ADRIENNE JOSIE

The Complete Story De Gruyter Mouton

The collection provides insights on developments in post-traditional religiosity (especially 'New Age' and 'Neo-Paganism') through studies of rave's Gnostic narratives of ascensionism and re-enchantment, explorations of the embodied spirituality and millennialist predispositions of dance culture, and investigations of transnational digital-art countercultures manifesting at geographic locations as diverse as Goa, India, and Nevada's Burning Man festival. Contributors examine raving as a new religious or revitalization movement; a powerful locus of sacrifice and transgression; a lived bodily experience; a practice comparable with world entheogenic rituals; and as evidencing a new Orientalism. Rave Culture and Religion will be essential reading for advanced students and academics in the fields of sociology, cultural studies and religious studies.

Techno and New Age as Transnational Countercultures in Ibiza and Goa Motorbooks International
 Public health professionals, field epidemiologists, health management workers and health policymakers are increasingly concerned about the potential impact that climate change can have on public health. Climate not only determines the spatial and seasonal distribution of many public health events, such as infectious diseases, health outcomes of disasters and nutrition, but also is a key determinant of extreme heat waves and storm events that result in large impacts on morbidity and mortality. However, few public health professionals are aware of the ways in which climate information may help them manage the impacts of climate on their disease surveillance and control activities, as well as program implementation and evaluation. Climate Information for Public Health Action fills an identified knowledge gap for health policy makers and practitioners (along with climate service providers) in exploring why, when and how climate information can and should be incorporated into health decision-making. Drawing together contributions from a range of key thinkers in the field, this volume will focus on three climate sensitive health outcome areas: infectious disease, hydrometeorological disasters, and nutrition. Targeting a technical professional public health community involved in developing policy and/or ensuring good practice related to climate sensitive health outcomes, this book will be written in an accessible, informative style using the highest technical and scientific standards. It will also be a valuable resource for students and academics studying and working in the emerging field of environment and health.

Genuine Mileage on Classic Motorcycles HarperCollins

Royal Enfield's famous motor - 'made like a gun' - hints at the factory's origins, but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production. In addition, its famous Bullet can claim the longest motorcycle production run of all time. Greg Pullen charts the rise, fall and rise again of Royal Enfield, from the company's pre-motorcycle beginnings in Redditch, through the impact of two World Wars, the importance of exports to India and subsequent establishment of factories there, to changes in ownership, recently launched models and new concept bikes for the future. With 190 colour photographs, this book includes: the V-twins, from the 1930s K and KX range to a glimpse of the concept V-twin shown in 2018; the singles, from 2-strokes to side-valve 4-strokes, and the ohv version that first used the Bullet name, through to the new singles built in India. The British Bullet: its arrival in 1948 and production in the UK, the original orders from India and subsequent setting up of production there are discussed. The 250s, (1958-68), including the Turbo Twins, and the big twins, from the 1948 500 Town to the final interceptor in 1970, including the 800cc prototype and the Clymer Indians are covered. The new twins: the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed. Competition success is covered, with notable ISDT achievements, star rider Johnny Brittain and racing the big twins, and Geoff Duke in the GP5. Finally, the British factories and the new

opportunities with the Indian factories are remembered.

A Route and Planning Guide to Asia, Africa and Latin America Lost Classics Book Company
 This book focuses on the latest genome sequencing of the 25 wild *Oryza* species, public and private genomic resources, and their impact on genetic improvement research. It also addresses the untapped reservoir of agronomically important traits in wild *Oryza* species. Rice is a model crop plant that is frequently used to address several basic questions in plant biology, yet its wild relatives offer an untapped source of agronomically important alleles that are absent in the rice gene pool. The genus *Oryza* is extremely diverse, as indicated by a wide range of chromosome numbers, different ploidy levels and genome sizes. After a 13-year gap from the first sequencing of rice in the 2002, the genomes of 11 wild *Oryza* species have now been sequenced and more will follow. These vast genomic resources are extremely useful for addressing several basic questions on the origin of the genus, evolutionary relationships between the species, domestication, and environmental adaptation, and also help to substantiate molecular breeding and pre-breeding work to introgress useful characters horizontally from wild species into cultivated rice.

Four Decades of Motorcycle Tales and Musings from the Pages of Cycle World Springer
 Intensified agrarian and industrial activity has led to earth's soil and groundwater resources becoming polluted with hazardous materials. Bioremediation delivers a green technology using dynamics of living organisms, typically bacteria, fungi, microalgae and also plants to eliminate contaminants from ecosystem. This biological know-how is not only cost-effective compared to conventional physico-chemical approaches, but also very successful and is being employed in the field. This book focuses on important issues for several critical and common environmental pollutants, resulting in a compilation having recent updates on the bioremediation applications towards green and clean environment. This volume also describes updates on various novel approaches of bioremediation including nanotechnology, rhizomicrobiome technology, composting, metagenomics, and biosurfactants-based bioremediation. This volume is a resource for researchers, environmentalists, professionals and policy makers.

Black Rice Trail Blazer Publications

Plant diseases play an important role on our daily lives. Most of plant diseases are visible and are caused by biotic and/or abiotic factors. Symptoms are usually the results of a morphological change, alteration or damage to plant tissue and/or cells due to an interference of the plant's metabolism. All basic structures of vascular plants are subject to attack by pathogens. The failure in accurate disease diagnosis and management may lead to huge losses in plant production and related commodities, which causes nutritional food scarcity. Typically, the appearance of a biotic symptom will indicate the relatively late stage of an infection and/or colonization of a pathogen. Expert detection, accurate diagnosis, and timely management play a significant role in keeping plants free from pathogens. In this book expert scholars share their research knowledge and key literature which are vital toward the diagnosis of plant diseases across the globe, addressing traditional plant pathology techniques, as well as advanced molecular diagnostic approach.

Research, History and Development Woodslane Press

Ever met someone who has actually been to Timbuktu and back... on a motor bike? Alan Roberts rode a motor bike through Timbuktu and all through Africa, Asia and the Middle East over the course of two years. Experience first-hand the incredible adventures Roberts experienced as he travelled through exotic locations, finding love, friendship and adventure. Riding "The Mothership" a Honda Africa Twin 750cc motorbike some 102,000 kilometres through 50 countries across four continents he finds maggots growing in his leg, he ends up on the floor of a police station in Angola with Malaria. From London to Cape Town via the Sahara and through East Africa to Yemen; then to Central Asia, Russia, Mongolia and China before heading to South East Asia with a detour to ride the Abu Dhabi Desert Challenge rally in Dubai.

Royal Enfield Springer

Whether readers are traveling by 4WD or camel, this acclaimed guide covers all aspects Saharan and includes 10,000 miles of itineraries in Morocco, Mauritania, Libya, Mali, Tunisia, Algeria, Niger, Chad, and Egypt.

Rhizomicrobiome Dynamics in Bioremediation Routledge

This book focuses on the taxonomic diversity of the genus *Tuber* as economically important truffles. In contributions by internationally respected scientists, it examines truffle systematics, interactions with abiotic and biotic environments, strategies for spore dispersal, and molecular processes in truffles. Topics discussed include: evolutionary theories and phylogeny of *Tuber* species from Asia, Europe and North-America; the influence of climate on the natural distribution of *Tuber* species and fruiting body production, soil characteristics and vegetation in natural habitats; tools for tracing truffles in soil, host diversity, truffle inhabiting fungi and truffle-associated bacteria; and the relationships of small mammals and wild boars with truffles, as well as the smell of truffles. This book offers a valuable reference guide for all researchers working in the fields of mycology, ecology and the soil sciences, and will also be useful for farmers and foresters interested in truffle cultivation worldwide.

Annual Report 2021-22 Springer Nature

This book examines the role of the El Niño Southern Oscillation (ENSO) in society. Throughout human history, large or recurrent El Niños could cause significant disruption to societies and in some cases even contribute to political change. Yet it is only now that we are coming to appreciate the significance of the phenomenon. In this volume, Richard Grove and George Adamson chart the dual history of El Niño: as a global phenomenon capable of devastating weather extremes and, since the 18th century, as a developing idea in science and society. The chapters trace El Niño's position in world history from its role in the revolution in Australian Aboriginal Culture at 5,000 BP to the 2015-16 'Godzilla' event. It ends with a discussion of El Niño in the current media, which is as much a product of the public imagination as it is a natural process.

Lost in the Valley of Death Agro Environ Media, Publication Cell of AESA, Agriculture and Environmental Science Academy,

The studies in this book represent the rich, diverse and substantial research being conducted today in the linguistics of Mainland Southeast Asia. The chapters cover a broad scope. Several studies address questions of language relatedness, often challenging conventional assumptions about the status of language contact as an explanatory factor in accounting for linguistic similarities. Several address the question of Mainland Southeast Asia as a linguistic area, exploring new ways to imagine and define the boundaries, and indeed the boundedness, of a Mainland Southeast Asia area. Two contributions rethink the received notion of the 'sesquyllable' with new empirical and theoretical angles. And a set of chapters explores topics in the morphology and syntax of the region's languages, sometimes challenging orthodox assumptions and claims about what a typical language of Mainland Southeast Asia is like. Written by leading researchers in the field, and with a substantial overview of current knowledge and new directions by the volume editors N. J. Enfield and Bernard Comrie, this book will serve as an authoritative source on where the linguistics of Mainland Southeast Asia is at, and where it is heading.

The End of Desertification? Crowood Press UK

This volume provides basic information about managing wild bees and on the use of their products. It identifies and describes major bee species and their importance for nature conservation and for sustaining livelihoods of rural people. Bee products are considered at both subsistence and commercial level, and particular attention is given to the potential for further development of managing wild bee species in developing countries. The role of bees for pollination of crops and the impact of managing bees on forestry and farming are presented. Wild-bee keeping techniques, honey production and marketing, and the international trade in bee products are described with further references and sources of additional information given. Using this publication, readers will better understand the complexities and opportunities for developing apiculture by rural livelihoods. Also published in French.

Adventure Motorcycling Handbook CRC Press

The firm of Royal Enfield was one of the best-known names of the British motorcycle industry, but curiously its products have never received the adulation bestowed on the products of Triumph, BSA and others. In this complete history, top motorcycle authority Mick Walker shows that there was, in fact, much for the Redditch-based firm to be proud of, in the shape of good-looking, innovative machines that inspired a generation. And what other company can boast a model still in popular production sixty years after its launch? Topics covered include: ,Complete history of Royal Enfield, including Enfield India, Numerous specifications, Royal Enfields in competition About the Author: Mick Walker started his own business, Mick Walker Motorcycles, in 1969 and was a leading race sponsor during the 1970s. In 1994 he formed Mick Walker Racing, following the death of his son Gary at Brands Hatch that year. The team has achieved no fewer than five British Championship wins.

Sahara Overland Longman Publishing Group

This book should be read by anyone still holding back from taking a risk and pursuing their dreams. When her conventional life fell apart, Jacqui Furneaux responded in a way that surprised many. Her random global wanderings for seven years stride an apparently obsolete motorcycle brought beauty, friendship, laughter, and romance on the road; when she wasn't fending off amorous sea-dogs or facing some other adversity with quiet courage.

Practical guide for anyone planning a long-distance motorcycling trip. Choosing, preparing and equipping a motorbike, documentation and shipping, life on the road, trans-continental route outlines: Asia, Africa & Latin America. Updated and now in full colour, this best-seller has been in print for almost 30 years.

Royal Enfield Routledge

The compliance of this book is helpful for academicians, researchers, students, as well as other people seeking the relevant material in current trends of studies on the topic of environmental degradation.

Triumph Bonneville Springer

"By patient accumulation of anecdote and detail, Rustad evolves Shetler's story into something much more human, and humanly tragic, into a layered inquisition and a reportorial force....suffice it to say Rustad has done what the best storytellers do: tried to track the story to its last twig and then stepped aside." —New York Times Book Review In the vein of Jon Krakauer's *Into the Wild*, a riveting work of narrative nonfiction centering on the unsolved disappearance of an American backpacker in India—one of at least two dozen tourists who have met a similar fate in the remote and storied Parvati Valley. For centuries, India has enthralled westerners looking for an exotic getaway, a brief immersion in yoga and meditation, or in rare cases, a true pilgrimage to find spiritual revelation. Justin Alexander Shetler, an inveterate traveler trained in wilderness survival, was one such seeker. In his early thirties Justin Alexander Shetler, quit his job at a tech startup and set out on a global journey: across the United States by motorcycle, then down to South America, and on to the Philippines, Thailand, and Nepal, in search of authentic experiences and meaningful encounters, while also documenting his travels on Instagram. His enigmatic character and magnetic personality gained him a devoted following who lived vicariously through his adventures. But the ever restless explorer was driven to pursue ever greater challenges, and greater risks, in what had become a personal quest—his own hero's journey. In 2016, he made his way to the Parvati Valley, a remote and rugged corner of the Indian Himalayas steeped in mystical tradition yet shrouded in darkness and danger. There, he spent weeks studying under the guidance of a sadhu, an Indian holy man, living and meditating in a cave. At the end of August, accompanied by the sadhu, he set off on a "spiritual journey" to a holy lake—a journey from which he would never return. Lost in the Valley of Death is about one man's search to find himself, in a country where for many westerners the path to spiritual enlightenment can prove fraught, even treacherous. But it is also a story about all of us and the ways, sometimes extreme, we seek fulfillment in life. Lost in the Valley of Death includes 16 pages of color photographs.

Environment and Climate-smart Food Production Veloce Publishing Ltd

The first reference to demonstrate how birds survive the high-altitude Central Asian Flyway and the threats to this unique migration.

Rave Culture and Religion Springer

The main purpose of this book is to introduce black rice to a wider circle of people. Although there have been research on different aspects of black rice, the information is scattered and not easily accessible to laypersons. The book intends to cover all the aspects of black rice from research, history, to its development. As such, the book will be suitable for both rice researchers and non-professionals who want to know more about this unique rice crop. Black rice, also known as forbidden rice, is packed with high level of nutrients and antioxidants. The antioxidants found in black rice is higher than the blueberries (that contain highest amount of anthocyanins). Black rice is black due to anthocyanin content in the outer layer of its kernel. Legend tells that this rice was consumed only by royals in China and it was expected that this rice would increase life span of the king. Consumption of black rice without approval was hanged. Ordinary individuals were not allowed to consume black rice. Thus this rice is also known as forbidden rice and Emperor's rice. Now this black heirloom rice is widely available in different parts of the world. Researchers have found that black rice reduce Reactive Oxygen Species (ROS), the free radicals produced in the body which is the cause of many diseases. This rice also reduce diabetes, inflammation, heart attack, allergy and obesity; reduce the growth of cancer, improves digestive system and is panacea of many health problems. Thus this rice is also known as long life rice. Food nutritionists consider black rice as modern super foods. The cultivation method of black rice is similar to general rice cultivation practices. There are many varieties available in black rice which is of different Asian origin but Chinese black rice is the most famous among them. Black rice has a wide range of applications because its bran is used as a natural food colouring dye, and it is also used to prepare noodles, pasta, porridge, wine etc. This rice takes slightly longer time to cook than widely available white rice. In modern era, black rice serve as one of the best food materials available to us to maintain our health with regular physical exercise.

Disputing Environmental Change in the Drylands Springer Nature

Steve Wilson's long-running "Down the Road Apiece" column in *Classic Bike Guide* is a favorite among enthusiasts. This witty and delightful volume presents two dozen of Wilson's very best articles, highlighted by Nick Ward's meticulously detailed drawings. Read about the author's own journeys to Portugal, to the Shetlands, and from Sweden to Holland, plus the inside story of the boom, decline, and fall of the British motorcycle industry. A nostalgic treat for enthusiasts of classic motorcycling.
