A legendary adventurer seeking fame and treasure in 1880's Peru. A headstrong California beauty who'll do anything to

protect her father, a professor determined to find the lost Incan city of Vilcapampa. If the jungle doesn't kill them, will love stand a chance? The lady has just met her match. He wasn't her type of man. And yet . . . "We're probably making a big mistake," he said roughly, and she nodded. "Very likely." "Are you sure this is what you want?" She drew in a deep, trembling breath. "More than anything." His reaction took her by surprise. He pulled her to him, his mouth crashing down on hers with bruising force, invading her with his tongue as he backed her toward the bed. It almost hurt, but she tasted his urgency, and heat and desire rose in her as sharp and strong. He shoved a hand through her hair, loosened the pins and let them scatter atop the mattress and onto the floor, raked his fingers through the loose braids to free it around her shoulders, splayed his fingers over her back, tugged at laces that held her jabot around her neck. He tossed it aside,

unbuttoned her blouse and peeled it down her arms, freed her mouth for a moment to regard the Flynt Waist beneath with less than enthusiastic scrutiny. Heart hammering, she helped him untie the laces and stood silently when he slid it off her. . . .

It's not easy landing unprepared in a country like Japan. The

eccentricities of the calendar, the indecipherable postal system, not to mention the alien alphabet, language and culture, have all to be confronted before the disorientated traveller can feel at ease. Trying to ride a bicycle through the streets of one of the most congested cities in the world would seem to compound your problems. For Josie Dew, however, with over 200,000 miles already clocked up in the saddle few things could be more challenging - or for the reader of *A RIDE IN THE NEON SUN*, more wonderfully entertaining. From Kawasaki to Kagoshima, Odawara to Okinawa, Josie discovered a nation rich in dazzling contrasts. The neon and concrete were there in greater abundance than even she had imagined, but so too were bottomless baths, love burgers, long-tailed cocks, musical toilet rolls, oriental Elvises, cardboard police and a sense of fun belying the population's rigorous work ethic. Far from being the reserved race that she had heard about, the Japanese welcomed her into their homes with bountiful smiles and bows - and skin-scorching baths.

It started on a cold, frosty morning in 1951 in Christchurch, New Zealand, with a seventeen-year-old-boy, a crate of sheeps' kidneys and a dream. The boss of the city's Belfast meatworks, had arrived an hour early to set up for the day, when he noticed one of his workers packing up a crate on the countertop. The young lad was battling to move it so the boss went over to help. When asked what time he'd started, the boy replied 'Five o'clock this morning'. Stunned, and amused, the boss told him he'd be earning a good bonus at the end of the week, and wondered aloud what he'd spend it on. But the boy knew, and immediately replied, 'I'm going to race speedway in England.' And he did. That boy was Barry Briggs, and it was just the start of his great adventure. Little did he know he was soon to become the legendary speedway racer more commonly known as Briggo, and later as Barry Briggs MBE. From dangerous encounters in the jungles of Liberia to teaching Steve McQueen to slide a speedway bike, Briggo's incredible story is one of strength, determination and a life lived firmly in the fast lane.

In the early 1980s, Harley-Davidson was on the verge of bankruptcy. In the general public's opinion, quality was substandard—of both motorcycles and riders. Harleys leaked oil and were often broken down. Riders were roughnecks, out to raise hell. The Harley-Davidson brand was tarnished. What's more, the charges were true. By the mid-1980s, Harley couldn't produce enough bikes to keep the public happy. Dealers were selling bikes off the showroom floor, struggling to assuage customers frustration. And today, Harley-Davidson is a model brand. Harley-Davidson isn't just a motorcycle company anymore. It is a community, a look, a source of self-expression, an all-American appeal for freedom—all expressed in one little logo. So, what happened? How did Harley manage to pull itself from the fire, brush itself off, and ride off into the sunset? The secret: branding. Histories will tell you how Harley-Davidson closed the quality gap between Hogs and the cheaper, faster, sleeker Japanese bikes; how Harley used Japanese manufacturing

methods to increase its cash flow; how Harley clawed its way back from the brink of bankruptcy. All these aspects were important to Harley's rise from the ashes, no doubt, and as such are discussed in this book. But the true power of the big, beautiful, orange and black machine that is Harley-Davidson lies in its image, the Bar and Shield, the brand. *Rebuilding the Brand: How Harley-Davidson Became King of the Road* is the story of how a core group led a team of not only marketing folks but also employees, management, dealers, and vendors to rebuild the Harley-Davidson image. Told through the perspective of Clyde Fessler—who held several positions within Harley, from head of marketing services to VP of business development—*Rebuilding the Brand* provides dynamic branding information couched in an entertaining story. Fessler describes the methods used to create the iconic image Harley-Davidson enjoys today, methods that can be translated to nearly any industry, and explores the topics of brand experience, brand personality, brand extension, brand association, brand consistency, and brand welfare. When Nicole Hardy's eye-opening "Modern Love" column appeared in the New York Times, the response from readers was overwhelming. Hardy's essay, which exposed the conflict between being true to herself as a woman and remaining true to her Mormon faith, struck a chord with women coast-to-coast. Now in her funny, intimate, and thoughtful memoir, Nicole Hardy explores how she came, at the age of thirty-five, to a crossroads regarding her faith and her identity. As a member of the Church of Jesus Christ of Latter-day Saints, Nicole had held absolute conviction in her Mormon faith during her childhood and throughout her twenties. But as she aged out of the Church's "singles ward" and entered her thirties, she struggled to merge the life she envisioned for herself with the one the Church prescribed, wherein all women are called to be mothers and the role of homemaker is the emphatic ideal. *Confessions of a Latter-day Virgin* chronicles the extraordinary lengths Nicole went to in an attempt to reconcile her human needs with her spiritual life—flying across the country for dates with LDS men, taking up salsa dancing as a source for physical contact, even moving to Grand Cayman, where the ocean and scuba diving provided some solace. But neither secular pursuits nor LDS guidance could help Nicole prepare for the dilemma she would eventually face: a crisis of faith that caused her to question everything she'd grown up believing. In the tradition of the memoirs *Devotion* and *Mennonite in a Little Black Dress*, *Confessions of a Latter-day Virgin* is a mesmerizing and wholly relatable account of one woman's hard-won mission to find love, acceptance, and happiness—on her own terms.

Having spent 10 years scaling the lower echelons of the sport, the time has come for one of Britain's least successful athletes to reveal all about how he got involved in all this nonsense in the first place. Marvel as he reveals: His sporting history - how being last pick at school football in the 1970s set him on course for a lifetime of being rubbish at team games. How he took up triathlons in the first place (for a bet, and the cow who made it with him never paid up). How he overcame a crippling lack of talent and a chorus of complete indifference from his family to complete 10 Ironmans, all outside the top 500 finishers. The many triathlon adventures he has experienced over the past 10 years (cow pats, Ironmans, incontinence, driving bans, broken bones, public nudity, spending entire redundancy payments on a

new bike, Belgian portalooos, German knocking shops, sunburnt arse cheeks, channel swimming, fights with chavs, obsessions with weather and the nutritional value of Jaffa Cakes, 3 hour marathons, chronic dehydration and so on). The many and varied idiots he's got to know as a result of taking up the sport (aka his mates). The typical training (hell) he goes through to take part in a race given he has absolutely no ability whatsoever. How triathlons ultimately caused him to sell his Mercedes, give away his expensive suit, chuck in his job in the City and become, as his father put it, a "god-damned hippy" (A cycle path designer who owns a camper van).

Description Mel Cross wrote her extraordinary book because, when in the depths of depression, she couldn't find a book to explain what it was really like to be in the place where she was. Like many sufferers Mel found that there were plenty of medical books and books which seemed patronising but no books expressing what it was really like to be deeply depressed. Melanie wanted to use her experience to help other people understand the illness and even be able draw on experiences from the book to help themselves, or friends or family who are suffering. This book describes how a 'normal' person with a 'normal' life overcomes chronic depression. Mel is not ashamed of her depression and hopes her book will allow others to feel the same way. About the Author Melanie Cross was born in Bristol in 1971 and now lives in the lovely Painswick valley in the Cotswolds with her husband, daughter and crazy cat George. In 1995 Melanie completed a B.Ed (Hons) degree and went on to teach at a primary school in Bristol, until she became ill in 1999. As she recovered she went on to run and manage an Animal Care Centre and took further qualifications in feline behaviour and became an assessor of NVQs in Animal Care. Mel took time off from her animal care work in order to write her book, she now lives a very happy life doing the most important job in the world - being a mum!

Tim and Laura Moss quit their jobs to cycle 13,000 miles around the world. Riding across deserts, over mountains and through jungles, they braved climatic extremes from sub-zero blizzards to the sweltering tropics. But this is not a book about cycling. It is a book about the world and its people. On their travels, Tim and

Laura met a fascinating array of people and were repeatedly overwhelmed by the hospitality they received. From Turkey to Thailand and Oman to Japan, complete strangers invited these two grubby cyclists into their homes at the drop of a hat, offering the pair a unique and privileged insight into the lives of people from all walks of life. Follow Tim and Laura around the world as they meet a gun toting sheriff on the Mexican border, a Taksim Square protester who makes a mean kebab and the Albanians who say yes when they really mean no. Join them as they stay with Buddhist monks, Georgian nuns, Turkish imams and Southern Baptists. And come along for the ride as they see behind the sanctions in Iran, hear about life after Hurricane Rita and experience hospitality even in the wake of violence and despair. In a world filled with negative headlines and countries turning in on themselves, this life affirming story is a timely reminder of the common humanity that links people the world over. A high-octane memoir of unflappable determination from an X-Games and Paralympics champion When "Monster" Mike Schultz won snowboarding gold in Pyeongchang, South Korea, it was the culmination of a decade of reinvention, in every sense of the word. Ten years earlier he'd lain bleeding on the side of a mountain after a devastating snowmobile accident. Now he stood tall on the Paralympic podium, supported by a prosthetic knee and foot of his own creation. *Driven to Ride* chronicles Schultz's improbable journey following a lifesaving amputation. From a

place of debilitating pain and depression, he tapped into the same sense of adventure that had once taken him to the top of competitive snowmobile racing and followed it to the pinnacle of an entirely new sport: adaptive snowboarding. As he launched himself into the world of adaptive sports, Schultz's ambition was only tempered by his need for better equipment—prostheses that could withstand the vibrations of a motocross bike or the impact

of rough terrain. His obsessive tinkering, without any formal engineering background, has presented yet another new path designing innovative prostheses for athletes and wounded military veterans. Inspiring and thrilling in equal measure, this is a singular story of uncommon strength, ingenuity, and seizing golden opportunities.
