[Research in Young Children's Literacy and Language Development](#) John Wiley & Sons
 This unique volume utilizes the UNESCO Education for Sustainable Development (ESD) framework to illustrate successful integration of sustainability education in post-secondary foreign language (FL) learning. Showcasing a variety of approaches to using content-based instruction (CBI) in college-level courses, this text valuably demonstrates how topics relating to environmental, social, and cultural dimensions of sustainability can be integrated in FL curricula. Chapters

draw on case studies from colleges throughout the US and consider theoretical and practical concerns relating to models of sustainability-based teaching and learning. Chapters present examples of project-, problem-, and task-based approaches, as well as field work, debate, and reflective pedagogies to enhance students' awareness and engagement with sustainable development issues as they acquire a foreign language. Insights and recommendations apply across languages and highlight the potential contribution of FL learning to promote sustainability literacy amongst learners. This text will benefit researchers, academics, and educators in higher education with an interest in Modern Foreign Languages,

sustainability education, training, and leadership more broadly.

Going for the Rain Oxford University Press, USA

Co-authored by a novelist and a scholar, *Speaking of Writing* follows four college students from diverse backgrounds as they face the challenges of reading, writing, and critical thinking in first-year composition classes and across the disciplines. Each chapter engages students in relatable, often humorous scenarios that focus on key challenges. Through its story-based approach, this brief rhetoric enacts process-based pedagogy, showing student writers grappling with fundamental questions: How can I apply my own strategies for success to new assignments? How can I maintain my own voice when asked to compose in an academic style? What do college professors mean by a thesis? Why is my argument weak, and how can I make it stronger? The book vividly dramatizes a draft-and-revision process that includes instructor feedback, peer review, and

careful research.

The Developing Core Literacy Proficiencies program is an integrated set of English Language Arts/Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards (CCSS). Reading Closely for Textual Details Making Evidence-Based Claims Making Evidence-Based Claims about Literary Technique (Grades 9-12) Researching to Deepen Understanding Building Evidence-Based Arguments The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way.

Knowledge: The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time, but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. **Literacy Skills:** The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from “making inferences” to “reflecting critically.” Students focus on this set of twenty skills throughout the year and program, continually applying them in new and more sophisticated ways. **Academic Habits:** The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as “preparing” and “completing tasks” that are essential to students’ success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system, centered around the literacy skills and academic habits, allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels.

This work shows that being literate

requires more than functional literacy, the recognition of printed words as meaningful. It requires the knowledge of how to use language as a tool for analysing, synthesizing, and integrating what is heard or read in order to arrive at new interpretations.

Leading English in the Primary School is a comprehensive guide for both aspiring and experienced leaders of primary English. It supports you in navigating your way through the role and offers practical guidance to help you develop a clear understanding of how to improve the teaching of English in your school. Written by experts with extensive experience of both leadership and the primary classroom, it explores skills required for effective subject leadership while continually considering the specific implications for English. With action and reflection points throughout the book, it offers a detailed introduction to: the role of the English subject leader implementing strategy and vision adapting to new educational policy methods for leading teaching and learning how and why leaders evaluate and monitor progress contemporary changes to the curriculum. Rich case studies reveal how schools lead English in practice and provide real-life examples of English subject leaders’ decision-making processes and actions. Grounding the subject leader role in the current curriculum, *Leading English in the Primary School* is a source of advice, support and inspiration for all professionals embracing the complex, challenging, yet fulfilling role of Primary English Leader.

How to Develop Power and Personality in Speaking John Benjamins Publishing

This book brings together multiple theoretical perspectives and disciplinary approaches to study the acquisition and development of written language by children as well as the implications for teaching and learning of writing practices in a variety of languages and cultural contexts. Chapters in this contributed volume present both theoretical contributions and results of research carried out with students and teachers from 11 countries (Belgium, Brazil, Chile, Israel, Italy, Mexico, the Netherlands, Portugal, Spain, UK and USA) who speak seven different languages: Portuguese, Spanish, English, Italian, French, Dutch and Hebrew. By bringing together research developed in diverse cultural contexts it enriches the debates in the interdisciplinary field of writing studies by

analyzing a wide range of topics at the interface between research and educational implications for the teaching and learning of writing by children. The book consists of five parts, each one addressing a specific set of topics. Part I presents studies on topics related to written language representation systems (phonological and morphological awareness) and on the relationship between grammar and the quality of texts of different genres. Part II includes studies related to compositional processes of writing texts, and the factors involved in these processes. Part III focuses on the difficulties faced by students during the acquisition and development of writing. Part IV is dedicated to chapters that discuss and compare writing practices in different social environments. Finally, chapters in part V deal with teaching and learning of writing in the school setting.

Development of Writing Skills in Children in Diverse Cultural Contexts: Contributions to Teaching and Learning will be of interest to researchers and students in the fields of psychology, education and linguistics, as well as to other social scientists in the broader interdisciplinary field of writing studies.

The Elements of Grammar McGraw-Hill Education (UK)

Writing plays a key role in society. Yet, many children struggle in learning to write, and often this is related to difficulties in the development of their oral-language skills. For students with oral language difficulties text production is particularly challenging, yet there have been few attempts to consider the impact of different oral language problems on the production of written text. This book focuses on the relationship between oral language problems and writing problems for children with hearing loss, those with oral-language difficulties and those with dyslexia. The causes and nature of their writing problems are examined by experts in the fields. Authors from three continents and nine countries contributed their research to extend our understanding of the problems that these children face. The collection provides timely information across languages and countries, enhancing our understanding of the links between oral language problems and writing, informing both writing assessment and intervention.

Learning-to-write and Writing-to-learn in an Additional Language Psychology Press

This volume brings together work by scholars with backgrounds in linguistics, psycholinguistics, developmental psychology, education, and language

pathology. As such, the book adds psycholinguistic and crosslinguistic perspectives to the clinical and classroom approaches that have dominated the study of “later language development”. Incorporating insights from prior language acquisition research, it goes beyond preschool age to consider both isolated utterances and extended discourse, conversational interactions and monologic text construction, and both written and spoken language use from early school-age across adolescence. Data from French, Hebrew, Spanish, and Swedish as well as English cover varied domains: morphology and lexicon, syntax and verb-argument structure, as well as peer interaction, spelling, processing of on-line writing, and reading poetry. The epilogue suggests explanations for the findings documented. Across the book, the authors show how cognitive and social maturation combines with increased literacy in the path taken by schoolchildren and adolescents towards the flexible deployment of a growing repertoire of lexical elements in varied morpho-syntactic constructions and different discourse contexts that constitutes the hallmark of maturely proficient language use.

For undergraduates following any course of study, it is essential to develop the ability to write effectively. Yet the processes by which students become more capable and ready to meet the challenges of writing for employers, the wider public, and their own purposes remain largely invisible. *Developing Writers in Higher Education* shows how learning to write for various purposes in multiple disciplines leads college students to new levels of competence. This volume draws on an in-depth study of the writing and experiences of 169 University of Michigan undergraduates, using statistical analysis of 322 surveys, qualitative

analysis of 131 interviews, use of corpus linguistics on 94 electronic portfolios and 2,406 pieces of student writing, and case studies of individual students to trace the multiple paths taken by student writers. Topics include student writers’ interaction with feedback; perceptions of genre; the role of disciplinary writing; generality and certainty in student writing; students’ concepts of voice and style; students’ understanding of multimodal and digital writing; high school’s influence on college writers; and writing development after college. The digital edition offers samples of student writing, electronic portfolios produced by student writers, transcripts of interviews with students, and explanations of some of the analysis conducted by the contributors. This is an important book for researchers and graduate students in multiple fields. Those in writing studies get an overview of other longitudinal studies as well as key questions currently circulating. For linguists, it demonstrates how corpus linguistics can inform writing studies. Scholars in higher education will gain a new perspective on college student development. The book also adds to current understandings of sociocultural theories of literacy and offers prospective teachers insights into how students learn to write. Finally, for high school teachers, this volume will answer questions about college writing. The volume heads off with an extensive introduction "Studying writing and writing acquisition today: A multidisciplinary view."

A PRACTICAL COURSE FOR DEVELOPING WRITING SKILLS IN ENGLISH Routledge

The manner in which people have been talking and writing about 'development' and the rules according to which they have done so have evolved over time. Development Discourse and Global History uses the archaeological and genealogical methods of Michel Foucault to trace the origins of development discourse back to late colonialism and notes the significant discontinuities that led to the establishment of a new discourse and its accompanying industry. This book goes on

to describe the contestations, appropriations and transformations of the concept. It shows how some of the trends in development discourse since the crisis of the 1980s – the emphasis on participation and ownership, sustainable development and free markets – are incompatible with the original rules and thus lead to serious contradictions. The Eurocentric, authoritarian and depoliticizing elements in development discourse are uncovered, whilst still recognizing its progressive appropriations. The author concludes by analysing the old and new features of development discourse which can be found in the debate on Sustainable Development Goals and discussing the contribution of discourse analysis to development studies. This book is aimed at researchers and students in development studies, global history and discourse analysis as well as an interdisciplinary audience from international relations, political science, sociology, geography, anthropology, language and literary studies. The SAGE Handbook of Writing

Development John Benjamins Publishing Company

Speaking and listening are key elements of the primary English National Curriculum; they are also fundamental to children's language development and learning. The need for teachers to develop children's talk in its own right and also to use talk as a means of learning is central to effective primary practice, yet it is an area in which teachers often have little confidence. The contributors offer creative and practical advice on teaching speaking and listening from the early years through Key Stages 1 and 2, underpinned by theory into the approach. --from publisher description.

Handbook of Writing Research

Routledge

Using Comic Art to Improve Speaking, Reading and Writing uses children's interest in pictures, comics and graphic novels as a way of developing their creative writing abilities, reading skills and oracy. The book's underpinning strategy is the use of comic art images as a visual analogue to help children generate, organise and refine their ideas when writing and talking about text. In reading comic books children are engaging with highly complex and structured narrative forms. Whether they realise it or not, their

emergent visual literacy promotes thinking skills and develops wider metacognitive abilities. Using Comic Art not only motivates children to read more widely, but also enables them to enjoy a richer imagined world when reading comics, text based stories and their own written work. The book sets out a range of practical techniques and activities which focus on various aspects of narrative, including: using comic art as a visual organiser for planning writing openings and endings identifying with the reader, using different genres and developing characters creating pace, drama, tension and anticipation includes 'Kapow!' techniques to kick start lessons an afterword on the learning value of comics. The activities in Using Comic Art start from this baseline of confident and competent comic-book readers, and show how skills they already possess can be transferred to a range of writing tasks. For instance, the way the panels on a comic's page are arranged can serve as a template for organising paragraphs in a written story or a piece of non-fiction writing. The visual conventions of a graphic novel – the shape of speech bubbles or the way the reader's attention is directed – can inform children in the use of written dialogue and the inclusion of vivid and relevant details. A creative and essential resource for every primary classroom, Using Comic Art is ideal for primary and secondary school teachers and TAs, as well as primary PGCE students and BEd, BA Primary Undergraduates. *The Way of the Linguist* Routledge This volume integrates complex dynamic systems theory (CDST) and L2 writing scholarship through a collection of in-depth studies and commentary across a range of writing constructs, learning contexts, and second and foreign languages. The text is arranged thematically across four topics: (i) perspectives on complexity, accuracy, and fluency, (ii) new constructs, approaches, and domains of L2-writing scholarship, (iii) methodological issues, and finally (iv) curricular perspectives. This work should appeal to graduate students and academics interested in expanded discussions on CDST, highlighting its utility for theorizing and researching language change, and to L2 writing scholars curious about how this fresh approach to researching L2 development can inform understandings of how L2 writing develops. As a CDST approach to language change has matured and taken a place among the dominant epistemologies in the field, students and researchers of L2 development alike will benefit from this volume.
