This book can be a  
godsend for many  
persons--for those who  
suffer from alcohol  
addiction, for their friends  
and loved ones, and for  
those in the relevant  
helping professions. Its  
central message is that  
alcoholism is primarily a

metabolic disease that  
should be treated with  
due consideration of its  
physiological roots. The  
old moralistic approach  
and the more recent  
behavioral and  
psychological treatment  
approaches have a dismal  
record of failure, largely  
because they pay little or

no attention to the crucial physiological and nutritional needs of alcoholics.
