Transforming the School Counseling Profession John Wiley & Sons

Introduction to the Counseling Profession is a comprehensive overview of the history and foundational concepts of counseling, offering the most current and relevant breadth of coverage available. Students will gain insight into the myriad issues that surround not only the process of counseling and its many populations but also the personal dynamics that have an impact on this process. The contributed-author format provides state-of-the-art information from

experts in their respective fields while maintaining a consistent structure and message. This edition has been brought in line with the 2009 Council for the Accreditation of Counseling and Related Educational Programs (CACREP) standards and includes chapters on each of the CACREP specializations. Topics rarely treated in other introductory texts are addressed, such as research and writing in counseling, technology and counseling, and self-care and growth. This

edition includes new pedagogical features such as sidebars and more case studies to expand on key topics, as well as new chapters on: Cross-Cultural Counseling Self-Care and Self-Growth Individual Counseling Diagnosis and Treatment Planning Addictions Counseling Student Affairs and College Counseling A collection of supplemental resources are available online to benefit both instructors and students. Instructors will find PowerPoint slides and test banks to aid in conducting

their courses, and students can access chapter summaries, exercises, and other tools to supplement their review of the material in the text. These materials can be accessed at <http://www.routledge.com/cw/Capuzzi> [Orientation to the Counseling Profession + New Mycounselinglab With Pearson Etext Access Card](#) Springer Publishing Company This book was written to provide a professional resource which describes comprehensively what a

professional counselor is, what a professional counselor does, and where and when a professional counselor works. The first chapter presents a perspective on professional counseling and differentiates between professional counselors and other mental health specialists. Assumptions about professional counselors are discussed and the professional counselor is seen as a practitioner-scientist. The evolution of the counseling profession is reviewed in chapter 2

and the present-day counseling profession is described. The third chapter focuses on the professional preparation of counselors, defining issues in counselor preparation, and examining standards of preparation and accreditation. Chapter 4 reviews various theoretical models of counseling (psychoanalytic, client/person-centered, behavioral, cognitive, and affective models) and looks at counseling theory and practice. Chapters 5,

6, and 7 examine assessment and measurement, career development and counseling, and consultation, respectively. Chapter 8 focuses on research in professional counseling, providing suggestions for research designs, selection of variables and subjects, and statistical analyses. Chapter 9 examines trends in professional counseling, describing trends in both settings where professional counselors work and clientele with whom

counselors work. Professionalism in counseling is the focus of chapter 10, which is followed by the Code of Ethics adapted from the Ethical Standards of the American Personnel and Guidance Association. (NB)

A Narrative Approach
Pearson
Deconstructing Heterosexism in the Counseling Professions uses the personal narratives of lesbian, gay, bisexual, and heterosexual counseling psychologists and counselor educators to deconstruct the heterosexist discourse in the counseling professions, envision a discourse of sexual orientation equity, and make practical suggestions for

addressing sexual orientation in professional life. The narrative approach encompasses a diversity of stories and experiences including an emphasis on racial and cultural contexts. These narratives and their analyses serve as a means for the individual and collective self examination that is needed to move LGB affirmative practice, training, and scholarship from the margins to the center of what it means to be a counseling professional.
