A trusted person-centred resource to start you on the path to professional success *Fundamentals of Nursing and Midwifery* is a popular foundational nursing text specifically developed for Australian and New Zealand students. This comprehensive resource provides a detailed overview of key information with person-centred care highlighted throughout to focus on the individualistic, interactive and holistic nature of nursing and midwifery practice. It uses accessible language that introduces students to the 'why' as well as the 'how' of nursing and midwifery. It focuses not only on a person's physical healthcare needs, but also on the intellectual, emotional, sociocultural and spiritual aspects of care. In this way, students learn to be holistic health care professionals while acquiring the foundational knowledge, procedures and skills required for successful nursing or midwifery practice.

Principles of Teaching and Learning for Nursing Practice Jones & Bartlett Learning

Now in its Second Edition, this textbook prepares students to work as nursing assistants in long-term care, acute care, and home health care settings, and provides a firm foundation for advancement to an LPN and ultimately an RN role. The book is written in a direct, conversational writing style with an emphasis on professionalism and humanism. This edition is significantly updated and has new photographs and illustrations. A front-of-book CD-ROM

includes an audio glossary. An audiobook version of the entire text in MP3 format is available as a separate purchase. A student-edition DVD, containing selected procedures from Lippincott's Video Series for Nursing Assistants, is also available as a separate purchase.

A Case-Based Approach Springer

The researchers report on a three-week study in a busy unit of a large American hospital on the effect of a standardized teaching plan, using the Visual Analog Pain Scale, used by staff nurses to teach patients about pain management. The authors trained the seventeen nurses working in the specialty unit on how to use the pain management standardized teaching plan, and the staff nurses conveyed the pain management information to patients according to plan. The authors discuss the effects on patients' understanding of pain management. The authors recommend replicating the study over a longer period and confining the patient sample to patients able to understand the standardized teaching, excluding infants, toddlers, some nursing home patients, and possibly Hispanic patients using an interpreter. An appendix includes the visuals used in the pain management teaching plan.

Mastering Concept-Based Teaching E-Book Wolters kluwer india Pvt Ltd
Teaching in Nursing, 4th Edition is the only nursing text to address all three components of education -- teaching, curriculum, and evaluation.

Comprehensive guidelines help you meet the day-to-day challenges of teaching, including curriculum development, the diversity of student learning styles, and developing and using classroom tests. This edition has been updated with information on the

latest trends in education including new information on the use of simulations to facilitate learning, the latest on competency-based and concept-focused curricula, developing learner-centered courses, and more. Edited by expert nursing educators Diane M. Billings and Judith A. Halstead, *Teaching in Nursing* is a past winner of the AJN Book of the Year award, and is an excellent resource for nurses preparing to take the Certified Nurse Educator (CNE) Exam. The only nursing resource to cover teaching, curriculum, and evaluation of students -- the three essential components of nursing education. Contributing authors are nationally recognized scholars in their fields of expertise. Models of teaching are used to demonstrate clinical teaching, teaching in interdisciplinary setting, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Teaching strategies promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations. Evidence-based teaching boxes explain how to practice and apply evidence-based teaching, with implications for faculty development, administration, and the institution. End-of-chapter summaries let you draw conclusions based on the chapter content. Open-ended application questions at the end of each chapter are ideal for faculty-guided discussion and online education. Up-to-date research looks ahead to the needs of the future.

[Nurse as Educator](#) Lippincott Williams & Wilkins

This market-leading textbook offers an engaging format and clear writing style that make it easy to master the basic nursing concepts and skills you need to practice in a variety of care settings. Its

nursing process framework, health promotion focus, emphasis on critical thinking, and thorough coverage of communication and patient teaching provide a strong foundation for your nursing education. Lesson Plan Template Nursing This "How To" book is different. Unlike every other book you'll read with titles like "How To Craft The Perfect Lesson Plan in 165 Incredibly Simple Steps", this book is different. It's a simple "How To" guide for creating a lesson plan that's right for you and your students and also an easy to follow workbook. We'll discuss what exactly a lesson plan is and why you even need one. We'll then go on to look at the process for creating a lesson plan, including the questions you need to consider (so that you don't forget anything important!) Then we've got 60 lesson plan templates for you to follow, with a double-page layout so that you have plenty of space for all your notes. We've even included some 'Further Notes' pages at the back for anything else you need to jot down. Teaching students of any age is both a challenging and daunting prospect. With a well-thought-out lesson plan in place (anticipating the questions you'll face AND the answers) it will be much less daunting and much more exciting. Good luck! MollyNurseThink for Nurse Educators Success Manual NurseThink for Nurse Educators: Success Manual was built with the knowledge and expertise of seasoned nurse educators with decades of teaching experience. This manual is intended to address the needs of the neophyte as well as the experienced nursing faculty based on

the most commonly requested topics of nurse educators. This includes curriculum, student success and retention, and assessment and evaluation methods. It is packed with evidenced-based information, personal experiences, and take-and-go tools to make your job easier. Curriculum Development in Nursing Education This book presents a review of, and ways of applying, major transcultural nursing (TCN) models and assessment tools in nursing education, practice, and administration. A textbook for BSN and MSN levels, it features case studies, care plans, initial role playing exercises and implications of TCN concepts when planning, implementing and evaluating client care. NCLEX-type

questions/answers are provided per model. Content mirrors AACN curricular guidelines for health care models. The Art and Science of Person-Centered Care John Wiley & Sons

This book is designed as a safety and health primer for individuals in the educational, workplace, and public sectors. If you are a safety education instructor, environmental health instructor, or occupational safety and health instructor, this may be the book you're looking for. Other professionals who should consider using this text include industrial firefighters, industrial engineers, safety engineers, respirator users, asbestos removers, lead-based paint and hazardous waste removers, chemical workers, and human resource managers.

Fundamentals of Nursing & Midwifery Psychology Press

Based on the belief that older people have good stories to tell, *Story Writing in a Nursing Home* was developed as part of a volunteer teaching service to a nursing home. Graduate students who

were learning to teach this special population conducted story writing activities with older adults and found that even the frail elderly who are confined to nursing centers provided a unique perspective about events that emphasize the lasting verities in life. The idea of a patchwork was derived from one of the lessons taught and was suggested by one of the older participants who said, "We're sort of like a patchwork quilt." The information, memories, and humor the elderly see in situations is worth recording. In addition, *Story Writing in a Nursing Home* emphasizes the way to develop the mental stimulation that is so important for physical well being. This sensitive and insightful book provides a lesson plan outline and the type of content that was used as an example. It also provides a running commentary in the form of a diary that tells how to begin a teaching program for nursing center residents. Students and professionals interested in implementing a similar program can use these ideas for planning and for organizing the use of student help to better serve the population. Fascinating reading, this book includes stories by frail elderly people, lesson plans, tips on working with administrators in a nursing center, and reasons for providing instruction. Teachers, volunteers, librarians, gerontology/sociology students, and others concerned with the well-being of the elderly will refer often to this instructive volume.

Nursing Care Planning Made Incredibly Easy! Jones & Bartlett Learning

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in

America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

A Guide for Nurse Educators Lippincott Williams & Wilkins

Praise for *Educating Nurses* "This book represents a call to arms, a call for nursing educators and programs to step up in our preparation of nurses. This book will incite controversy, wonderful debate, and dialogue among nurses and others. It is a must-read for every nurse educator and for every nurse that yearns for nursing to acknowledge and reach for the real difference that nursing can make in safety and quality in health care." —Beverly Malone, chief executive officer, National League for Nursing "This book describes specific steps that will enable a new system to improve both nursing formation and patient care. It provides a timely and essential element to health care reform." —David C. Leach, former executive director, Accreditation Council for Graduate Medical Education "The ideas about caregiving developed here make a profoundly philosophical and intellectually innovative contribution to medicine as well as all healing professions, and to anyone concerned with ethics. This groundbreaking work is both paradigm-shifting and delightful to read." —Jodi Halpern, author, *From Detached Concern to Empathy: Humanizing Medical Practice* "This book is a landmark work in professional education! It is a must-read for all practicing and aspiring nurse educators, administrators, policy makers, and, yes, nursing students." —Christine A. Tanner, senior editor, *Journal of Nursing Education* "This work has profound implications for nurse executives and frontline managers." —Eloise Balasco Cathcart, coordinator, Graduate Program in Nursing Administration, New York

Curriculum Development in Nursing Education, Second Edition continues its dedication to the advancement of nursing education, and in particular, to the ongoing development of relevant yet dynamic nursing education curricula. This Second Edition offers current, accessible, and comprehensive tips and tools and incorporates a balance of theoretical perspectives and practical applications. The Second Edition has been completely revised and updated and includes an expanded focus on developing a context-relevant curriculum. A major determinant in any nursing education curriculum is the context in which the curriculum is developed and offered. This context is the professional, societal, health care, and educational situations to which the curriculum must respond, and is what makes each school's curriculum unique. Curriculum Development in Nursing Education helps nurse educators create a program of study that will meet the contextual needs of their individual setting. What's New: Expanded focus on developing a context-relevant curriculum New sections on educational technologies, distributed learning, and curriculum evaluation. New chapters on preparing for external program review, building a curriculum, and evaluation of a curriculum.
