Dedicated to the Sailors and Marines who lost their lives on the final voyage of USS Indianapolis and to those who survived the torment at sea following its sinking. plus the crews that risked their lives in rescue ships. The USS Indianapolis (CA-35) was a decorated World War II warship that is primarily remembered for her worst 15 minutes. . This ship earned ten (10) battle stars for her service in World War II and was credited for shooting down nine (9) enemy planes. However, this fame was overshadowed by the first 15 minutes July 30, 1945, when she was struck by two (2) torpedoes from Japanese submarine I-58 and sent to the bottom of the Philippine Sea. The sinking of Indianapolis and the loss of 880 crew out of 1,196 --most deaths occurring in the 4-5 day wait for a rescue delayed --is a tragedy in U.S. naval history. This historical reference showcases primary source documents to tell the story of Indianapolis, the history of this tragedy from the U.S. Navy perspective. It recounts the sinking, rescue efforts, follow-up investigations, aftermath and continuing communications efforts. Included are deck logs to better understand the ship location when she sunk and testimony of survivors and participants. For additional historical publications produced by the U.S. Naval History and Heritage Command, please check out these resources here:

<https://bookstore.gpo.gov/agency/naval-history-heritage-command> Year 2016 marked the 71st anniversary of the sinking and another spike in public attention on the loss -- including a big screen adaptation of the story, talk of future films, documentaries, and planned expeditions to locate the wreckage of the warship.

Research in human evolution in Asia has long been thought to lag far behind similar research in Africa and Europe. However, the limited dissemination of findings is often to blame, rather than a lack of scholarship. The Paleanthropology of Eastern Asia attempts to rectify this misconception by synthesizing research on human evolution in eastern Asia into a single authoritative and definitive text. Covering the span of time from more than two million years ago to the end of the last Ice Age 15,000 years ago, this book examines key events, such as the arrival of the earliest hominins in eastern Asia and the evolution and interaction of various hominin species, including *Homo erectus*, *Homo sapiens*, and a few more in between. While fossils reveal what these hominins may have looked like, the rich Paleolithic archaeological record yields insights into their behavior: Hand axes have been found in eastern Asia where they were previously believed to have been absent. Watercraft was used by foragers as early as 40,000 years ago to voyage to the Japanese archipelago. In Indonesia, cave art paintings older than those from the Lascaux caves in France have been reported. Such new and important discoveries continue to emerge. Providing comprehensive coverage of paleoanthropological research in eastern Asia—from the groundbreaking finds in a cave near Beijing in the early twentieth century to the discovery and identification of new human species during the twenty-first century—this book will captivate anyone interested in the human evolutionary record. The Paleanthropology of Eastern Asia Harper Collins Take notice! Seldom, if ever, have we heard a more musically exciting venture for beginning band. Composer Larry Clark, in a highly creative period, has developed this stunning new work. Two opposing themes resist one another. A constant motor element in the winds fights the lyrical melodic material. Each new angular theme is more forceful than the last. Percussion is a separate color opposing the winds. Unique and tightly written, with fantastic program potential! (duration 2: 24)

Air Force Combat Units of World War II Scarecrow Press This book re-examines the origins of modern Mongolian nationalism, discussing nation building as sponsored by the socialist Mongolian People's Revolutionary Party and the Soviet Union and emphasizing in particular the role of the arts and the humanities. It considers the politics and society of the early revolutionary period and assesses the ways in which ideas about nationhood were constructed in a response to Soviet socialism. It goes on to analyze the consequences of socialist cultural and social transformations on pastoral, Kazakh, and other identities and outlines the implications of socialist nation building on post-socialist Mongolian national identity. Overall, *Socialist and Post-Socialist Mongolia* highlights how Mongolia's population of widely scattered seminomadic pastoralists posed challenges for socialist administrators attempting to create a homogenous mass nation of individual citizens who share a set of cultural beliefs, historical memories, collective symbols, and civic ideas; additionally, the book addresses the changes brought more recently by democratic governance.
