IB Physics: 2.1(b) Projectile Motion Questions Walkthrough *Conceptual Physics-Online-Textbook-Tour AP Physics - Projectile Motion Physics 10 - Chapter 2 - Projectile Motion*
 Conceptual Physics Projectile Motion Answers
 The horizontal component of motion of a projectile is just like the horizontal motion of a ball rolling freely along a level surface without friction. The vertical component of a projectile's velocity is like the motion for a freely falling object. Describe the downward motion of a horizontally launched projectile.

 Tossed Ball A ball tossed upward has initial velocity components 30 m/s vertical, and 5 m/s horizontal. The position of the ball is shown at 1-second intervals. Air resistance is negligible, and $g = 10 \text{ m/s}^2$. Fill in the Concept-Development 5-2 Practice Page
