How to focus anti-hunger efforts not on charity but on the root causes of food insecurity, improving public health, and reducing income inequality. Food banks and food pantries have proliferated in response to an economic emergency. The loss of manufacturing jobs combined with the recession of the early

1980s and Reagan administration cutbacks in federal programs led to an explosion in the growth of food charity. This was meant to be a stopgap measure, but the jobs never came back, and the "emergency food system" became an industry. In *Big Hunger*, Andrew Fisher takes a critical look at the business of hunger and offers a new vision for the anti-hunger movement. From one perspective, anti-hunger leaders have been extraordinarily effective. Food charity is embedded in American civil society, and federal food programs have remained intact while other anti-poverty programs have been eliminated or slashed. But anti-

hunger advocates are missing an essential element of the problem: economic inequality driven by low wages. Reliant on corporate donations of food and money, anti-hunger organizations have failed to hold business accountable for offshoring jobs, cutting benefits, exploiting workers and rural communities, and resisting wage increases. They have become part of a "hunger industrial complex" that seems as self-perpetuating as the more famous military-industrial complex. Fisher lays out a vision that encompasses a broader definition of hunger characterized by a focus on public health, economic justice, and economic democracy. He points to the work of numerous grassroots organizations that are leading the way in these fields as models for the rest of the anti-hunger sector. It is only through approaches like these that we can hope to end hunger, not just manage it.

Community Resources for Older Adults: Programs and Services in an Era of Change, Fourth Edition, by Robbyn Wacker and Karen Roberto, provides an in-depth review of policy and programs for the "aging network," answering such key questions as "How have programs for older adults evolved?" "Who uses these resources?" "How are they delivered?" and "What challenges do service providers face in meeting the needs of the aging baby-boom generation?" To give students the foundational knowledge they need to meet the needs of their older clients, the authors provide a theoretical framework for understanding the forces that shape older adults' likelihood to seek assistance, include in-depth reviews of the current body of empirical literature in each program area, and discuss the challenges programs and services will face in the future.

Report Persistence of Hunger in Prosperous Communities Hearing Before the Select Committee on Hunger, House of Representatives, One Hundred First Congress, Second Session, Hearing Held in Beaverton, OR, May 30, 1990 Hunger and Poverty Among Single Persons Is There a Safety Net for Them? : Hearing Before the Domestic Task Force of the Select Committee on Hunger, House of Representatives, One Hundred First Congress, First Session, Hearing Held in Washington, DC, June 15, 1989 This hearing examines the situation of single persons living in poverty in the United States. Concern is expressed that public assistance programs are not meeting the needs of poverty-stricken single persons. Unemployment, hunger, medical needs, and housing are some of the topics discussed. New Tools to End Hunger Penguin

In the US, food banks and pantries provide billions of meals a year to people in need. And yet hunger still affects one in nine Americans. What are we doing wrong? In *Reinventing Food Banks and Pantries*, Katie Martin presents a new model for charitable food, one where success is measured not by pounds of food distributed but by lives changed. The key is shifting our focus from a lack of food to strategies that build empathy, equity, and political will. Martin shares solutions in a warm, engaging style, with simple steps that anyone working or volunteering at a food bank or pantry can take today. Solutions range from providing client choice, where individuals select their own food with dignity, to offering job training programs and joining the fight for a living wage. As Martin writes, it takes more than food to end hunger. Picking up this insightful, lively book is a great first step.

Cropland has been shifting to larger farms. The shifts have been large, centered on a doubling of farm size over 20-25 years, and they have been ubiquitous across States and commodities. But the shifts have also been complex, with land and production shifting primarily from mid-size commercial farming operations to larger farms, while the count of very small farms increases. Larger crop farms still realize better financial returns, on average, and they are able to make more intensive use of their labor and capital resources, indicating that the trends are likely to continue. The report relies on comprehensive farm-level data to detail changes in farm size and other attributes of farm structure, and to evaluate the key driving forces, including technologies, farm organization and business relationships, land attributes, and government policies.

Effects of Food Assistance and Nutrition Programs on Nutrition and Health SAGE Publications

In this era of eroding commitment to government sponsored welfare programs, voluntarism and private charity have become the popular, optimistic solutions to poverty and hunger. The resurgence of charity has to be a good thing, doesn't it? No, says sociologist Janet Poppendieck, not when stopgap charitable efforts replace consistent public policy, and poverty continues to grow. In *Sweet Charity?*, Poppendieck travels the country to work in soup kitchens and "gleaning" centers, reporting from the frontlines of America's hunger relief programs to assess the effectiveness of these homegrown efforts. We hear from the "clients" who receive meals too small to feed their families; from the enthusiastic volunteers; and from the directors, who wonder if their "successful" programs are in some way perpetuating the problem they are struggling to solve. Hailed as the most significant book on hunger to appear in decades, *Sweet Charity?* shows how the drive to end poverty has taken a wrong turn with thousands of well-meaning volunteers on board.

Geographic Distribution of Federal Funds in Idaho

The Food, Conservation, and Energy Act of 2008 directed the U.S. Dept. of Agr. to conduct a 1-year study to assess the extent of areas with limited access to affordable and nutritious food, identify characteristics and causes of such areas, consider how limited access affects local populations, and outline recommendations to address the problem. This report presents the findings of the study, which include results from two conferences of national and international authorities on food deserts and a set of research studies. It also includes reviews of existing literature, a national-level assessment of access to large grocery stores and supermarkets, analysis of the economic and public health effects of limited access, and a discussion of existing policy interventions.
