In this revision of their ground-breaking book, the authors offer an even more balanced, integrated, and applied text. In addition, the book's multidimensional framework, integration of the biopsychosocial dimensions for assessing social functioning, attention to foundation knowledge and diversity, and use of case studies to illuminate the applied aspects of HBSE content all combine to give readers an experience that is meaningful and exciting. Using a unique, multidimensional framework for assessing behavior, the authors look at biopsychosocial development across the life span. Essentially, the framework provides a concrete tool for the reader to assess human behavior from a perspective that truly reflects the values and knowledge base of the social work profession. Lively and comprehensive, this book succeeds by helping students connect foundation knowledge with practice concerns.

Drawing on examples from social work, psychology, literature, philosophy, and current events, vignettes highlight the turning points in our lives and invite students to explore the contradictions between how we mean to be and how others view us. The result is an essential book that bridges theory and practice, providing extraordinary insight into our drives and motivations, and revealing the myriad patterns and paradoxes of our behaviour in the social context.

*Human Behavior in the Social Environment* Springer Publishing Company

This first edition theories-based book for human behavior provides students with three key tools for theory-by-theory comprehension: models, metaphors and maps. These tools help students to easily compare and contrast theories as well as understand their relevance to social work practice.

*Brooks/Cole Empowerment Series: Human Behavior in the Social Environment* Human Behavior in the Social EnvironmentAn Ecological View

This lively, comprehensive introduction to human behavior in the social environment offers a multidimensional approach to the topic, with discussion of integrative practice, theory, treatment, and services as well as matters pertaining to diversity addressed throughout the text. The text provides solid coverage of foundation knowledge, integrates the biopsychosocial dimensions for assessing social functioning, and offers case studies to illuminate the applied aspects of the content.

Furthermore, as part of the Brooks/Cole Empowerment Series, the fifth edition thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2008 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping students connect foundation knowledge with specific practice concerns. Study tables and concept maps (for each discussion of behavior in the development chapters) clarify major phases of biopsychosocial development across the life span. This framework gives students a concrete tool for assessing human behavior from a perspective that reflects the values and knowledge base of the social work profession. HUMAN BEHAVIOR IN THE MACRO SOCIAL ENVIRONMENT takes students to the heart of what social work is all about--helping them promote positive change by building upon the strengths of macro systems. Authors Karen Kirst-Ashman and Grafton Hull provide a comprehensive overview of human behavior in a macro setting, while citing real-world practice and case studies to support theories and their application. They focus on empowerment--encouraging communities, organizations and groups to promote change from the inside out. They also prompt students to think critically about how macro systems affect human behavior and shape social work practice. Aligned with current EPAS standards, the fifth edition offers up-to-date coverage of issues on environmental justice, cognitive restructuring, effective teams, organizational culture, faith-based social services and health care, among other topics. Presents major theories for systems addressed in generalist practice This text is part of the Connecting Core Competencies Series. Human Behavior and the Social Environment: Social Systems Theory provides an expanded treatment of systems theory, and applies the theory to common social work concerns. The text links systems to social roles, and provides a framework for critical assessment of the theories from the systems/roles perspective. It assesses the strengths and weaknesses of each theory with regard to the value of each theory for social work practice. Social systems theory remains the focus of this text. In addition theories are identified as grand theories, middle range theories, or focal theories, to assist the student in understanding the scope and application of theories across system sizes. This text breaks new ground in using role theory as a middle range theory to address common features of human systems at a level that is more intuitive for students, and yet detailed enough to stimulate independent thinking. The text addresses the

standard repertoire of theories, and in addition presents application of the theories to social issues such as violence and addiction. A better teaching and learning experience This program will provide a better teaching and learning experience—for you and your students. Here's how: Improve Critical Thinking – Links systems processes and concepts to role theory as a middle range perspective. Engage Students – Relates social systems concepts to the contexts of generalist social work practice Explore Current Issues – Provides an integrative perspective for the diverse theories used by social workers Apply CSWE Core Competencies – The text integrates the 2008 CSWE EPAS, with critical thinking questions and practice tests to assess student understanding and development of competency. Support Instructors – An Instructor's Manual and Test Bank, Computerized Test Bank (MyTest), BlackBoard Test Item File, and PowerPoint presentations are included in the outstanding supplements package.

Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment. The course is offered usually over two semesters, with one focusing on micro issues (how the individual develops in relation to their social environment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additional higher level macro theories which would make the book applicable to Master's level program This book will also contain a number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions Instructor's manual featuring powerpoint slides and a test bank Student study site for recommended reading, chapter summaries, and flash cards

Since the publication of the first edition of Human Behavior in the Social Environment, several generations of students have successfully used this classic text, which takes a social systems approach to human behavior. This systems approach is still widely accepted in the human services disciplines, including social work, education, nursing, psychology, and in human services programs themselves. Its ideas have become the organizing framework for curriculum, as well as fruitful sources for new applications of theory and practice. Among the advantages of the social systems approach is that it permits students and practitioners to see connections between fields of practice, between methods, and across professional disciplines and bodies of theory. The book serves as a template of the concentric circles of human behavior, with chapters on fields of behavior, beginning with the person and ranging outward to culture and society. Abundant examples from practice and from behavioral patterns are drawn from the social sciences, topical events, literature, and the authors' personal and professional experiences. This volume responds to the needs of students and instructors as these have developed since the publication of the previous edition.

Handbook of Human Behaviour and the Social Environment is a compendium of new theories for all aspects of social work practice. It pulls together major theories and concepts used in the field. By synthesizing this wide knowledge base via practical points of view and tracing the socio-historical evolution of its content and the role of the social worker, this handbook will assist social workers in achieving their primary goals: fostering human well-being and competent social functioning. The authors describe the current social work curriculum developed by the Council on Social Work Education Commission on Educational Policy and Accreditation Standards, demonstrating how client and constituency engagement, assessment, intervention, and evaluation are guided by knowledge of human behaviour and the social environment (HBSE) theory. The Handbook applies HBSE theories differently depending on client system size, context, and needs. Major concepts include power, oppression, and identity formation. This essential, up-to-date volume formulates strategies to eliminate personal bias and to promote human rights. In addition, it integrates ethics, research, policy content, diversity, human rights, and social, economic, and environmental justice issues. A timely revision in this global age, *Human Behavior and the Social Environment, Macro Level* develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. \* Integrates up-to-date research findings, models, and government statistics \* Enhanced discussions of theory, group dynamics, family, community, and the environment \* Theoretical concepts and practice implications in each chapter \* Highlights the importance of the natural environment and ecology--the "community of the earth"--to human and group behavior \* Sets forth a refined understanding of the role of spirituality--the "community of faith"--in people's lives \* Focuses on evidence-based theory and research \* Teaches from a global, cross-cultural, perspective, highlighting themes of empowerment and social justice \* Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic \* Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested classroom activities, and a test bank with essay and multiple choice questions at [www.oup.com/us/HBSE/](http://www.oup.com/us/HBSE/) Don't miss the companion volume, *Human Behavior and the Social Environment, Micro Level, Second Edition*, which offers an eye-opening view of how biological, psychological, and cultural forces influence individuals' behavior.
