MAXIM HATFIELD

Treating the Adolescent in Family Therapy Routledge

1. Psychodynamic, experiential, behavioral, structural, and strategic approaches 2. Systemic and narrative approaches 3. How to start up the work 4. Middle phase of therapy: interventions for adolescents and their parents 5.

Interventions for long term therapy and consultations 6. The perpetual adolescent: Families stuck in adolescence, or "we're a family that won't grow up." 7. The absent adolescent: Treating the couple when the adolescent is not present 8. Understanding the stories of clinicians who treat adolescents and their families 9. Cultural and scientific stories about adolescence. **Counseling the Adolescent** American Psychological Association (APA) Adolescence can be a difficult time for all

concerned. Issues such as high youth unemployment, sexual behaviour and drug abuse have made it a matter of great concern for the community at large, whether as parents, politicians or those working with adolescents in education and welfare. In addition, many parents fear that these problems could affect their own families. Originally published in 1991, the authors explore the complex needs of adolescents emphasising the importance of the family environment in helping adolescents cope with the many difficulties and changes they face during this period of their lives. The central theme is that adolescents, through conflict and

negotiation, establish new but different relationships with their parents, relationships that can endure for a lifetime. The authors provide wide coverage of the key issues of adolescence, such as identity, separation from the family, and conflict, and look closely at the difficulties produced by events such as the divorce and re-marriage of parents, and social problems such as long-term unemployment. With its positive approach to the family and adolescents, this clear, concise and helpful book will be invaluable both to parents and to the many professionals whose work involves them with adolescents. Family Therapy with Adolescents in Residential Treatment

Guilford Press
This innovative book focuses on helping high-risk adolescents and their families rapidly resolve long-standing difficulties. Matthew D. Selekmán spells out a range of solution-focused strategies and other techniques, illustrating their implementation with vivid case examples. His approach augments individual and family sessions with collaborative meetings that enlist the strengths of the adolescent's social network and key helping professionals from larger systems. User-friendly features include checklists, sample questions to aid in relationship building and goal setting, and reproducible forms that

can be downloaded and printed in a convenient 8 1/2" x 11" size. Blending family therapy science with therapeutic artistry, the book significantly refines and updates the approach originally presented in Selekmán's Pathways to Change.

Family Therapy with Suicidal Adolescents

Guilford Press
Rich with clinical wisdom, this successful text and practitioner guide offers a comprehensive framework for treating adolescent problems in the family context. Even as teenagers become increasingly independent, Joseph Micucci shows, they still need parental guidance and nurturance. By strengthening family relationships, clinicians

can alleviate symptoms and promote behavioral change. Vivid examples and session transcripts illustrate specific strategies for treating eating disorders, depression, anxiety, defiance, underachievement, and other frequently encountered challenges. Weaving together family therapy techniques with ideas from psychodynamic and cognitive-behavioral approaches, the book has a pragmatic focus on effective interventions for getting adolescent development back on track. New to This Edition *Thoroughly updated to reflect current research and reader feedback. *Chapter on adolescent anxiety disorders.

*Expanded coverage of attachment issues; lesbian, gay, and bisexual youth; and racial and ethnic identity. *New case material, one of the book's most popular features.

The Handbook of Systemic Family Therapy, Systemic Family Therapy with Children and Adolescents

John Wiley & Sons

A detailed look at how to apply clinical theories to social work practice Thinking through real-life cases to make connections between theory and practice is a crucial element of social work education. Now in its Second Edition, Case Studies in Child, Adolescent, and Family Treatment contains a wide range of cases described in rich detail

by practitioners, scholars, and researchers. Chapters represent contexts and approaches across the social work spectrum, so students will get to glimpse into the clinical experience of a full range of professionals. With chapter overviews, case sketches, study questions, and references for further study, this book makes an invaluable reference for social work students. Learning by example is the best way to develop the skill of clinical reasoning. Editors Craig W. LeCroy and Elizabeth K. Anthony—two distinguished scholars in the field of social work—have brought together an impressive roster of contributors who add their unique voices and clinical

perspectives into their insightful case descriptions. Organized into five thematic sections, Case Studies in Child, Adolescent, and Family Treatment, Second Edition covers the most important areas in social work practice, including: Child welfare and adoption Individual and group treatment School and community settings Family treatment and parent training With the updates in the Second Edition, students will learn the most current lessons in social work practice from a diverse range of scholars, researchers, and practitioners in the field. In contexts ranging from child welfare to homelessness, this book provides the critical thinking skills

students need to understand how social work theory applies in clinical environments.

Treating Troubled Adolescents Jason Aronson

This popular text helps students and clinicians build essential skills common to all family interventions. The entire process of systemic therapy is richly illustrated with chapter-length case examples. Rather than advocating one best approach, the author shows that there are multiple ways of working, and provides reflection questions and exercises that encourage readers to develop their own clinical style.

Handbook of Clinical Family Therapy Routledge

Rich with illustrative case material, this

book guides mental health professionals to break the cycle of at-risk behavior by engaging adolescents and their families in home, school, and community contexts.

The authors explore the multigenerational patterns that shape the lives of poor and ethnic minority adolescents and present innovative strategies for intervening beyond the walls of the agency or clinic. Grounded in research, the book shows how to implement both home-based family therapy and school-based achievement mentoring to provide a comprehensive web of support. Building on the earlier *Reaching Out in Family Therapy*, this book reflects the ongoing development of the authors'

multisystems approach and many other important changes in the field; the majority of the content is completely new. It is an indispensable resource for beginning and experienced professionals or text for courses on adolescent intervention or adolescent mental health.

The Adolescent in the Family

Psychology Press

This book illuminates the causes of severe adolescent behavioral problems and presents a research-based fifteen-step model for helping families bring about real, lasting change. Incorporating structural and strategic principles, the author's cohesive approach focuses on setting clear rules and consequences; changing the mood and direction of confrontations; neutralizing such problem behaviors as disrespect, truancy, running away, violence, and threats of suicide; and restoring positive, nurturing

relationships among family members. Special treatment issues covered include working with single-parent families, outside systems (peers, school, probation officers), divorce and stepfamily problems, and substance misuse.

Clearly written, practical, and accessible, the book uses actual case examples to demonstrate each step of the approach.

Adolescents at Risk

John Wiley & Sons

This text shows how to design a treatment manual and adherence measure for attachment-based family therapy (ABFT) for adolescent depression and presents data and results on the treatment's efficacy.

Working with High-

Risk Adolescents

Guilford Press

This book describes a blend of insight-oriented, behavioral, and strategic family therapy, which the author has developed over thirty-four years of dealing with suicidal adolescents. It aims not to replace other forms of therapy but to augment the therapist's own therapeutic style. The book offers an informative and personally told story bringing together scholarship and meaningful glimpses into the thought processes of suicidal youth. Written in an understandable, friendly, and practical style, it will appeal to those in clinical practice, as well as graduate-level students pursuing

clinical work.

this book contains systematic discussions of topics and theoretical perspectives, as well as illustrative clinical examples that demonstrate the manner in which principles are applied in Family Focused Therapy.

Intervening in Adolescent Problem Behavior Routledge

This book presents a multilevel intervention and prevention program for at-risk adolescents and their families. Grounded in over 15 years of important clinical and developmental research, the Adolescent Transitions Program (ATP) has been nationally recognized as a best practice for strengthening families and reducing

adolescent substance use and antisocial behavior. The major focus is to support parents' skills and motivation to reduce adolescent problem behavior and promote success. Spelling out the why, what, and how of this proactive, culturally informed intervention, the volume provides a solid scientific framework and all of the materials needed to implement the program in school or community settings. Included are illustrative case examples and an appendix featuring reproducible handouts and forms.

Adolescent in Family Therapy, Second Edition Routledge

"For decades following Alfred Adler's pioneering work in the 1920s, family therapy

enjoyed only a minor or adjunct role among the various treatment approaches in the field of mental health. Recently, however, family therapy has experienced phenomenal growth in impact and popularity. The functional family therapy approach described in this book, a synthesis of interpersonal, behavioral, and systems orientations, represents a new evolutionary step in the treatment of families. It is based on the substantial works of our predecessors and the experience derived from many hours of seeing families in both clinical and research contexts. The goal of this book is to provide a clear description of the procedures and

structure necessary for the successful practice of family therapy. Family therapists need an unambiguous conceptual framework and a set of specific techniques for dealing with families in distress. At the same time, however, they cannot succeed if they are merely technicians. For this reason the book is also designed to enhance the flexibility and creativity therapists need to respond effectively to the myriad needs, idiosyncrasies, and forms of resistance presented by the different families they see. To this end much of the material in the book is presented in a somewhat intuitive manner, often by example and analogy. Part One describes the functional family model

as it generally applies to all families, including the specific conceptual, technical, and interpersonal skills required of all family therapists. Conceptual skills comprise the perspectives therapists need to understand families, as well as the knowledge necessary for developing appropriate therapeutic goals and selecting suitable techniques. Technical skills include the verbal, nonverbal, and physical tools that therapists use as vehicles of change. They represent the technology of what therapists do, based on their conceptual understanding of what needs to be done. Interpersonal skills represent the way therapists apply their techniques. The

efficacy of the techniques depends significantly on the atmosphere and family attitudes created through these interpersonal skills. Part Two is designed to facilitate therapists' flexibility by describing each of the phases of intervention, with emphasis on the goals of each phase, rather than on the specific techniques. Part Two also describes a number of unique developmental and structural aspects of particular families that require specific techniques"--Preface. (PsycINFO Database Record (c) 2008 APA, all rights reserved). *The Therapist's Notebook for Children and Adolescents* Routledge A new printing of a 1975 work by Sugar

presenting 18 papers which present varied techniques and theories as experienced in case studies by the contributors from their own experiences. These papers are a psychoanalytic framework and take cognizance of the structural theory, developmental lines, and phase-specific needs of the adolescent. They are organized into two sections detailing the topic in group therapy and family therapy settings..

Family Therapy for ADHD Oxford University Press, USA
Learn to choose interventions based on the client's developmental stage! Teenagers are often a strain on families, and they can pose

difficulties even in a family therapy setting. Developmental-Systemic Family Therapy with Adolescents integrates research and theory about adolescent development with different approaches to family therapy. By matching the adolescent client's developmental stage and particular issues with the most effective therapeutic approach, this book enables family therapists to tailor their treatment plan to meet each family's unique needs. Developmental-Systemic Family Therapy with Adolescents contains special chapters on such serious teen problems as suicide and alcohol/substance abuse, as well as thoughtful

consideration of such normal issues of development as cognitive stages, identity development, and self-esteem. Interpersonal relationships are also considered, including parenting, peers, and attachment issues. This essential resource offers family therapists suggestions on how to make sessions more relevant to clients who engage in risky sexual behavior, abuse alcohol and drugs, or run away from home. Each chapter includes detailed, down-to-earth discussions of: case examples common presenting problems assessment and treatment issues therapy process dynamics suggestions for developmentally appropriate interventions

Developmental-Systemic Family Therapy with Adolescents examines emotional and cognitive development in adolescents to help therapists improve communication and devise effective methods of treatment. Its well-balanced, pragmatic approach to therapy will help you properly assess your clients and offer them the services they need in a form they can accept.

The Adolescent in Group and Family Therapy Routledge

This book explains how to provide Functional Family Therapy (FFT), a highly successful family intervention for delinquent and substance-using adolescents. FFT systematically alters important risk and

protective factors associated with the problem behaviors. Family Therapy in Clinical Practice Thomson Brooks/Cole

A common question at the initial meeting of a family therapist and a new client(s) is often whether or not to include a child or children in the counseling sessions. The inclusion of a child in the family therapy process often changes the dynamic between client and therapist -- and between the clients themselves -- within the context of the counseling sessions. And yet, although this is such a common experience, many counselors and family therapists are not adequately equipped to advise parents on whether to include a child in

therapy sessions. Once the child does make an appearance in the counseling session, the therapist is faced with the challenges inherent in caring for a child, in addition to many concerns due to the unique circumstance of the structured therapy. Counseling a child in the context of a family therapy session is a specific skill that has not received the attention that it deserves. This book is intended as a guide for both novice and experienced counselors and family therapists, covering a wide range of topics and offering a large body of information on how to effectively counsel children and their families. It includes recent research on a number of topics including

working with children in a family context, the exclusion of children from counseling, and counselor training methods and approaches, the effectiveness of filial play therapy, the effects of divorce on children, and ADHD. Theoretical discussion is given to different family therapy approaches including family play therapy and filial play therapy. Central to the text are interviews with leaders in the field, including Salvador Minuchin, Eliana Gil, Rise VanFleet and Lee Shilts. A chapter devoted to ethical and legal issues in working with children in family counseling provides a much-needed overview of this often overlooked topic. Chapters include

discussion of specific skills relevant to child counseling in the family context, case vignettes and examples, practical tips for the counselor, and handouts for parents.

Handbook of Adolescents and Family Therapy

Human Sciences Press
In The Therapist's Notebook for Children and Adolescents, 2nd ed, you'll find the most powerful tools available for aiding children with their feelings, incorporating play techniques into therapy, encouraging appropriate parental involvement in family sessions, and providing group therapy to children. This ready reference is divided into ten thoughtfully planned sections to make it easy to find

the right activity, handout, or intervention for the problem at hand, whether you're looking for creative ideas, running a children's group, putting interventions into practice in the classroom, or looking for ways to increase parental and familial involvement. Instructions for the activities are clearly explained and highlighted with case examples and many illustrations. Chapters are by leading experts, including Eliana Gil, Risë VanFleet, Liana Lowenstein, Howard Rosenthal, and Volker Thomas, and explore

strategies for treating children both individually and in a family context. With more than 60% new material, this expanded version delves into the latest research and thinking on family play therapy and addresses many pertinent issues of our time, including bullying, suicidal ideation, ADHD, autism, adolescents and sex, and cultural issues. It's a must-have arsenal for both novice and experienced professionals in family therapy, play therapy, psychology, psychiatry, counseling, education, nursing, and related fields.
