Backcountry Skiing The Mountaineers Books Nature in Translation is an ethnographic exploration in the cultural politics of the translation of knowledge about nature. Shiho Satsuka follows the Japanese tour guides who lead hikes, nature walks, and sightseeing bus tours for Japanese tourists in Canada's Banff National Park and illustrates how they aspired to become local "nature interpreters" by learning the ecological knowledge authorized by the National Park. The guides assumed the universal appeal of Canada's magnificent nature, but their struggle in translating nature reveals that our understanding of nature—including scientific knowledge—is always shaped by the specific socio-cultural concerns of the particular historical context. These include the changing meanings of work in a neoliberal economy, as well as culturally-specific dreams of finding freedom and self-actualization in Canada's vast nature. Drawing on nearly two years of fieldwork in Banff and a decade of conversations with the guides, Satsuka argues that

knowing nature is an unending process of cultural translation, full of tensions, contradictions, and frictions. Ultimately, the translation of nature concerns what counts as human, what kind of society is envisioned, and who is included and excluded in the society as a legitimate subject.

Skiers and snowboarders, prepare to realize your

wildest dreams as we take you to the best peaks on the planet. Peter Oliver has explored mountains across the earth, skiing hundreds of thousands of vertical feet through untold stashes of powder in his quest for the best. Along the way, he's seen skiing and boarding merge in a mutual longing to put the adventure back into alpine skiing. That means off-trail (or "off-piste") runs, glade

skiing, plenty of lift-served backcountry, out-of-bounds opportunities, and more and better heli-skiing. It means new resorts and newly opened terrain at classic resorts that make snowboarding and skiing more exciting than ever.

Calgary Goes Skiing tells the story of the Calgary Ski Club. From its origins in 1920 with Scandinavian ski jumpers in Elbow Park to the family racing club of the 1960s to today's adult recreation club, it's all here. This is the colourful story of the city's ski pioneers who helped establish the sport in Calgary and Banff National Park.

Mountain rescue in western

Canada developed through the Canadian Pacific Railway's use of Swiss guides to enhance the climbing experience in the early 1900s. These guides brought their knowledge of mountain rescue to the Canadian Rockies. As climbing gained in popularity with the emerging middle classes after the Second World War, tragic accidents became more common. Two

accidents in 1954/55 (the deaths of a group of female climbers from Mexico on Mt. Victoria and a group of Philadelphia schoolboys on Mt. Temple) forced the government to develop a professional mountain rescue team through the Park Warden Service under the tutelage of Walter Perren (a Swiss guide and the father of mountain rescue in Canada). Perren essentially turned cowboys into

competent rescue personnel, and the story takes off from there. Following five principal men through the first 50 years of mountain rescue in Canada, *Guardians of the Peaks* also looks at all aspects of the rescue experience. It is the story of personal tragedy and the ability of individuals to cope with this stress-laced, demanding occupation. **Skiing** Rocky Mountain Books Ltd Provides

information for non-profit organizations which sponsor vocational learning programs *Skiing* CABI Chic Scott covers all aspects of the sport, ranging from the ski jumpers at Rossland in the 1890s to the birth of ski lodges and ski resorts to the heliskiers, loppet racers and snowboarders of today. [A Curriculum Guide](#) Human Kinetics In May 1993 the British Mountaineering Council met to discuss the

future of high altitude tourism. Of concern to attendees were reports of queues on Everest and reference was made to mountaineer Peter Boardman calling Everest an 'amphitheater of the ego'. Issues raised included environmental and social responsibility and regulations to minimize impacts. In the years that have followed there has been a surge of interest in climbing

Everest, with one day in 2012 seeing 234 climbers reach the summit. Participation in mountaineering tourism has surely escalated beyond the imagination of those who attended the meeting 20 years ago. This book provides a critical and comprehensive analysis of all pertinent aspects and issues related to the development and the management of the growth area of mountaineering tourism. By doing so it explores the meaning of adventure and special reference to mountain-based adventure, the delivering of adventure experience and adventure learning and education. It further introduces examples of settings (alpine environments) where a general management framework could be applied as a baseline approach in mountaineering tourism development. Along with this general management framework, the book draws evidence from case studies derived from various mountaineering tourism development contexts worldwide, to highlight the diversity and uniqueness of management approaches, policies and practices. Written by leading academics from a range of disciplinary backgrounds, this insightful book will

provide students, researchers and academics with a better understanding of the unique aspects of tourism management and development of this growing form of adventure tourism across the world.

Knows No Expert epitomizes George Evanoff's philosophy towards the outdoors, while presenting an intriguing contrast with the man himself. Widely regarded as an "expert," he was a knowledgeable, experienced, and practical outdoorsman, teacher, and mentor, yet ironically lost his life in the mountains in an encounter with a grizzly. Son of a Macedonian

immigrant family, George was raised in Alberta, and went on to become a mountaineer, guide, avalanche specialist, and pioneer in ecotourism in British Columbias North Rockies. The many themes embedded in Evanoff's life experiences encompass self-propelled backcountry travel, outdoor safety, avalanche safety and rescue, ski patrol leader, exploration and discovery, outdoor

ethics, and public involvement with respect to land and resource use. George Evanoff was honoured in several tangible ways after his death, culminating in the naming of Evanoff Provincial Park in the Hart Ranges of the Rockies. Summit Ecology & Wonder in the Canadian Rocky Mountain Parks World Heritage Site. On January 20, 2003, at 10:45

a.m., a massive avalanche released from Tumbledown Mountain in the Selkirk Range of British Columbia. Tonnes of snow carried 13 members of two guided backcountry skiing groups down the 37-degree incline of a run called La Traviata and buried them. After a frantic hour of digging by remaining group members, an unthinkable outcome became reality. Seven people were

dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and the pages of newspapers. The official analysis did not specifically note guide error as a contributing factor in the accident. This interpretation has been insufficient for some of the victims' families, the public and some members of the guiding

community. Why did the guiding team seemingly ignore a particularly troublesome snowpack? Why were two groups travelling so close together? Were the guides adhering to best practices for terrain selection and snow stability evaluation? What motivated them to go there? Buried is the assistant guide's story. It renders an answerable truth about what

happened by delving deep into the human factors that played into putting people in harm's way. The story begins buried metres deep in snow, and through care-filled reflection emerges slowly like spring after a long winter, nurturing a hopeful, courageous dialogue for all who make journeys through the mountains of their life. The story illustrates the peace that comes from

accountability and the growth that results from understanding .

Canadian Geographic Workman Publishing
From bombs to bombillas, Snow Nomad: An Avalanche Memoir, chronicles the fifty seasons author Alan Dennis worked in the avalanche patch, travelling between Canada, New Zealand, Scotland, and Argentina. His nomadic account is composed of "facts,

factoids, truths, half-truths, rumours, gossip, and fake news."

This unconventional journey on an undulating career path is one riddled with wit and the wisdom he gained when plying his trade at ski resorts, in mining patches, on film sets, and beyond. It's a story of mentors, mishaps, and moments of solitude. Dennis introspectively recalls the times when he was in over

his head, but learned to rely on his training, intuition and, perhaps most of all, luck. Snow Nomad is a humble and heartfelt tribute to his dear family, friends, and colleagues (and sometimes even foes) with whom he shared these decades, whether shooting military artillery for avalanche control in Canada's remote reaches, scrambling up a summit in the Scottish

Highlands, or bunking at a mining camp in Argentina's Andes.
