Whye presents 112 full-color photographs of this bustling city nestled in the heartland of America. The images convey Omaha's unmistakable cityscapes, large and small, as well as the surrounding fertile agricultural lands. Old-timers and newcomers will see Omaha in original ways, as Whye's photographs convey clear impressions of distinct neighborhoods, public spaces, and fabulous architecture found throughout the city. Festively lit downtown street scenes are counterbalanced by tranquil farmlands. Stunning sunsets share the pages with rich interiors. Photos of throngs of happy, celebrating Omahans are offset by close-ups of the serene greenery found in a quiet nature preserve. A warm, lively foreword by the photographer sets the stage. Informative captions complement the photographs throughout the book, providing enough detail that even casual

readers will learn something of Omaha's fascinating history and contemporary culture while simply browsing through the photos. Omaha Impressions is a bright, inclusive, and affectionate tribute to the city. Visitors and locals alike will cherish this fine book of photography.

Tall, skinny, short, round, squat, awkward, slouched, tanned, bashful, and sometimes unknowingly beautiful, the adolescents in Rineke Dijkstra's

"Beach Portraits" stand alone, the ocean rolling behind them. Clad in little more than bathing suits, these young people are striking to behold.

Remarkably clear and formally classical, each subject is frontally posed and shot straight on; the resulting photographs participate in a cold, quasi-scientific categorization reminiscent of the work of August Sander and Thomas Ruff. Yet Dijkstra's pictures are not just that--there is also something of the eccentric in them, something that comes closer to Diane Arbus's images. Seen together, the complete series of 20 "Beach Portraits" creates a kind of collective portrait of the existential insecurity and awkward beauty of youth.

The dipteran family Chironomidae is the most widely distributed and frequently the most abundant group of insects in freshwater, with representatives in both terrestrial and marine environments. A very wide range of gradients of temperature, pH, oxygen concentration, salinity, current velocity, depth, productivity, altitude and latitude have been exploited, by at least some chironomid species, and in grossly polluted environments chironomids may be the only insects present. The ability to exist in such a wide range of conditions has been achieved largely by behavioural and physiological adaptations with relatively slight morphological changes. It has been estimated that the number of species world-wide may be as high as 15000. This high species diversity has been attributed to the antiquity of the family, relatively low vagility leading to isolation, and evolutionary plasticity. In many aquatic ecosystems the number of chironomid species present may account for at least 50% of the total macroinvertebrate species recorded. This species richness, wide distribution and tolerance to adverse conditions has meant that the group is frequently recorded in ecological studies but taxonomic difficulties have in the past prevented non-specialist identification beyond family or subfamily level. Recent works, including genetic studies, have meant that the family is receiving much more attention globally.

The advertising campaigns launched by Kodak in the early years of snapshot photography stand at the center of a shift in American domestic life that goes deeper than technological innovations in cameras and film. Before the advent of Kodak advertising in 1888, writes Nancy Martha West, Americans were much more willing to allow sorrow into the space of the domestic photograph, as evidenced by the popularity of postmortem photography in the mid-nineteenth century. Through the taking of snapshots, Kodak taught Americans to see their experiences as objects of nostalgia, to arrange their lives in such a way that painful or unpleasant aspects were systematically erased. West looks at a wide assortment of Kodak's most popular inventions and marketing strategies, including the "Kodak Girl," the momentous invention of the Brownie camera in 1900, the "Story Campaign" during World War I, and even the Vanity Kodak Ensemble, a camera introduced in 1926 that came fully equipped with lipstick. At the beginning of its campaign, Kodak advertising primarily sold the fun of taking pictures. Ads from this period celebrate the sheer pleasure of snapshot photography--the delight of handling a diminutive camera, of not worrying about developing and printing, of capturing subjects in candid moments. But after 1900, a crucial shift began to take place in the company's marketing strategy. The preservation of domestic memories became Kodak's most important mission. With the introduction of the Brownie camera at the turn of the century, the importance of home began to replace leisure activity as the subject of ads, and at the end of World War I, Americans seemed desperately to need photographs to confirm familial unity. By 1932, Kodak had become so intoxicated with the power of its own marketing that it came up with the most bizarre idea of all, the "Death Campaign." Initiated but never published, this campaign based on pictures of dead loved ones brought Kodak advertising full circle. Having launched one of the most successful campaigns in advertising history, the company did not seem to notice that selling a painful subject might be more difficult than selling momentary pleasure or nostalgia. Enhanced with over 50 reproductions of the ads themselves, 16 of them in color, Kodak and the Lens of Nostalgia vividly illustrates the fundamental changes in American culture and the function of memory in the formative years of the twentieth century.

A leading critic's inside story of "the photo boom" during the crucial decades of the 1970s and 80s When Andy Grundberg landed in New York in the early 1970s as a budding writer, photography was at the margins of the contemporary art world. By 1991, when he left his post as critic for the New York Times, photography was at the vital center of artistic debate. Grundberg writes eloquently and authoritatively about photography's "boom years," chronicling the medium's increasing role within the most important art movements of the time, from Earth Art and Conceptual Art to performance and video. He also traces photography's embrace by museums and galleries, as well as its politicization in the culture wars of the 80s and 90s. Grundberg reflects on the landmark exhibitions that defined the moment and his encounters with the work of leading photographers—many of whom he knew personally—including Gordon Matta-Clark, Cindy Sherman, and Robert Mapplethorpe. He navigates crucial themes such as

When Josef Vadassy arrives at the Hotel de la Reserve at the end of his Riviera holiday, he is simply looking forward to a few more days of relaxation before returning to Paris. But in St. Gathien, on the eve of World War II, everyone is suspect--the American brother and sister, the expatriate Brits, and the German gentleman traveling under at least one assumed name. When the film he drops off at the chemist reveals photographs he has not taken, Vadassy finds himself the object of intense suspicion. The result is anything but the rest he had been hoping for.

Evolving from a series of road trips along the Mississippi River, Alec Soth's "Sleeping by the Mississippi captures America's iconic yet oft-neglected "third coast." Soth's richly descriptive, large-format color photographs present an eclectic mix of individuals, landscapes, and interiors. Sensuous in detail and raw in subject, "Sleeping by the Mississippi elicits a consistent mood of loneliness, longing, and reverie." In the book's 46 ruthlessly edited pictures, "writes Anne Wilkes Tucker, "Soth alludes to illness, procreation, race, crime learning art, music, death, religion, redemption, politics, and cheap sex." Like Robert Frank's classic "The Americans, Sleeping by the Mississippi merges a documentary style with a poetic sensibility. The Mississippi is less the subject of the book than its organizing structure. Not bound by a rigid concept or ideology, the series is created out of a quintessentially American spirit of wanderlust.

New York Times-bestselling author and cultural critic Chuck Klosterman sorts through the past decade and how we got to now. Chuck Klosterman has created an incomparable body of work in books, magazines, newspapers, and on the Web. His writing spans the realms of culture and sports, while also addressing interpersonal issues, social quandaries, and ethical boundaries. Klosterman has written nine previous books, helped found and establish Grantland, served as the New York Times Magazine Ethicist, worked on film and television productions, and contributed profiles and essays to outlets such as GQ, Esquire, Billboard, The A.V. Club, and The Guardian. Chuck Klosterman's tenth book (aka Chuck Klosterman X) collects his most intriguing of those pieces, accompanied by fresh introductions and new footnotes throughout. Klosterman presents many of the articles in their original form, featuring previously unpublished passages and digressions. Subjects include Breaking Bad, Lou Reed, zombies, KISS, Jimmy Page, Stephen Malkmus, steroids, Mountain Dew, Chinese Democracy, The Beatles, Jonathan Franzen, Taylor Swift, Tim Tebow, Kobe Bryant, Usain Bolt, Eddie Van Halen, Charlie Brown, the Cleveland Browns, and many more cultural figures and pop phenomena. This is a tour of the past decade from one of the sharpest and most prolific observers of our unusual times.
