Memory  
matters. It  
matters  
because

memory  
brings the  
past into the  
present, and  
opens it up to  
the future. But  
it also matters  
literally,  
because  
memory is  
mediated  
materially.  
Materiality is  
the stuff of  
memory.  
Meaningful

objects that  
we love (or  
hate) function  
not only as  
aide-mémoire  
but are  
integral to  
memory.  
Drawing on  
previous  
scholarship on  
the  
interrelation of  
memory and  
materiality,  
this book

applies recent theories of new materialism to explore the material dimension of memory in art and popular culture. The book's underlying premise is twofold: on the one hand, memory is performed, mediated, and stored through the material world that surrounds us; on the other hand, inanimate objects and things also have agency on their own, which affects practices of memory, as

well as forgetting. Chapters 1, 4, and 5 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 3.0 license. Walter de Gruyter GmbH & Co KG This book is about the art of displaying waterline models. By their very nature, ship

models that do not show the full hull and are not mounted on an artificial stand cry out for a realistic setting. At its most basic this can be just a representation of the sea itself, but to give the model a context □ even to tell some sort of story □ is far more challenging. This is the province of the diorama, which at its most effective is a depiction of a scene or an event in which the ship

model takes centre stage. As with a painting, the composition is a vital element and this book devotes much of its space to what works and what does not, and illustrates with photographic examples why the best maritime dioramas have visual power and how to achieve that impact. Individual chapters explore themes like having small craft in attendance on the main subject,

multiple-model scenarios, dockyards and naval bases, and the difficulties of replicating naval combat realistically. It also looks at both extremes of modelmaking ambition: the small single-ship exposition and the largest, most ambitious projects of the kind meant for museum display. The book concludes with some of the most advanced concepts □ how to create

drama and the illusion of movement, and how to manipulate perspective. Illustrated throughout with colour photos, the more abstract discussion is backed with practical 'how to' sections, so anyone who builds waterline ship model will benefit from reading this book. As featured in 'Glasgow Now'. *Scenery and Dioramas* Kalmbach Publishing Company Diorama Design is a

Independently Published Building Dioramas Kalmbach Media *The Art of LEGO Design* Texas A&M University Press 'Hiroshi Sugimoto: Still Life' includes 'Polar Bear' (1976), his first photograph from the Diorama series, exhibited along with

later works from the 1980s, 1990s, and, most recently 2012. Where many of the earlier silver gelatin prints present animals, a number of the 2012 photographs including Mixed Deciduous Forest and Olympic Rain Forest focus on natural landscapes. He has likened the record created by photography to a process of fossilization - the evidence of a moment suspended in time.
