The world of managing people and processes continues to change dramatically. Managers are faced with the conflicting challenges of understanding and motivating an increasingly diverse workforce, being open and accountable to a wide variety of stakeholders, planning for the future in an increasingly changing environment and considering the ethical implications of decision-making. Contemporary Management offers a fresh and integrative view of the manager in the workplace in line with this changing environment. It views the manager as a person, working with people and within an organisation, and holding values and ethics. As such, modern issues such as diversity, cultural change and global management are given careful attention. Management is an integrated and sometimes intricate balance of dealing with people within an organisational

context. For students, the prospect of managing others can be particularly daunting. Contemporary Management is written with the student in mind, with many current case studies, exercises and support materials included. In this thoroughly modern text, students learn that successful human interaction and communication are the real basis for effective and efficient management in business.

Serving as a policy guide for market practitioners and regulators at all levels, the book explains the keys to success that bankers need to follow during good times in order to be prepared for the bad, providing in-depth guidance and technical analysis of exactly what constitutes good banking practice. Accessible to professionals and students alike, The Principles of Banking covers issues of practical importance to bank practitioners, including asset-liability management, liquidity risk, internal transfer pricing, capital management, stress testing, and more. Existing narratives about how we should organize are built upon, and reinforce, a concept of 'good management' derived from what is assumed to be a fundamental need to increase efficiency. But this assumption is based on a presentist, monocultural, and generally limited view of management's past. A New History of Management disputes these foundations. By reassessing

conventional perspectives on past management theories and providing a new critical outline of present-day management, it highlights alternative conceptions of 'good management' focused on ethical aims, sustainability, and alternative views of good practice. From this new historical perspective, existing assumptions can be countered and simplistic views disputed, offering a platform from which graduate students, researchers and reflective practitioners can develop alternative approaches for managing and organizing in the twenty-first century.

What makes the texts different are their approach to the subject (principles vs. OB focused) and their strengths of coverage (high/strategic vs. low level/applied/skills). The aim of this text is to show how the four functions interact.
