Since the financial crisis of 2008, the major governments of the world have resorted to printing large amounts of money to pay national debts and bail out banks. The warning signs are clear, and the collapse of the Zimbabwean dollar after years of rampant money printing is a frightening example of what lies in store for world economies if painful reform is not executed. *When Money Destroys Nations* tells the gripping story of the disintegration of the once-thriving Zimbabwean economy and how ordinary people survived in turbulent circumstances. Analysing this case within a global context, Philip Haslam and Russell Lamberti investigate the causes of hyperinflation and

draw ominous parallels between Zimbabwe and the world's developed economies. The looming currency crises and hyperinflation in these major economies, particularly the United States, have the potential to turn the current world order upside down. This story of how money destroys nations holds lessons that cannot be ignored.

The real story of what it takes to risk it all and go for broke. Conventional wisdom says most startups need to be in Silicon Valley, started by young engineers around a sexy new idea, and backed by VC funding. But as Mikkel Svane reveals in *Startupland*, the story of founding Zendesk was anything but conventional. Founded in a Copenhagen loft by three thirty-something friends looking to break free from corporate doldrums, Zendesk Inc. is now one of the hottest enterprise

software companies, still rapidly growing with customers in 150 countries. But its success was anything but predestined. With revealing stories both funny and frank, Mikkel shares how he and his friends bravely left secure jobs to start something on their own, how he almost went broke several times, how they picked up themselves and their families to travel across the world to California and the unknown, and how the three friends were miraculously still together for Zendesk's IPO and (still growing) success. Much like Zendesk's mission itself—to remove friction, barriers, and mystery in order to make customer service easier and more approachable—Startupland removes some of the myths about startups and startup founders. Mikkel's advice, hard-won through experience, often bucks conventional wisdom and entrepreneurial tropes. He shares why failure (whether fast or slow) is awful, why a seemingly boring product or idea can be the most exciting, why giving back to the community is as important as the bottom line. From how to hire right (look for people who are not offended by swearing) to which personas generate the highest response rates, Mikkel answers the most pressing questions from the perspective of someone still in the trenches and willing to share the hard truth, warts and all. While there are books by consultants who tell you how to build businesses, or by entrepreneurs now running billion-dollar businesses, there are few books from people still in the trenches who acutely remember the difficult daily decisions, the thrill (and fears) of the early days, the problems that scale with growing a business, and the reason why they all went on the adventure in the first place. Startupland is indispensable reading for all entrepreneurs who want to make their ideas the next big thing. The book will inspire and empower you to follow your own dream and create your own story.

The bestselling author and star of ABC's Shark Tank reveals how to master the three prongs of influence: reputation, negotiation, and relationships. Have you ever wanted to make a big change in your life but weren't sure where to start? In Powershift, Daymond John shares the answer. To take control of your destiny and drive the change you want to see, you need to lay the groundwork so you're prepared to seize every opportunity that comes your way. And that means mastering • Influence—make an impression: Develop a reputation that highlights what you stand for. • Negotiation—make a deal: Hone a win-win negotiating style. • Relationships—make a connection last: Nurture those connections you make along the way. Through never-before-told stories from his life and career, Daymond shares the lessons that got him to where he is today: from how he remade his public image as he transitioned from clothing mogul to television personality, to how he mastered the negotiation strategies that determine whether deals are won or lost “in the tank,” to his secrets for building long-lasting—and profitable—relationships with founders and brands. Throughout the book, some of the world's most successful personalities reveal how they shifted their power in meaningful ways: Kris Jenner on determining your value: “You don't have to go ask somebody else for permission. You have the power to be able to stick to your guns and demand your worth.” Mark Cuban on finding and understanding your why: “Time is the one asset we don't own, we can't buy, and we can never get back.” Pitbull on tapping into your inner power: “A lot of people feel that to be powerful is to exude strength. I think it's the total opposite. To be powerful is to be powerless. It's when you give everybody what you got.” Whether you're an innovator working to turn your big idea into a reality, a professional looking to land a major promotion, or a busy parent trying to find more time to focus on what's really important to you, Daymond shows you how to shift your power and energy towards positive change.

Why cutting up your credit cards won't make you rich A popular TV personality often says, "Take out your credit cards and cut them into pieces." While that is sound advice for people who are not financially responsible, it is inadequate advice for anyone who wants to become rich or financially free. In other words, just cutting up your credit cards will not make you rich. What does make you rich is financial education...unfortunately a type of education we do not receive in school. If a person has a solid financial education, they would know that there are two kinds of debt...good debt and bad debt. A person with a sound financial education would know how to use good debt to make them richer faster...much faster than a person who only saves money and has no debt. Rich Dad's Guide to Becoming Rich * Are you in credit card debt? * Is job security dead? * Is your financial security threatened? * Is a high-paying job the answer? * Is your money working for you? * Do you have good debt or bad debt? We all need more financial education. We need to know how to have our money work hard for us so we don't have to spend our lives working for money. That is why we need more sophisticated financial education...not oversimplified and childish financial tips such as cut up your credit cards or save more money. If you are ready to increase your financial education and enjoy your credit cards, then this book is for you.
