Laser Ablation and Its Applications | Find, read and cite all the research you need on ResearchGate Laser Ablation and Its Applications | Request PDFDue to the precise, accurate and environmental ly-friendly nature of laser ablation, it is used in many different application areas and industries. Its ability to remove thin film has particular benefits for the electronics and semiconductor

industries, and it has also found uses for other industries such as medical, automotive and ship-building. What is Laser Ablation? | Applications | SPI Lasers Laser ablation or photoablation is the process of removing material from a solid (or occasionally liquid) surface by irradiating it with a laser beam. At low laser flux, the material is heated by the absorbed laser energy and evaporates or

sublimates. At high laser flux, the material is typically converted to a plasma. Usually, laser ablation refers to removing material with a pulsed laser, but ...
