STEWART STEWART

The Handbook of Marketing Research
Pearson IT Certification
Stealth KM presents an innovative way to drive successful knowledge management initiatives in the public sector. Niall Sinclair, a well-known, former high-level official in the Canadian Government, proposes a technique that has been proven to work in his own governmental area of 20,000 employees, and that enables executives and professionals, especially those in government and public institutions, to implement KM programs successfully.
Environmental Impact Statement Corwin Press
Focused on foundations, intervention, collaboration, and evaluation, this resource offers effective strategies and practices for preventing problem behavior at both the classroom and school level.
Preventing Problem Behaviors JHU Press
The escalation of security breaches involving personally identifiable

information (PII) has contributed to the loss of millions of records over the past few years. Breaches involving PII are hazardous to both individuals and org. Individual harms may include identity theft, embarrassment, or blackmail. Organ. harms may include a loss of public trust, legal liability, or remediation costs. To protect the confidentiality of PII, org. should use a risk-based approach. This report provides guidelines for a risk-based approach to protecting the confidentiality of PII. The recommend. here are intended primarily for U.S. Fed. gov;t. agencies and those who conduct business on behalf of the agencies, but other org. may find portions of the publication useful.

SAGE

Ancient authors emphasize dramatic moments in the life of Julia Domna, wife of Roman emperor Septimius Severus (193–211). They accuse her of ambition unforgivable in a woman, of instigating civil war to place her sons on the throne, and of resorting to incest to maintain her

hold on power. In imperial propaganda, however, Julia Domna was honored with unprecedented titles that celebrated her maternity, whether it was in the role of mother to her two sons (both future emperors) or as the metaphorical mother to the empire. Imperial propaganda even equated her to the great mother goddess, Cybele, endowing her with a public prominence well beyond that of earlier imperial women. Her visage could be found gracing everything from state-commissioned art to privately owned ivory dolls. In *Maternal Megalomania*, Julie Langford un masks the maternal titles and honors of Julia Domna as a campaign on the part of the administration to garner support for Severus and his sons. Langford looks to numismatic, literary, and archaeological evidence to reconstruct the propaganda surrounding the empress. She explores how her image was tailored toward different populations, including the military, the Senate, and the people of Rome, and how these populations responded to

propaganda about the empress. She employs Julia Domna as a case study to explore the creation of ideology between the emperor and its subjects.

The Difference and Why It Matters SAGE Publications

The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting-edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and professors look to the six bimonthly issues to: deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement.

Health Planning Reports: Subject index. 4 v SAGE Experience Sampling Method: Measuring the Quality of Everyday Life is

the first book to bring together the theoretical foundations and practical applications of this indispensable methodology. Authors Joel M. Hektner, Jennifer A. Schmidt, and Mihaly Csikszentmihalyi provide fascinating information for anyone interested in how people go about their daily lives.

Context, Knowledge and Methods SAGE Publications

'A great basic book, which can be used by the novice qualitative researcher. The advice is friendly, almost folksy with clear conceptual explanation of how the program works. A very welcome contribution to this field' - Martha Ann Carey, Albert Einstein College of Medicine, New York 'Qualitative researchers continue to be criticized because they rely too much on their own interpretations and avoid analytical and theoretical issues. This book provides ways to integrate the thinking about a project and the data you have with practical ways that the software can facilitate the process. I recommend it for both the new user as well as the experienced one' - Marilyn Lichtman, Forum for Qualitative

Social Research - follow the link below to read the complete review This book invites readers to learn how to use qualitative data analysis software in the context of doing their research project. The reader follows basic steps for creating and conducting a real project with real data, using the new-generation software package, QSR NVivo. The software tools are introduced only as needed and explained in the framework of what is being asked. The reader is the craftsman, trialing those tools in the processes of getting started, tentative interpretation, drawing links, shaping data, and seeking and establishing explanations and theories. The NVivo Qualitative Project Book allows the researcher to work through their own project, or work with data provided from a real project. The authors draw on decades of experience of research and training researchers around the world, and take the reader through each step in a style combining informality and authority, with frequent tips and reflections on what is being done. Demonstration software is provided on the enclosed

CD-ROM, with data to help create (a researcher's project) a project about researchers and researching, and with multiple stages arranged sequentially in the development of a real project. As a practical tool to help researchers understand qualitative data analysis software using NVivo, and a guide through the sometimes complex processes of doing a research project, this book will be invaluable reading for researchers and students undertaking qualitative research. Pat Bazeley provides training and consulting services in research design and data analysis through her company, Research Support. Lyn Richards is Director of Research Services at Qualitative Solutions and Research, the developers of NUD·IST and NVivo software. NVivo is distributed by Scolari, SAGE Publications Software.

Grounded Theory After the Postmodern Turn R&L Education

This tool documents key but enduring aspects of how the Navy implements the Planning, Programming, Budgeting, and Execution process so that action officers and Navy leaders can

successfully navigate and effectively contribute to the process.

CompTIA Network+ N10-007 Cert Guide Challenging Issues and Accountability in Nigeria'S Public Administration Contains an overview discussion of the Freedom of Information Act's (FOIA) exemptions, its law enforcement record exclusions, and its most important procedural aspects. 2009 edition. Issued biennially. Other related products: Report of the Commission on Protecting and Reducing Government Secrecy, Pursuant to Public Law 236, 103d Congress can be found here: <https://bookstore.gpo.gov/products/sku/052-071-01228-1> Overview of the Privacy Act of 1974, 2015 Edition can be found here: <https://bookstore.gpo.gov/products/sku/027-000-01429-1> *A Practical Guide* Oxford University Press Argues that a manager's central responsibility is to create and implement strategies, challenges popular motivational practices, and shares anecdotes discussing how to enable action-oriented plans for real-world results. *Your Handbook for Action* Routledge Public administration

ensures the development and delivery of the essential public services required for sustaining modern civilization. Covering areas from public safety and social welfare to transportation and education, the services provided through the public sector are inextricably part of our daily lives. However, mandatory budgetary cuts in recent years have caused public administrators to radically re-think how they govern in the modern age. In this Very Short Introduction Stella Theodoulou and Ravi Roy offer practical insight into the major challenges confronting the public sector in the globalized era. Tackling some of the most hotly debated issues of our time, including the privatization of public services and government surveillance, they take the reader on a global journey through history to examine the origins, development, and continued evolution of public administration. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get

ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Navy Planning, Programming, Budgeting and Execution

DIANE Publishing

Douglas Kellner's Media Spectacle and the Crisis of Democracy: 9/11, the War on Iraq, and Election 2004

investigates the role of the media in the momentous political events of the past four years. Beginning with the role of the media in contested election of 2000, Kellner examines how corporate media ownership and concentration, linked with a rightward shift of establishment media, have disadvantaged the Democrats and benefited George W. Bush and the Republicans. Exploring the role of media spectacle in the 9/11 attacks and subsequent Terror War in Afghanistan and Iraq, Kellner documents the centrality of media politics in advancing foreign policy agendas and militarism. Building on his analysis in *Media Spectacle* (Routledge 2003), Kellner demonstrates in detail how conflicting political forces ranging from Al Qaeda to the Bush administration construct media spectacles to advance their politics. Two chapters critically engage the role of the media in the buildup to the Iraq war and the media-centric nature of Bush's Iraq invasion and occupation. Final chapters delineate the role of the media in the highly contested and significant

2004 election campaign that many believe to be one of the key political struggles of the contemporary era. Criticizing Bush's unilateralism, Kellner argues for a multilateral and cosmopolitan globalization and the need for democratic media to help overcome the current crisis of democracy in the United States.

***Stealth KM* SAGE**

Challenging Issues and Accountability in Nigerias Public Administration is an attempt to treat in essay form a wide range of topics which have recently gained the trend of intensive research focus and scholarly attention of the authors. Here is a book which a selective reader can not afford to miss , a book which a reader would continue to read times without number . It is indeed an indispensable acquisition for personal and institutional libraries.

Reassessing the Rogue Tory CQ Press

The Handbook of Marketing Research: Uses, Misuses, and Future Advances comprehensively explores the approaches for delivering market insights for fact-based decision making in a market-

oriented firm. Divided into four parts, the Handbook addresses (1) the different nuances of delivering insights; (2) quantitative, qualitative, and online data gathering techniques; (3) basic and advanced data analysis methods; and (4) the substantial marketing issues that clients are interested in resolving through marketing research.

***The Grounded Theory Perspective III* SAGE**

A comprehensive survey research book that incorporates survey design, implementation, data management, and data analysis, this text is based in sociological research and contains extensive examples throughout. This book examines the uniqueness of each research topic and the fact that when doing such research, there is a need to make decisions about the many unique situations while trying to answer the research question. Each chapter is framed by addressing the decisions that need to be made depending on the various challenges that may arise as the survey study is developed.

Terrorism, War, and Election Battles

Routledge

Addressed to practitioners

of healthcare administration, the book looks beyond traditional information systems. This text suggests how information systems can bring a competitive advantage to hospitals and other healthcare providers. Its viewpoint is neither technical nor clinical. Rather it is concerned with the role and the use of information

in the provision of healthcare. The text is divided into several reader-friendly units, which allows the reader to quickly select only what he wants to study in depth. Divided into two sections, one dealing with support for the private practitioner, the other with managing an institution, the material spans a wide array of types of computers. This

provides valuable instructional information for nurses, physicians and administrators using the computer as a tool for providing quality medical care.
