FRIDA CAROLYN

[OECD Economic Surveys: Norway 1997](#) OECD Publishing

Skills are central to Norway's future prosperity and the well-being of its people. This diagnostic report identifies 12 skills challenges for Norway which were distilled from a series of interactive diagnostic workshops held in the course of 2013 with a wide range of stakeholders in Oslo ...

The Measurement of Scientific and Technological Activities Proposed Guidelines for Collecting and Interpreting Technological Innovation Data Oslo Manual OECD Publishing
 Wellbeing in Norway is high; GDP per capita is among the top-ranking countries and the country scores well in measures of inclusiveness. Several challenges must be addressed, however, if this good standing is to be sustained. The economy is vulnerable to trade risks. Also, though property markets and related credit appear to be heading for a soft landing, risks remain. Norway has substantial opportunities for more effective public spending remain, and exploiting these will become more important as fiscal space narrows. Productivity growth remains low, requiring

attention to business policy.

The Measurement of Scientific, Technological and Innovation Activities Oslo Manual 2018 Guidelines for Collecting, Reporting and Using Data on Innovation, 4th Edition OECD Publishing

OECD Economic Surveys: Norway 1965 OECD Publishing

What is innovation and how should it be measured? Understanding the scale of innovation activities, the characteristics of innovative firms and the internal and systemic factors that can influence innovation is a prerequisite for the pursuit and analysis of policies aimed at fostering innovation.

OECD Economic Surveys: Norway 1962 OECD Publishing

The ability to determine the scale of innovation activities, the characteristics of innovating firms, and the internal and systemic factors that can influence innovation is a prerequisite for the pursuit and analysis of policies aimed at fostering technological innovation. The Oslo Manual, issued in 1997, is the foremost international source of guidelines for the collection and use of data on innovation activities in industry. This second edition has been updated to take account of the progress made in understanding the innovation process, the experience gained from the previous round of innovation surveys, the extension of the field of investigation to other sectors of industry
