*Hiking the Pacific Crest Trail: Oregon* is written by Eli Boschetto. A hiker, writer, and photographer, Eli reveled in going deep for Oregon! Since 2011, he has been the editor of *Washington Trails* magazine, which he manages from his home in Portland, Oregon. Eli is also a regional correspondent for *Backpacker* magazine. The Pacific Crest National Scenic Trail (PCT) meanders from the California-Mexico border north to the border of Washington and Canada. It's a rigorous trail, first envisioned in 1926 and now encompassing some 2,650 miles. Each volume of this new series focuses on section-by-section pieces of the PCT and includes the following features: • Trail sections of 4- to 10-night trips • Detailed camp-to-camp route descriptions • Easy-to-understand route maps and elevation profiles • Details on specific campsites and most-reliable water sources • Road access to and from various trail sections • Info on permits, hazards, restrictions, and more • Alternate routes and connecting trails • Clear references to the PCT's established system of section letters, designating trail segments from Mexico to Canada—so you can easily cross-reference the guides with other PCT resources • Key wilderness sights along the way • Suggested itineraries

"Get your head into the clouds with Aerial Geology." —The New York Times Book Review Aerial Geology is an up-in-the-sky exploration of North America's 100 most spectacular geological formations. Crisscrossing the continent from the Aleutian Islands in Alaska to the Great Salt Lake in Utah and to the Chicxulub Crater in Mexico, Mary Caperton Morton brings you on a fantastic tour, sharing aerial and satellite photography, explanations on how each site was formed, and details on what makes each landform noteworthy. Maps and diagrams help illustrate the geological processes and clarify scientific concepts. Fact-filled, curious, and way more fun than the geology you remember from grade school, Aerial Geology is a must-have for the insatiably curious, armchair geologists, million-mile travelers, and anyone who has stared out the window of a plane and wondered what was below.

Now in a fully updated edition, this invaluable reference work is a fundamental resource for scholars, students, conservationists, and citizens interested in America's national park system. The extensive collection of documents illustrates the system's creation, development, and management. The documents include laws that established and shaped the system; policy statements on park management; Park Service self-evaluations; and outside studies by a range of scientists, conservation organizations, private groups, and businesses. A new appendix includes summaries of pivotal court cases that have further interpreted the Park Service mission.

Two men played a crucial role in the creation and early history of the National Park Service: Stephen T. Mather, a public relations genius of sweeping vision, and Horace M. Albright, an able lawyer and administrator who helped transform that vision into reality. In *Creating the National Park Service*, Albright and his daughter, Marian Albright Schenck, reveal the previously untold story of the critical "missing years" in the history of the service. During this period, 1917 and 1918, Mather's problems with manic depression were kept hidden from public view, and Albright, his able and devoted assistant, served as acting director and assumed Mather's responsibilities. Albright played a decisive part in the passage of the National Park Service Organic Act of 1916; the formulation of principles and policies for management of the parks; the defense of the parks against exploitation by ranchers, lumber companies, and mining interests during World War I; and other issues crucial to the future of the fledgling park system. This authoritative behind-the-scenes history sheds light on the early days of the most popular of all federal agencies while painting a vivid picture of American life in the early twentieth century.

\*\*A New York Times Bestseller!\*\* Based on the wildly popular Instagram account, Subpar Parks features both the greatest hits and brand-new content, all celebrating the incredible beauty and variety of America's national parks juxtaposed with the clueless and hilarious one-star reviews

posted by visitors. Subpar Parks, both on the popular Instagram page and in this humorous, informative, and collectible book, combines two things that seem like they might not work together yet somehow harmonize perfectly: beautiful illustrations and informative, amusing text celebrating each national park paired with the one-star reviews disappointed tourists have left online. Millions of visitors each year enjoy Glacier National Park, but for one visitor, it was simply "Too cold for me!" Another saw the mind-boggling vistas of Bryce Canyon as "Too spiky!" Never mind the person who visited the thermal pools at Yellowstone National Park and left thinking, "Save yourself some money, boil some water at home." Featuring more than 50 percent new material, the book will include more depth and insight into the most popular parks, such as Yosemite, Yellowstone, the Grand Canyon, and Acadia National Parks; anecdotes and tips from rangers; and much more about author Amber Share's personal love and connection to the outdoors. Equal parts humor and love for the national parks and the great outdoors, it's the perfect gift for anyone who loves to spend time outside as well as have a good read (and laugh) once they come indoors.

*Forests of Crater Lake National Park* Peachpit Press

The definitive guide to memorable stays in America's most beautiful places.

**Crater Lake National Park, Oregon** Rowman & Littlefield

Weekend explorers and family vacationers will love this helpful resource that includes maps and photos and provides ideas on where to go, what to do, and how to get there. Oregon's 362-mile ocean shoreline, the magnificent Columbia Gorge, and the spectacular mountain ranges draw in-staters and national visitors. This is the quintessential guidebook to recreation in Oregon's state parks.

*Night Photography* Mountaineers Books

Many of North America's most beloved regions are artfully celebrated in these boardbooks designed to soothe children before bedtime while instilling an early appreciation for the continent's natural and cultural wonders. Each book stars a multicultural group of people visiting the featured area's attractions—such as the Rocky Mountains in Denver, the Georgia Aquarium in Atlanta, Lake Ontario in Toronto, and volcanoes in Hawaii. Rhythmic language guides children through the passage of both a single day and the four seasons while saluting the iconic aspects of each place.

The national forests lay across America's diverse ecological and political geography, their 191 million acres occupying about 10 percent of the nation's land base. On the occasion of the centennial of the National Forest System, *Origins of the National Forests* examines the issues that have confronted the development, management, and use of the national forests since their inception in 1891. The national forests are a major source of wood, water, minerals, forage, animal life and habitat, and wilderness. Yet questions of who controls and who benefits from the resources have posed problems and conflicts from the origins of the Forest Service to the present. Based on a 1991 Forest History Society conference, the essays collected here discuss a range of important topics surrounding our national forests, including the relationship between the federal and state systems that regulate the forests; the privately owned lands within the forests that are governed by federal statutes, state laws, and county ordinances; the ill-defined rights of those who lived on the land long before it was a national forest and were forced off the land; and the effect of early policymaking decisions made within the framework of the emerging Conservation Movement. For more than half a million years, volcano Mount Mazama towered over southern Oregon. From time to time, it erupted, spreading pumice, ash, and cinders for miles around. Then, approximately 7,700 years ago, Mount Mazama erupted with such force that the volcano could no longer support itself and it collapsed, leaving a large caldera. Eventually, the volcanic action subsided and all was calm. Over the next centuries, water and snow accumulated in the caldera. In 1902, Crater Lake became a national park.

On January 1 of 2016, Stefanie Payne, a creative professional working at NASA Headquarters, and Jonathan Irish, a photographer with National Geographic, left their lives in Washington, D.C. and hit the open road on an expedition to explore and document all 59 of America's national parks during the centennial celebration of the U.S. National Park Service - 59 parks in 52 weeks - the Greatest American Road Trip. Captured in more than 300,000 digital photographs, written stories, and videos shared by the national and international media, their project resulted in an incredible view of America's National Park System seen in its 100th year. 'A Year in the National Parks, The Greatest American Road Trip' is a gorgeous visual journey through our cherished public lands, detailing a rich tapestry of what makes each park special, as seen along an epic journey to visit them all within one special celebratory year.

*My Itchy Travel Feet: Breathtaking Adventure Vacation Ideas*

America's 61 National Parks are a must-see for every nature lover and adventurer around the world, and *Explore! America's National Parks* shows the parks region by region, detailing not-to-be missed sights, as well as all the things to see and do. Would you like to kayak down a river? Or follow a trail of badger tracks? Or maybe take a ride on the back of a llama? With consultancy from a real Park Ranger, the book contains a variety of exciting and interactive information, from full-page landscape artwork, to activity spreads featuring flora and fauna to search for in the park, to maps plotting all 61 National Parks in each region. Plus, readers get a history of the parks, what to pack for camping and hiking, and information on environmental issues, endangered animals, and protecting the parks, and more.
