When Tina S. meets April, a teenage runaway, she thinks she's found her best friend. She leaves behind her dysfunctional family to join April in the tunnels of Grand Central Station amidst the homeless and drug addicted. Soon she's bingeing on crack--just like April--and stealing, scamming and panhandling to

support her habit and to survive on the streets. In her own words, she describes her descent into crack addiction, being raped in the tunnels, her several arrests and jail terms and her grief and guilt over the death of April, whom she'd come to love. Finally faced with the reality that she might not make it through one more day, Tina takes her first difficult steps towards a normal life. With the help of a homeless advocate and his wife, a gay uncle dying of AIDS, and the woman who was to become her co-author on this book, Tina turns her life around and makes her way back to the world of the living.

A magical love story, inspired by the legend of a woman who vanished from Grand Central Terminal, sweeps readers from the 1920s to World War II and beyond. "Readers who enjoyed Audrey Niffenegger's *The Time Traveler's Wife* will be enchanted."—Publishers Weekly "I utterly loved this clever, charming, hopeful tale of true love against all odds."—Ariel

Lawhon, New York Times bestselling author of *I Was Anastasia* On a clear December morning in 1937, at the famous gold clock in Grand Central Terminal, Joe Reynolds, a hardworking railroad man from Queens, meets a vibrant young woman who seems mysteriously out of place. Nora Lansing is a Manhattan socialite and an aspiring artist whose flapper clothing, pearl earrings, and talk of the Roaring Twenties don't seem to match the bleak mood of Depression-era New York. Captivated by Nora from her first electric touch, Joe despairs when he tries to walk her home and she disappears. Finding her again—and again—will become the focus of his love and his life. As thousands of visitors pass under the famous celestial blue ceiling each day, Joe and Nora create a life of infinite love in a finite space, taking full advantage of the "Terminal City" within a city. But when the construction of another landmark threatens their future, Nora and Joe are forced to test the limits of their freedom—and their love. Praise for *Time After Time* "I'll never again set foot in Grand Central Terminal without looking over my shoulder for Nora and Joe, or

marveling at the station itself—a backdrop as intriguing as the love story that unfolds beneath its star-studded ceiling."—Georgia Hunter, New York Times bestselling author of *We Were the Lucky Ones* "In lively prose set against the fascinating history of Grand Central . . . Grunwald asks a compelling question: How long would we stay in one place [for love]?"—Time "The spectacular Lisa Grunwald has written a classic story of fate, true love, art, and chance with truth and beauty. You will want to share it with every reader you know."—Adriana Trigiani, New York Times bestselling author of *Tony's Wife*

A New York Times Notable Book Whether Lee Stringer is describing "God's corner" as he calls 42nd Street, or his friend Suzy, a hooker and "past due tourist" whose infant child he sometimes babysits, whether he is recounting his experiences at Street News, where he began hawking the newspaper for a living wage, then

wrote articles, and served for a time as muckraking senior editor, whether it is his adventures in New York's infamous Tombs jail, or performing community service, or sleeping in the tunnels below Grand Central Station by night and collecting cans by day, this is a book rich with small acts of kindness, humor and even heroism alongside the expected violence and desperation of life on the street. There is always room, Stringer writes, "amid the costume" jewel glitter...for one more diamond in the rough." Two events rise over Grand Central Winter like sentinels: Stringer's discovery of crack cocaine and his catching the writing bug. Between these two very different yet oddly similar activities, Lee's life unwound itself, during the 1980s, and took the shape of an odyssey, an epic struggle to find meaning and happiness in arid times. He eventually beat the first addiction with help from a treatment program. The second addiction, writing, has hold of him still. Among the many accomplishments of this book is that Stringer is able to convey something of the vitality and complexity of a down—and—out life. The reader walks away from it humming its melody, one

that is more wise than despairing, less about the shame we feel when confronted with a picture of those less fortunate, and more about the joy we feel when we experience our shared humanity.

A Geography of Oysters Simon and Schuster

Stop, look, and discover—the streets and parks of Manhattan are filled with beautiful historic monuments that will entertain, stimulate, and inspire you. Among the 54 monuments in this volume are major figures in American history: Washington, Lincoln, Lafayette, Horace Greeley, and Gertrude Stein; more obscure figures: Daniel Butterfield, J. Marion Sims, and King Jagiello; as well as the icons of New York: Atlas, Prometheus, and the Firemen's Memorial. The monuments represent the work of some of America's best sculptors: Augustus Saint Gaudens' Farragut and Sherman, Daniel Chester French's Four Continents, and Anna Hyatt Huntington's José Martí and Joan of Arc. Each monument, illustrated with black-and-white photographs, is located on a map of Manhattan and includes easy-to-follow directions. All the sculptures are considered both as historical mementos

and as art. We learn of furious General Sherman court-martialing a civilian journalist, and also of exasperated Saint Gaudens' proposing a hook-and-spring device for improving his assistants' artistic acuity as they help model Sherman. We discover how Lincoln dealt with a vociferous Confederate politician from Ohio, and why the Lincoln in Union Square doesn't rank as a top-notch Lincoln portrait. Sidebars reveal other aspects of the figure or event commemorated, using personal quotes, poems, excerpts from nineteenth-century periodicals (New York Times, Harper's Weekly), and writers ranging from Aeschylus, Washington Irving, and Frederic-Auguste Bartholdi to Mark Twain and Henryk Sienkiewicz. As a historical account, *Outdoor Monuments of Manhattan: A Historical Guide* is a fascinating look at figures and events that changed New York, the United States and the world. As an aesthetic handbook it provides a compact method for studying sculpture, inspired by Ayn Rand's writings on art. For residents and tourists, and historians and students, who want to spend more time viewing and appreciating sculpture and New York history, this is the

start of a unique voyage of discovery. [Grand Central Winter](#) Fourth Estate An international sensation, Elke Schmitter's explosive debut novel presents a modern-day twist on Madame Bovary. Margarethe can remember very clearly the last time she was happy: she was eighteen, prized for her beauty, and swept off her feet by her wealthy, dashing boyfriend. Then he left her. For the last twenty years she has lived in a provincial German town with her dependable husband, her self-directed daughter, and her adoring mother-in-law. Her life has been one of numbing predictability-until she meets Michael, a married man who stirs her from her resignation, delivering her to heights of rapture only to ignite far more destructive passions. An erotic, psychologically charged thriller narrated with chilling dispassion, Mrs. Sartoris opens a bracing portal onto obsession and the crucible of love.

The Better Angels Penguin First published in 1978, and widely considered to be the sequel to her masterpiece 'By Grand Central Station I Sat Down and Wept', this remarkable book further established Smart's reputation as a

brave and inspirational writer. A still beautiful woman, 31 years old with four children by a faithless lover, cannot break the habit of expectation. She must learn to submit to the cold, bare, unglamorous tenets of reality - the untenable position of love. She must learn to deflect Grand Passion into an acceptance of the rogues and rascals with their radiant faces, who buy her a bitter with borrowed cash. Out of a passionate youth, through pain and harsh revelation, she has attained a maturity - a certain knowledge that the cost of rapture is high and that there is no looking back. Hers is a voice that distils a woman's determination for survival - a voice that rises up from everyday life, from the bus queue, the Underground, the pub - and in Elizabeth Smart's hand is wrought into something magnificent. [When Jackie Saved Grand Central](#) Johns Hopkins University Press+ORM A rich, illustrated - and entertaining -- history of the iconic Grand Central Terminal, from one of New York City's favorite writers, just in time to celebrate the train station's 100th fabulous anniversary. In the winter of 1913, Grand Central Station was officially opened and

immediately became one of the most beautiful and recognizable Manhattan landmarks. In this celebration of the one hundred year old terminal, Sam Roberts of The New York Times looks back at Grand Central's conception, amazing history, and the far-reaching cultural effects of the station that continues to amaze tourists and shuttle busy commuters. Along the way, Roberts will explore how the Manhattan transit hub truly foreshadowed the evolution of suburban expansion in the country, and fostered the nation's westward expansion and growth via the railroad. Featuring quirky anecdotes and behind-the-scenes information, this book will allow readers to peek into the secret and unseen areas of Grand Central -- from the tunnels, to the command center, to the hidden passageways. With stories about everything from the famous movies that have used Grand Central as a location to the celestial ceiling in the main lobby (including its stunning mistake) to the homeless denizens who reside in the building's catacombs, this is a fascinating and, exciting look at a true American institution.

Uncertain Places Penguin

Aggie May, newly and unhappily retired from teaching, fears dementia when she begins to see visions from the past, like a 1950s-era Super Constellation at JFK airport and World War II soldiers at Grand

Central Terminal. Then she gets a recruitment visit from Abe Irving of the American Association of Remarkable Persons ("the other AARP") who explains she has developed the ability to travel through time. Soon Aggie joins other "Remarkables" on a mission to nineteenth-century New York City in an effort to locate a missing photographic portrait of Abraham Lincoln created by the Civil War photographer Mathew Brady. While learning the rules and limits of time travel, Aggie faces the possibility that she may have both extraordinary power and extraordinary vulnerability. Aggie and Abe, two stubborn and independent people, must struggle to come to an understanding over how and when to take risks, including emotional risks.

With her newest Alexandra Cooper novel, Terminal City, New York Times bestselling author Linda Fairstein delivers another breakneck thriller that captures the essence of New York City—its glamour, its possibilities, and its endless capacity for darkness. Linda Fairstein is well-known for illuminating the dark histories in many of

New York's forgotten corners—and sometimes in the city's most popular landmarks. In Terminal City, Fairstein turns her attention to one of New York's most iconic structures—Grand Central Terminal. From the world's largest Tiffany clock decorating the 42nd Street entrance to its spectacular main concourse, Grand Central has been a symbol of beauty and innovation in New York City for more than one hundred years. But “the world's loveliest station” is hiding more than just an underground train system. When the body of a young woman is found in the tower suite of the Waldorf Astoria—one of the most prestigious hotels in Manhattan—Assistant DA Alex Cooper and Detectives Mike Chapman and Mercer Wallace find themselves hunting for an elusive killer whose only signature is carving a carefully drawn symbol into his victims' bodies, a symbol that bears a striking resemblance to train tracks. When a second body bearing the same bloody symbol is discovered in a deserted alleyway right next to the terminal building, all attention shifts to the iconic transportation hub, where the potential for a bigger attack weighs heavily on

everyone's minds. With the President of the United States set to arrive for a United Nations meeting at the week's end, Alex and Mike must contend with Grand Central's expansive underground tunnels and century-old dark secrets—as well as their own changing relationship—to find a killer who appears to be cutting a deadly path straight to the heart of the city.

The Manhattan skyline is one of the great wonders of the modern world. But how and why did it form? Much has been written about the city's architecture and its general history, but little work has explored the economic forces that created the skyline. In *Building the Skyline*, Jason Barr chronicles the economic history of the Manhattan skyline. In the process, he debunks some widely held misconceptions about the city's history. Starting with Manhattan's natural and geological history, Barr moves on to how these formations influenced early land use and the development of neighborhoods, including the dense tenement neighborhoods of Five Points and the Lower East Side, and how these early decisions eventually impacted the location

of skyscrapers built during the Skyscraper Revolution at the end of the 19th century. Barr then explores the economic history of skyscrapers and the skyline, investigating the reasons for their heights, frequencies, locations, and shapes. He discusses why skyscrapers emerged downtown and why they appeared three miles to the north in midtown-but not in between the two areas. Contrary to popular belief, this was not due to the depths of Manhattan's bedrock, nor the presence of Grand Central Station. Rather, midtown's emergence was a response to the economic and demographic forces that were taking place north of 14th Street after the Civil War. *Building the Skyline* also presents the first rigorous investigation of the causes of the building boom during the Roaring Twenties. Contrary to conventional wisdom, the boom was largely a rational response to the economic growth of the nation and city. The last chapter investigates the value of Manhattan Island and the relationship between skyscrapers and land prices. Finally, an Epilogue offers policy recommendations for a resilient and robust future skyline.

Grand Central Terminal National Geographic Books

At the stroke of midnight on February 2, 1913, Grand Central Terminal opened for business in New York City. At the time, it was the largest and most luxurious station in the world. Throughout the day, more than 150,000 people pushed through its shiny doors. They gasped at the building's size, beauty, and technological wonders. After seeing it, a reporter called it "the greatest station, of any type, in the world." Grand Central Terminal traces the incredible story of one of the most beautiful and iconic buildings in the United States. The book describes how the massive train station was built and how it utilized smart design and cutting-edge technology to accommodate millions of travelers. Large color photos, maps, and fact boxes enrich the captivating story. Grand Central Terminal is part of Bearport's American Places series.

"Meeting at Grand Central brings together insights from evolutionary biology, political science, economics, anthropology, and other fields to explain how the interactions

between our evolved selves and the institutional structures we have created make cooperation possible. The book begins with a look at the ideas of Mancur Olson and George Williams, who shifted the question of why cooperation happens from an emphasis on group benefits to individual costs. It then explores how these ideas have influenced our thinking about cooperation, coordination, and collective action. The book persuasively argues that cooperation and its failures are best explained by evolutionary and social theories working together. Selection sometimes favors cooperative tendencies, while institutions, norms, and incentives encourage and make possible actual cooperation."--Publisher's website.

- Examines topics that evoke widespread misunderstanding, including the real history of secret societies, the wisdom of the Satanic, Gnosticism, Hermeticism, out-of-body experience, and the contemporary war on witches • Looks at the influence of the founding lights of modern occultism, including mystic Neville Goddard, occult scholar Manly P. Hall, and surrealist filmmaker David Lynch, and debunks

famous pseudo-skeptics such as the Amazing Randi • Explores magickal practices, including Anarchic Magick, mind metaphysics, the Law of Attraction, and Ouija boards, and upends hallowed spiritual concepts like forgiveness All of us today dwell in uncertain places--realities in which thoughts make things happen, ESP is provable by the scientific methods once used to debunk it, UFOs are mainstream, and magick no longer requires rite and ritual but is as near as your own mind. Today's leading voice of esotericism and the occult, Mitch Horowitz explores topics that evoke widespread misunderstanding, including the real history of secret societies, the wisdom of the Satanic, the relevance of Gnosticism, and the slender but authentic connection between today's spiritual culture and antiquity, including in areas of Hermeticism, deity worship, out-of-body experience, and magick. He demonstrates the occult roots of wide-ranging facets of modern culture, including politics, abstract art, mind-body healing, self-help, and breakthrough scientific fields such as quantum physics and neuroplasticity. He looks at the influence of the founding lights of modern

occultism, including mystic Neville Goddard, occult scholar Manly P. This book takes a closer look at the diversity of fiction writing from Diderot to Markson and by so doing call into question the notion of a singular “theory of fiction,” especially in relation to the novel. Unlike Forster’s approach to “Aspects of the Novel,” which implied there is only one

kind of novel to which there may be an aspect, this book deconstructs how one approach to studying something as protean as the novel cannot be accomplished. To that end, the text uses Diderot’s *This Is Not A Story* (1772) and David Markson’s *This Is Not A Novel* (2016) as a frame and imbedded within are essays on De Maistre’s *Voyage Around My Room* (1829), Machado de Assis’s *Posthumous Memoirs Of Braz Cubas* (1881), André Breton’s *Nadja* (1928) and Elizabeth Smart’s *By Grand Central Station I Sat Down And Wept* (1945).
