Teachability and Learnability across Languages John Benjamins Publishing Company

In reviewing the international literature on this vital subject, this book examines three groups who seem most affected by unfair language practices in education: women and girls; minority cultural groups; and minority social groups.

Teaching Content and Language in the Multilingual Classroom Routledge

This book brings together research from six different countries across three continents where teacher educators and policy makers are addressing the under-preparation of content teachers to work effectively with multilingual learners. By highlighting this relatively young field of research at an international level, the book advances the research-based knowledge of the field and promotes international research relationships and partnerships to better support the education of multilingual learners and their teachers. The chapters represent high-quality empirical qualitative, quantitative, and mixed methods studies about pre-service and in-service teachers. Comprising four sections, each represents a critical aspect of the equitable teaching of multilingual learners. All the research was conducted in countries that belong to OECD (Organisation for Economic Co-operation and Development) and the PISA (Programme for International Student Assessment) enabling the reader to compare contexts and outcomes. This book will be of particular interest to academics, researchers, and post-graduate students in the fields of language education, teacher education, and education for multilingual learners. It will be of great value to anyone concerned with equity and social justice for multilingual learners whose languages, cultural practices, and resources are often overlooked and/or marginalized in the schools they attend.

Handbook of Research in Second Language Teaching and Learning John Benjamins Publishing

Defenders of threatened languages all over the world, from advocates of biodiversity to dedicated defenders of their own cultural authenticity, are often humbled by the dimensity of the task that they are faced with when the weak and the few seek to find a safe-harbour against the ravages of the strong and the many. This book provides both practical case studies and theoretical directions from all five continents and advances thereby the collective pursuit of "reversing language shift" for the greater benefit of cultural democracy everywhere.

This volume contains the proceedings of the 14th International Colloquium on Automata Languages and Programming, organized by the European Association for Theoretical Computer Science (EATCS) and held in Karlsruhe, July 13-17, 1987. The papers report on original research in theoretical computer science and cover topics such as algorithms and data structures, automata and formal

languages, computability and complexity theory, semantics of programming languages, program specification, transformation and verification, theory of data bases, logic programming, theory of logical design and layout, parallel and distributed computation, theory of concurrency, symbolic and algebraic computation, term rewriting systems, cryptography, and theory of robotics. The authors are young scientists and leading experts in these areas.

This book relates language testing practice to current views of communicative language teaching and testing. It builds on the theoretical background expounded in Bachman's Fundamental Considerations in Language Testing and examines the design, planning, and organization of tests. The book is divided into three sections which discuss 1) objectives and expectations, the context of language testing, and the abilities to be tested; 2) the process of test development, including blueprints, resources, operationalization, and scoring methods; and 3) ten examples which illustrate the principles discussed in Parts One and Two.

Until about two decades ago, the study of writing systems and their relationship to literacy acquisition was sparse and generally modeled after studies of English language learners. This situation is now changing. As the worldwide demand for literacy continues to grow, researchers from different countries with different language backgrounds have begun examining the connection between their writing systems and literacy acquisition. This text, which derives from a NATO sponsored conference on orthography and literacy, brings together the research of 70 scholars from across the world--the largest assemblage of such experts to date. Their findings are grouped into three parts, as follows: Part I, Literacy Acquisition in Different Writing Systems, describes the relationship between orthography and literacy in twenty-five orthographic systems. This section serves as a handy reference source for understanding the orthographies of languages as diverse as Arabic, Chinese, English, Icelandic, Kannada, and Kishwahili. Part II, Literacy Acquisition From a Cross-Linguistic Perspective, makes direct comparisons of literacy acquisition in English and other orthographic systems. The overall conclusion that emerges from these eight chapters is that the depth of an orthographic system does influence literacy acquisition primarily by slowing down the acquisition of reading skills. Even so, studies show that dyslexic readers can be found across all orthographic systems whether shallow or deep, which shows that dyslexia also has internal cognitive and biological components. Part III, Literacy Acquisition: Instructional Perspectives, explores literacy acquisition from developmental and instructional perspectives and ends with a look into the future of literacy research. This Handbook is appropriate for scholars, researchers, and graduate students in such diverse fields as cognitive psychology, psycholinguistics, literacy education, English as a second language, and communication disorders.

Language, Minority Education, and Gender Harmony

The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across

frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book The Way of The Linguist, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

Volume III of the Handbook of Research in Second Language Teaching and Learning, like Volumes I and II, is a comprehensive, state-of-the-art overview of current research into social contexts of second language (L2)/foreign language (FL) teaching and learning; language policy; curriculum; types of instruction; incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar; international communication; pragmatics; assessment and testing. It differs from earlier volumes in its main purpose—to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2/FL teaching and learning and applied linguistics, but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice Captures new and ongoing

developments and trends in the key areas of L2/FL teaching and learning, and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2/FL teaching and learning. Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.

Teachability and Learnability across Languages addresses key issues in second, foreign and heritage language acquisition, as well as in language teaching. Focusing on a Processability Theory perspective, it brings together empirical studies of language acquisition, language teaching, and language assessment. For the first time, a research timeline for the role of instruction in language learning is presented, showing how the field of second language acquisition (SLA) research has developed over the last four decades since Pienemann's work on learnability and syllabus construction over the 1980s. The book includes studies of child and adult second as well as foreign language acquisition research, covering a wide range of target languages including English, German, Hungarian, Japanese, Norwegian, Polish, Spanish, Swedish, and Turkish. In addition, future extensions of PT are discussed. This volume is designed for advanced students in international programs of SLA and Applied Linguistics as well as for SLA researchers and second and foreign language teachers.

Language Teachers' Professional Knowledge Landscapes is a collection of fourteen narratives from teachers of different languages, at different school levels, in different contexts across Australia. This volume brings together not simply language teacher stories, but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers' work, and their students' success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly (1996) and their notion of 'levels' of stories told by teachers about their classrooms: the secret, the sacred and the cover stories. The term 'professional knowledge landscape' is used to indicate how teachers can critically situate their work, and thereby understand it better. The collection includes the stories of two outstanding primary language educators, and a story of mixed

success in a rural program in teaching the local Aboriginal language (Ngarrabul). There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: 'What blocks language learning in Australia?' They offer the strategies which they have developed, that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example, as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers' ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning, which they then offer and extend in student learning. Consistently expressed, there is the need for teachers to take up individual responsibility, while still being strongly supported by their professional community: 'It is us' who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment, and the first volume to address the language education landscape through the voices of active language teachers.

KAT LOMB (1909-2003) was one of the great polyglots of the 20th century. A translator and one of the first simultaneous interpreters in the world, Lomb worked in 16 languages for state and business concerns in her native Hungary. She achieved further fame by writing books on languages, interpreting, and polyglots. Polyglot: How I Learn Languages, first published in 1970, is a collection of anecdotes and reflections on language learning. Because Dr. Lomb learned her languages as an adult, after getting a PhD in chemistry, the methods she used will be of particular interest to adult learners who want to master a foreign language.
