PHOENIX LUCIANO

Europe's Crisis of Legitimacy McGraw-Hill Education (UK)

This thought-provoking book expands on the notion that Big Science is not the only term to describe and investigate particularly large research projects, scientific collaborations and facilities. It investigates the significant overlap between Big Science and Research Infrastructures (RIs) in a European context since the early twenty-first century. Contributions to this innovative book not only augment the study of Big Science with new perspectives, but also launch the study of RIs as a promising new line of inquiry.

Routledge Handbook on the European Union and International Institutions Cambridge University Press

Dr. Zachary Selden provides a detailed examination of how sanctions can and cannot be used effectively to further U.S. foreign interests. In the post-Cold War era, sanctions are becoming a frequently used tool of foreign policy, but Selden offers an important cautionary note. Sanctions are often counterproductive, and they create interest groups within the target country who have a vested interest in seeing that sanctions and the policies that brought them to bear are maintained. While sanctions aimed at capital flows can be highly effective, those aimed at trade often become the functional equivalent of a protective tariff, stimulating Import Substitution Industrialization (ISI) and creating groups of producers or suppliers who take steps in the political arena to ensure that their economic windfall is maintained. After demonstrating the ISI effects in a large sample of cases, Selden goes on to demonstrate how sanctions fueled the rise of a powerful criminal elite in Yugoslavia who sponsored extreme nationalist political figures and how sanctions were twisted to Saddam Hussein's personal benefit in Iraq. More than simply of academic interest, this study serves as a guide for the more effective use of sanctions. It will be of particular interest to scholars, researchers, and policy makers involved with American foreign and military policy.

De Gaulle and Europe Oxford University Press

This book makes a major contribution to the scholarship on internationalization in higher education by focusing on the perceptions and experiences of the academic profession in a comparative perspective. Drawing from data collected by the Academic Professions in the Knowledge-based Society (APIKS) project, the contributors to this volume are uniquely positioned to explore the impact and implications of internationalization on those who play the central role in the teaching and research functions of higher education: the professoriate. The core chapters address issues such as the roles of gender, discipline, and career stage in the international activities of academics in different countries, national differences in the perceptions and behaviors of university faculty in the internationalization of teaching, and of research within higher education systems on the perceptions and behaviors of academics. Each of these chapters draw on the existing research literature in these

thematic areas as a foundation for the systematic analysis of the international APIKS dataset to illuminate and discuss key findings. This book offers a highly original and unique contribution to the study of internationalization in higher education because its editors and contributors, as participants in the APIKS project, have been able to raise and address key research questions using comparative international empirical data on the academic profession that has never before been available. Given the tremendous importance of internationalization and the global dimension of higher education, this volume offers unique, distinctive insights on the implications of internationalization for the academic profession and the very different ways in which these transformations are understood by academics both within and between systems.

The Brussels Effect Ledizioni

This book investigates why European associations form interest coalitions, which strategies these coalitions pursue to influence the EU institutions, and how persistent they are over time. In this context, questions concerning the transparency of European decision-making are approached. The field of European energy policy serves as empirical background, providing a valuable insight into a little researched area of European politics.

Case Study Research in Practice Edward Elgar Publishing

Small States in and outside the European Union offers a broad overview of the small states problematic in Europe. It touches upon definition issues, history, security policy, neutrality, EU institutional aspects and also includes contributors from Central and Eastern European countries. It presents a thorough analysis of different scenarios for EU institutional reform and their repercussions on the influence of small member states. The comparative results are visualized in tables. The work contains several contributions from practitioners who give insight into policy games and issues of national sensitivity not usually covered by purely scholarly publications. The European environment has changed dramatically through the processes of regional integration and rising interdependence. Relations between European states both inside and outside the EU are governed as never before by rules, norms, and fixed procedures. The book investigates the consequences of these developments on the foreign and security policy of small states. Academics and professionals from Austria, Denmark, Finland, Ireland, Lithuania, Luxembourg, Slovenia, Sweden, and Switzerland, as well as from the European Commission and the Council of Ministers, elaborate on these issues. Institutional regulations and traditional power politics as well as the foreign and security policy traditions of the states concerned, including the question of neutrality, are investigated. In addition, the book identifies the main interests of small states in today's Europe and offers an overview of different strategies these states apply in the realm of foreign and security policy. The book is interesting for the case studies it offers as well as for the reflections it contains regarding fundamental questions of the essence of statehood in today's Europe.

Research Handbook on the European Union and International Organizations Cambridge University Press

Using a cross-national, quantitative study and a detailed case study of the pro-independence

Scottish National Party, demonstrates that supranational integration and subnational fragmentation are related in theoretical and predictable ways. Posits that the EU makes smaller states more viable and politically attractive by diminishing the relative economic and political advantages of larger-sized states.

The European Union and Human Rights University of Michigan Press

Case Study Research in Practice explores the theory and practice of case study research. Helen Simons draws on her extensive experience of teaching and conducting case study to provide a comprehensive and practical account of how to design, conduct and communicate case study research. It addresses questions often raised by students and common misconceptions about case research. In four sections the book covers - Rationale, concept and design of case study research - Methods, ethics and reflexivity in case study - Interpreting, analyzing and reporting the case - Generalizing and theorizing in case study research Rich with 'tales from the field' and summary memos as an aide-memoire to future action, the book provides fresh insights and challenges for researchers to guide their practice of case study research. This is an ideal text for those studying and conducting case study research in education, health and social care, and related social science disciplines. Helen Simons is Professor Emeritus of Education University of Southampton

Explaining the European Union's Foreign Policy SAGE

This volume studies the relevance of European integration for conflict settlement and conflict resolution in divided states such as Cyprus or Serbia and Montenegro.

The European Union Decides Springer

Explains why the EU interacts and intervenes beyond its borders, using case studies to present a theory of practice-driven action.

The European Union's Democracy Promotion in Central Asia Springer Nature

This Handbook addresses the increasingly contested issue of profound political importance: Europe's presence in multilateral institutions. It assesses both the evolving role of Europe in international institutions, and the transformations in international institutions themselves.

Research Methods in European Union Studies Archives contemporaines

The book examines the ways that the successful health lobbies and member states work, identifies weaknesses, and emphasizes the challenge to health policymakers.

Big Science and Research Infrastructures in Europe Ibidem Press

The European Union of today cannot be studied as it once was. This original new textbook provides a much-needed update on how the EU's policies and institutions have changed in light of the multiple crises and transformations since 2010. An international team of leading scholars offer systematic accounts on the EU's institutional regime, policies, and its community of people and states. Each chapter is structured to explain the relevant historical developments and institutional framework, presenting the key actors, the current controversies and discussing a paradigmatic case study. Each chapter also provides ideas for group discussions and individual research topics. Moving away from the typical, neutral account of the functioning of the EU, this textbook will stimulate readers' critical thinking towards the EU as it is today. It will serve as a core text for undergraduate and graduate students of politics and European studies taking courses on the politics of the EU, and those taking courses in comparative politics and international organizations including the EU.

Small States Inside and Outside the European Union Academia Press

This is volume on the EU and human rights, is based primarily on the findings of the FP7 FRAME project. Carried out by a consortium of universities and research centres, FRAME intended to provide an interdisciplinary knowledge base on EU human rights policies and their impact, producing at least 50 reports for the Commission.

Integrating Immigrants in Europe Routledge

The creation of the European Union arguably ranks among the most extraordinary achievements in modern world politics. Observers disagree, however, about the reasons why European governments have chosen to co-ordinate core economic policies and surrender sovereign prerogatives. This text analyzes the history of the region's movement toward economic and political union. Do these unifying steps demonstrate the pre-eminence of national security concerns, the power of federalist ideals, the skill of political entrepreneurs like Jean Monnet and Jacques Delors, or the triumph of technocratic planning? Moravcsik rejects such views. Economic interdependence has been, he maintains, the primary force compelling these democracies to move in this surprising direction. Politicians rationally pursued national economic advantage through the exploitation of asymmetrical interdependence and the manipulation of institutional commitments.

The European Union and the Rise of Regionalist Parties University of Michigan Press

Case Study Research: Principles and Practices aims to provide a general understanding of the case study method as well as specific tools for its successful implementation. These tools can be utilized in all fields where the case study method is prominent, including business, anthropology, communications, economics, education, medicine, political science, social work, and sociology. Topics include the definition of a 'case study,' the strengths and weaknesses of this distinctive method, strategies for choosing cases, an experimental template for understanding research design, and the role of singular observations in case study research. It is argued that a diversity of approaches - experimental, observational, qualitative, quantitative, ethnographic - may be successfully integrated into case study research. This book breaks down traditional boundaries between qualitative and quantitative, experimental and nonexperimental, positivist and interpretivist.

Changing European Academics SAGE Publications

European legislation affects countless aspects of daily life in modern Europe but just how does the European Union make such significant legislative decisions? How important are the formal decision-making procedures in defining decision outcomes and how important is the bargaining that takes place among the actors involved? Using a combination of detailed evidence and theoretical rigour, this volume addresses these questions and others that are central to understanding how the EU works in practice. It focuses on the practice of day-to-day decision-making in Brussels and the interactions that take place among the Member States in the Council and among the Commission, the Council and the European Parliament. A unique data set of actual Commission proposals are examined against which the authors develop, apply and test a range of explanatory models of decision-making, exemplifying how to study decision-making in other political systems using advanced theoretical tools and appropriate research design.

The Political Influence of Business in the European Union Cambridge University Press

Discussing the academic profession and, most importantly, its increasing stratification across Europe, *Changing European Academics* provides a panoramic view of the European academic profession and confronts misconceptions of academic work and life with compelling results and detailed analyses.

Teaching and Learning the European Union Bloomsbury Publishing

The contributors to this book are all members of EuropEos, a multidisciplinary group of jurists, economists, political scientists, and journalists in an ongoing forum discussing European institutional issues. The essays analyze emerging shifts in common policies, institutional settings, and legitimization, sketching out possible scenarios for the European Union of the 21st century. They are grouped into three sections, devoted to economics and consensus, international projection of the Union, and the institutional framework. Even after the major organizational reforms introduced to the EU by the new Treaty of Lisbon, which came into force in December 2009, Europe appears to remain an entity in flux, in search of its ultimate destiny. In line with the very essence of EuropEos,

the views collected in this volume are sometimes at odds in their specific conclusions, but they stem from a common commitment to the European construction.

Case Study Research Springer Science & Business Media

Over the years, the European Union has developed relationships with other international institutions, mainly as a result of its increasingly active role as a global actor and the transfer of competences from the Member States to the EU. This book presents a comprehensive and critical assessment of the EU's engagement with other international institutions, examining both the EU's representation and cooperation as well as the influence of these bodies on the development of EU law and policy.

Europeanization and Conflict Resolution Routledge

A discussion of the case study method which develops an integrative framework for causal inference in small-n research. This framework is applied to research design tasks such as case selection and process tracing. The book presents the basics, state-of-the-art and arguments for improving the case study method and empirical small-n research.
