JULISSA HICKS

50 Bauhaus Icons You Should Know Lars Muller Publishers

A memo-game based on color cards that can be used for inspiration and for experimenting with different color combinations, series and tones.

The Egyptian Postures Niggli

A beautifully illustrated volume for architects and designers that reviews the theoretical foundations of color and design. The book explores the ideas of Albers, Itten, Kandinsky, Munsell, and other theorists, and provides a technical base for their application to architecture and design by means of color graphic computing. 181 color illustrations.

Gropius Van Nostrand Reinhold Company

The most influential work of architectural criticism and history of the twentieth century, now available in a handsomely designed new edition.

Design and Form The Museum of Modern Art

Introduction: a peculiar experiment -- Kinaesthetic knowing: the nineteenth-century biography of another kind of knowledge -- Looking: Wölfflin's comparative vision -- Affecting: Endell's mathematics of living feeling -- Drawing: the Debschitz school and formalism's subject -- Designing: discipline and introspection at the Bauhaus -- Epilogue

Design and Form U of Minnesota Press

Forms that Work: Designing Web Forms for Usability clearly explains exactly how to design great forms for the web. The book provides proven and practical advice that will help you avoid pitfalls, and produce forms that are aesthetically pleasing, efficient and cost-effective. It features invaluable design methods, tips, and tricks to help ensure accurate data and satisfied customers. It includes dozens of examples - from nitty-gritty details (label alignment, mandatory fields) to visual designs (creating good grids, use of color). This book isn't just about colors and choosing the right widgets. It's about the whole process of making good forms, which has a lot more to do with making sure you're asking the right questions in a way that your users can answer than it does with whether you use a drop-down list or radio buttons. In an easy-to-read format with lots of examples, the authors present their three-layer model - relationship, conversation, appearance. You need all three for a successful form - a form that looks good, flows well, asks the right questions in the right way, and, most important of all, gets people to fill it out. Liberally illustrated with full-color examples, this book guides readers on how to define requirements, how to write questions that users will understand and want to answer, and how to deal with instructions, progress indicators and errors. This book

is essential reading for HCI professionals, web designers, software developers, user interface designers, HCI academics and students, market research professionals, and financial professionals. *Provides proven and practical advice that will help you avoid pitfalls, and produce forms that are aesthetically pleasing, efficient and cost-effective. *Features invaluable design methods, tips, and tricks to help ensure accurate data and satisfied customers. *Includes dozens of examples -- from nitty-gritty details (label alignment, mandatory fields) to visual designs (creating good grids, use of color). *Foreword by Steve Krug, author of the best selling Don't Make Me Think!

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The International Style Knopf

"In 1927, the critic Rene Chavance identified carpet production as the most successful of the decorative arts in achieving 'the more visionary aims of the times'. Susan Day's book, a work of original scholarship accompanied throughout by illustrations both of the carpets themselves and of contemporary interiors, demonstrates that these Art Deco carpets have lost none of their decorative power. A significant number of the carpets are shown precisely as they were meant to be seen, within the rooms for which they were made." "The fruits of the remarkable Art Deco efflorescence throughout Europe form the first part of the book. In the second, the focus turns to the reaction against the artistes-decorateurs by the champions of modernism. In France, the designs of Sonia Delaunay, Eileen Gray and Jean Lurcat evoked collage and Cubism; the Bauhaus and Scandinavia provided different influences. The fashion for abstract and modernist rugs was further stimulated by limited editions of rugs woven from works by such artists as Picasso, Klee and Miro, while in the USA, designers developed a style that was distinctly American." "This visual feast, of appeal not only to carpet collectors and textile specialists but to anyone with an interest in 20th-century design, ranges from the supremely imaginative achievements of Paul Poiret's unique weaving studio, the Ecole Martine, to the

Scandinavian folk traditions of Marta Maas-Fjetterstrom, the innovations of Frank Lloyd Wright and Donald Deskey in the USA and Gunta Stölzl's handwoven carpets in Germany. The book's invaluable reference section includes detailed information on artists, manufacturers and retailers, their signatures and monograms, and a glossary and bibliography." --Book Jacket.

Interaction of Color Lars Muller Publishers

Giving an overview of the history of color theory from ancient and classical cultures to contemporary contexts, this book explores important critical principles and provides practical guidance on the use of color in art and design. Going beyond a simple recitation of what has historically been said about color, artist and educator Aaron Fine provides an intellectual history, critiquing prevailing Western ideas on the subject and challenging assumptions. He analyses colonialist and gendered attitudes, materialist and romanticist perspectives, spiritualist approaches to color, color in the age of reproduction, and modernist and post-modernist color strategies. Highlighted throughout are examples of the ways in which attitudes towards color have been impacted by the legacy of colonialism and are tied up with race, gender, and class. Topics covered include color models, wheels and charts, color interaction and theories of perception, with over 150 images throughout. By placing under-examined tenets of color theory such as the color wheel and color primaries within the Western industrial context that generated them, Fine helps you to connect color choices to color meanings and apply theory to practice.

The Elements of Color Watson-Guptill

Profiles the Basic Course taught by Johannes Itten at the Bauhaus in Weimar, Germany and discusses how it helped students determine their creative talents, choose a career, learn elementary design.

Bauhaus Weaving Theory Wiley

An overview of emerging topics, theories, methods, and practices in sonic interactive design, with a focus on the multisensory aspects of sonic experience. Sound is an integral part of every user experience but a neglected medium in design disciplines. Design of an artifact's sonic qualities is often limited to the shaping of functional, representational, and signaling roles of sound. The interdisciplinary field of sonic interaction design (SID) challenges these prevalent approaches by considering sound as an active medium that can enable novel sensory and social experiences through interactive technologies. This book offers an overview of the emerging SID research, discussing theories, methods, and practices, with a focus on the multisensory aspects of sonic experience. Sonic Interaction Design gathers contributions from scholars, artists, and designers working at the intersections of fields ranging from electronic music to cognitive science. They offer both theoretical considerations of key themes

and case studies of products and systems created for such contexts as mobile music, sensorimotor learning, rehabilitation, and gaming. The goal is not only to extend the existing research and pedagogical approaches to SID but also to foster domains of practice for sound designers, architects, interaction designers, media artists, product designers, and urban planners. Taken together, the chapters provide a foundation for a still-emerging field, affording a new generation of designers a fresh perspective on interactive sound as a situated and multisensory experience. Contributors Federico Avanzini, Gerold Baier, Stephen Barrass, Olivier Bau, Karin Bijsterveld, Roberto Bresin, Stephen Brewster, Jeremy Coopersotck, Amalia De Gotzen, Stefano Delle Monache, Cumhur Erkut, George Essl, Karmen Franinović, Bruno L. Circle of Form offers an informative guide to the complex discipline of mastering form, contrast and composition in Architecture. The starting point for this book is our ability to see and think what is similar and what is different. Things can be more or less diverse, but oppositions, contrasts are a particular way to convey the difference. On reflection, opposites are one of the most used methods to quickly and immediately breakdown complex compositions into simple, well-defined but connected pieces. Artists have used this knowledge for centuries because simplicity supports a clear artistic language and oppositions emphasize expression and interaction, whether it is literature, music, painting, sculpture, product design or as in this book: Architecture. The Circle of Form continues this tradition, but with a systematic and modern perspective. The theoretical approach of this book continues the author's previous research into art theories, perception, cognitive theories and neuroscience related to visual experiences.

Internationally renowned artist and best selling author Stephen Quiller shows readers how to discover their own personal "color sense" in *Color Choices*, a book that offers readers a fresh perspective on perfecting their own color styles. With the help of his own "Quiller Wheel," a special foldout wheel featuring 68 precisely placed colors, the author shows artists how they can develop their own unique color blends. First, Quiller demonstrates how to use the wheel to interpret color relationships and mix colors more clearly. Then he explains, step by step, how to develop five structured color schemes, apply underlays and overlays, and use color in striking, unusual ways. This book will bring out every artist's unique sense of color whether he or she works in oil, watercolor, acrylics, gouache, or casein.

Herbert Bayer National Geographic Books

Nicholas Fox Weber, for thirty-three years head of the Albers Foundation, spent many years with Anni and Josef Albers, the only husband-and-wife artistic pair at the Bauhaus (she was a textile artist; he a professor and an artist, in glass, metal, wood, and photography). The Alberses told him their own stories and

described life at the Bauhaus with their fellow artists and teachers, Walter Gropius, Paul Klee, Wassily Kandinsky, Ludwig Mies van der Rohe, as well these figures' lesser-known wives and girlfriends. In this extraordinary group biography, Weber brilliantly brings to life the Bauhaus geniuses and the community of the pioneering art school in Germany's Weimar and Dessau in the 1920s and early 1930s. Here are: Walter Gropius, founder of the Bauhaus, the architect who streamlined design early in his career and who saw the school as a place for designers to collaborate in an ideal setting . . . a dashing hussar, the ardent young lover of the renowned femme fatale Alma Mahler, beginning when she was the wife of composer Gustav Mahler . . . Paul Klee, the onlooker, smoking his pipe, observing Bauhaus dances as well as his colleagues' lectures from the back of the room . . . the cook who invented recipes and threw together his limited ingredients with the same spontaneity, sense of proportion, and fascination that underscored his paintings . . . Wassily Kandinsky, the Russian-born pioneer of abstract painting, guarding a secret tragedy one could never have guessed from his lively paintings, in which he used bold colors not just for their visual vibrancy, but for their "sound" effects . . . Josef Albers, who entered the Bauhaus as a student in 1920 and was one of the seven remaining faculty members when the school was closed by the Gestapo in 1933 . . . Annelise Else Frieda Fleischmann, a Berlin heiress, an intrepid young woman, who later, as Anni Albers, made art the focal point of her existence . . . Ludwig Mies van der Rohe, imperious, decisive, often harsh, an architect who became director—the last—of the Bauhaus, and the person who guided the school's final days after SS storm troopers raided the premises. Weber captures the life, spirit, and flair with which these geniuses lived, as well as their consuming goal of making art and architecture. A portrait infused with their fulsome embrace of life, their gift for laughter, and the powerful force of their individual artistic personalities.

When Families Feud Hassell Street Press

Kasimir Malevich's treatise on Suprematism was included in the Bauhausbücher series in 1927, as was Piet Mondrian's reflections on Russian Constructivism in 1925 (*New Design*, Bauhausbücher 5). Like Mondrian, who was never an official member of the Bauhaus, Malevich nevertheless has a close connection to the ideas of the school in terms of content. This volume, the eleventh, remains the only book publication in Germany to be produced during the life of the Russian avant-garde artist, and it laid the foundation for his late work: to wrest the mask of life from the true face of art.

Max Bill's View of Things John Wiley & Sons

The masterworks of one of the most influential teacher-artists of the twentieth century, originally published as a limited, boxed edition in 1963, was conceived as a guide and teaching aid for artists, instructors, and students. A paperback edition, containing the unabridged text of the original edition, plus ten representative color plates, chosen from the original silk-screen reproductions and printed by offset lithography, was published in 1971. Since those color plates have now been worn out in repeated reprintings, Mr. Albers has selected ten different color studies, with new comments, for this revised edition. "The text of Interaction of Color provides the careful reader with the content of Josef Albers' famous color course. His teaching is based on learning by direct perception, and not by theories or color systems. There are many books on color on the market, but no one combines eyesight with such profound insight as Josef Albers

does in Interaction of Color."—Hannes Beckmann "The publication of this famous book in paperback is an event. . . . It is clearly written and easy to understand. . . . This book ought to be owned by any serious student or teacher, regardless of the kind of painting he does."—The Artist

Color Theory Bloomsbury Publishing

The international touring exhibition -Die gute Form- was conceived by Max Bill on behalf of the Swiss Werkbund and was shown for the first time in 1949 at the Basel Mustermesse trade fair. This publication documents Bill's initiative in reproductions of the original display panels and layout plans for the venues visited by the exhibition, and places Die gute Form in a theoretical context that considers its reception and impact within the history of design.

[The Bauhaus Group](#) Hassell Street Press

A useful simplification and condensation of Johannes Itten's major work. The Art of Color, this book covers subjective feeling and objective color principles in detail. It presents the key to understanding color in Itten's color circle and color contrasts.

The Art of Color Design and Form

An investigation of the irrational and the unconventional currents swirling behind the Bauhaus's signature sleek surfaces and austere structures. The Bauhaus (1919-1933) is widely regarded as the twentieth century's most influential art, architecture, and design school, celebrated as the archetypal movement of rational modernism and famous for bringing functional and elegant design to the masses. In *Haunted Bauhaus*, art historian Elizabeth Otto liberates Bauhaus history, uncovering a movement that is vastly more diverse and paradoxical than previously assumed. Otto traces the surprising trajectories of the school's engagement with occult spirituality, gender fluidity, queer identities, and radical politics. The Bauhaus, she shows us, is haunted by these untold stories. The Bauhaus is most often associated with a handful of famous artists, architects, and designers—notably Paul Klee, Walter Gropius, László Moholy-Nagy, and Marcel Breuer. Otto enlarges this narrow focus by reclaiming the historically marginalized lives and accomplishments of many of the more than 1,200 Bauhaus teachers and students (the so-called Bauhäusler), arguing that they are central to our understanding of this movement. Otto reveals Bauhaus members' spiritual experimentation, expressed in double-exposed "spirit photographs" and enacted in breathing exercises and nude gymnastics; their explorations of the dark sides of masculinity and emerging female identities; the "queer hauntology" of certain Bauhaus works; and the role of radical politics on both the left and the right—during the school's Communist period, when some of the Bauhäusler put their skills to work for the revolution, and, later, into the service of the Nazis. With *Haunted Bauhaus*, Otto not only expands our knowledge of a foundational movement of modern art, architecture, and design, she also provides the first sustained investigation of the irrational and the unconventional currents swirling behind the Bauhaus's signature sleek surfaces and austere structures. This is a fresh, wild ride through the Bauhaus you thought you knew.
