 interfaceUltiboard Basics - National InstrumentsNI Multisim and NI
 Ultiboard provide an integrated platform to design, simulate and
 lay out a complete Printed Circuit Board (PCB). The highly flexible
 database manager makes it easy to add a new SPICE simulation
 model, to a custom defined schematic symbol which can then
 transfer an accurate footprint to layout.Creating a Custom
 Component in NI Ultiboard - National ...As such the IR diodes
 have already been placed for you on the PCB (Ultiboard, not
 Multisim) with refdes values of U9 and U10. If your IR LEDs in
 Multisim have refdes values other than U9 and U10, then
 transferring to Ultiboard will result in changes to diode
 placement.PCB Design Part 1: Multisim - Bucknell MakersThe
 Ultiboard is widely used by many professionals, hobbyists and
 students to help them convert their circuit design to PCB layout
 keeping in the same NI software environment. This will save time
 for transferring your design to other CAD tools and re-capturing
 the schematics and laying out PCB in different CAD tool.Ultiboard
 PCB Design Tutorial - raypcb.comIf you want to update your
 layout without redoing everything, use the annotation tools
 (described elsewhere) Or do it like this:-update your schematic, -
 export a netlist (ewnet): tab transfer/export to PCB layout...-then
 in Ultiboard tab: file/import/UB netlist and select your netlist.
 you'll see a list with parts and nets that will be update.Multisim
 and Ultiboard - National InstrumentsHi all, I have a question.
 Ultiboard is installed on my computer at work. However, I want to
 print out the PCB layout from my computer at home (no Ultiboard
 installed). Is it possible? By the way, does anyone know how to
 transfer from Ultiboard to P-CAD PCB? Thanks,Harrisonprint out
