has shown that disentangling knowledge from opinion and aspiration is a hard task, this book provides a clear guide to the difficulties. Full of illuminating examples and quotations, and with a scope

ranging from psychology and evolution to quantum theory and mathematics, this book brings alive issues at the heart of all science.

"Jugaad Innovation is the most comprehensive book yet to appear on the subject [of frugal innovation]." —The Economist A frugal and flexible approach to innovation for the 21st century Innovation is a key directive at companies worldwide. But in these tough times, we can't rely on the old formula that has sustained innovation efforts for decades—expensive R&D projects and highly-structured innovation processes. Jugaad Innovation argues the West must look to places like India, Brazil, and China for a new approach to frugal and flexible innovation. The authors show how in these emerging markets, jugaad (a Hindi word meaning an improvised solution born from ingenuity and cleverness) is leading to dramatic growth and how Western companies can

adopt jugaad innovation to succeed in our hypercompetitive world. Outlines the six principles of jugaad innovation: Seek opportunity in adversity, do more with less, think and act flexibly, keep it simple, include the margin, and follow your heart Features twenty case studies on large corporations from around the world—Google, Facebook, 3M, Apple, Best Buy, GE, IBM, Nokia, Procter & Gamble, PepsiCo, Tata Group, and more—that are actively practicing jugaad innovation The authors blog regularly at Harvard Business Review; their work has been profiled in BusinessWeek, MIT Sloan Management Review, The Financial Times, The Economist, and more Filled with previously untold and engaging stories of resourceful jugaad innovators and entrepreneurs in emerging markets and the United States This groundbreaking book shows leaders everywhere why the time is right for jugaad to emerge as a powerful business tool in the West—and how to bring jugaad practices to their organizations. *Revision Kit* Austin Macauley
