JANIAH NICHOLSON

United Arab Emirates John Wiley & Sons
Chronically questioning, funny, and bold, a young American explores the majority-Muslim lands that scare him most. Armed only with college Arabic and restless curiosity, Adam Valen Levinson sets out to “learn about the world 9/11 made us fear.” From a base in globalized and sterilized Abu Dhabi, he sets out to lunch in Taliban territory in Afghanistan, travels under the watchful eye of Syria’s secret police, risks

shipwreck en route to Somalia, investigates Yazidi beliefs in a sacred cave, cliff dives in Oman, celebrates New Year’s Eve in Tahrir Square, and, at every turn, discovers a place that matches not at all with its reputation. Valen Levinson crosses borders with wisecracking humor, erudition, and humanity, seeking common ground with “bros” everywhere, and finding that people who pray differently often laugh the same. And as a young man bar mitzvahed eight years late, he slowly learns how childish it is to live by decisions and distinctions born of fear.

For many people, thoughts of the United Arab Emirates conjure images of ultramodern skyscrapers and rolling sand dunes. However, the Emirates are a rich mosaic of ecosystems and habitats that support surprisingly diverse communities of organisms, and there is growing awareness of the importance of these previously underappreciated natural assets. A Natural History of the Emirates provides a comprehensive overview of the unusual environmental setting of this young nation, and surveys the major ecosystems and the marine and terrestrial

organisms occurring across the nation. From freshwater streams in the hyperarid Hajar Mountains to the world's most temperature-tolerant coral reefs, the UAE is home to an astounding variety of uniquely adapted organisms that are providing insights into climate change and how organisms cope with and respond to extreme environmental conditions. The book closes with a section on human interactions with this unique environment, and proposes initiatives to ensure the protection of these unique natural assets into the future. This is an open access book.

Threads of Fate Academic Press

This book provides an inventory of water resources, describes water challenges, and suggests methodologies and technologies for integrated water resources management in the UAE. It also summarizes efforts of water conservation and management, and modern approaches for improvement of water resources management and decision-making related to this valuable resource. The authors are specialized in geology and hydrogeology and have been teaching and conducting scientific research on water

resources in the UAE for the last three decades. This book represents the main reference on water resources in the UAE for academia, researchers, professionals, students and the general public.

A British Banker in the Arab World

Encyclopaedia Britannica, Inc.

As this fascinating memoir unfolds, moving backwards and forwards through time, two parallel stories emerge: one of a Second World War Spitfire ace whose flying career comes to a premature end when he's shot down and loses an eye, the other of his progeny, a second generation fighter pilot who eventually reaches the rank of air marshal. The narrative is unique in its use of two separate and distinct voices. The author's own reminiscences are interwoven with those his father recorded more than thirty years ago, embellished by extracts from some 300 of his wartime letters. Intensely personal and revealing, controversial too at times, this account is above all about people, not least those with whom the author flew while serving with the USAF – a tour marked by tragedy; that said, they

proved altogether more friendly than the P-38 pilots who twice attacked his father in North Africa! A daughter with dual citizenship subsequently helped him sustain his links with the US, both while serving and afterwards in business. The irony is that the son spent a lifetime training for the ultimate examination – one that despite strictly limited preparation his father passed with flying colors. To [Black] Robertson's eternal regret he was never able to put his own training to the test. His father, [Robbie], was awarded the DFC and retired as a flight lieutenant after five years or so. He himself served for nearly thirty-six years, earned a Queen's Commendation, an OBE and CBE and served as an ADC to HM The Queen. But after reaching almost the top of the RAF tree, in one important sense he retired unfulfilled; his mettle was never tested under fire. Anyone interested to know more about flying, about the RAF, about leadership, about character even, need look no further than this beautifully crafted, immensely readable account. *Design Group Revisited* iUniverse One of Springer's Major Reference Works, this book gives the reader a truly global

perspective. It is the first major reference work in its field. Paleoclimate topics covered in the encyclopedia give the reader the capability to place the observations of recent global warming in the context of longer-term natural climate fluctuations. Significant elements of the encyclopedia include recent developments in paleoclimate modeling, paleo-ocean circulation, as well as the influence of geological processes and biological feedbacks on global climate change. The encyclopedia gives the reader an entry point into the literature on these and many other groundbreaking topics.

Get a closer look at this glittering, oil-rich city in a “revealing travelogue through the capital of the United Arab Emirates” (Publishers Weekly). Jo Tatchell first arrived in the city of Abu Dhabi as a child in 1974, when the discovery of oil was quickly turning a small fishing town into a growing international community. Decades later, this Middle Eastern capital is a dizzying metropolis of ten-lane highways and overlapping languages, and its riches and emphasis on cultural development have thrust it into the international spotlight. Here, Tatchell returns to Abu Dhabi and explores the city and its contradictions: It is a tolerant melting-pot of cultures and faiths, but only a tiny percentage of its native residents are deemed eligible to vote by the ruling

class, and the nation’s president holds absolute veto power over his advisory boards and councils. The Emirates boast one of the world’s highest GDP per capita, but the wealth inequality in its cities is staggering. Abu Dhabi’s royal family, worth an estimated \$500 billion, lives off the sweat of the city’s migrant workers, who subject themselves to danger and poverty under barely observed labor laws. But now, the city is making an international splash with a showy investment in tourism, arts, and culture—perhaps signaling a change to a more open, tolerant state. As this sparkling city surges into the future, it devotes just as much energy to concealing its past. Tatchell looks not only at history and social issues—the ancient system of tribal organization, the condition of the city’s million foreign workers, the emergence of women in Emirati society, but also her own experiences as both a child and adult in this fascinating city that has radically changed—and in other ways, stayed the same.

Since the discovery of oil in the Middle East, life has changed dramatically for 60-year-old Farah Abdullah al Matari of the United Arab Emirates. Raised in poverty in the desert, she now lives with her daughter in a spacious Abu Dhabi villa with a domestic staff. But the independent woman wants more out of life than sitting around and being waited on. Spurred on by her granddaughters, Farah begins to move away from her at home existence and into a more active lifestyle. Along the way, she gains a number of friends,

including Americans. The *Abaya Chronicles* centers on Farah, her family and her friends. The fictional account showcases a generation of women using their education and their resources to help those less fortunate, to start businesses, and to support sports and other endeavors for women. In many respects, the novel also provides an education about life in an oil-rich country.

Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources, it has also made progress diversifying into new sectors such as manufacturing, tourism, aerospace, defence, finance and logistics. In addition to its economic investments,

Abu Dhabi has also made major contributions to social welfare as well as infrastructure, which has been identified as the bedrock for future growth. The government has played a key role in the expansion of the security, aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification. Despite challenges such as a high level of regional competition, most local defence and aviation firms expect to see continued expansion for years to come. The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals. The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012, followed by construction (9.6%), manufacturing (5.9%) and real estate (4.4%).

painted in blood on multiple walls in downtown Tehran. The desecrated American flag with blood or red paint shocked her and death to the USA meant her among others. It meant all Americans! The poison and evil of the clergy, Mullahs and Immans, were palpable like a paraclete from darkness, like a paraclete from hell. The Mullahs never stopped. They pounded their chest and yelled, Allahu Akbar and death to the USA. Sandra was too young to remember what Germany was like under Hitler's spell.
