Principles of Real Estate Practice in North Carolina: 2nd Edition Update

McGraw-Hill/Irwin

Features of North Carolina Real Estate License Exam Prep, 3rd Edition (NC-RELEP): National Principles & Law Key Point Review (60 pages) Real Estate Math Key Formula Review & Practice (20 pages) North Carolina-Specific Laws and Regulations Key Point Review (42 pages) National Practice Tests (500 questions) North Carolina Practice Tests (130 questions) North Carolina Sample Exam (105 questions) We know the real estate licensing exam can be tough, and very nerve-wracking to prepare for. That's why we created the North Carolina Real Estate License Exam Prep (NC-RELEP) the way we did. Since we have been managing real estate schools and developing curriculum for forty years, we know how all this works

– or fails to work. NC-RELEP is comprehensive in that it contains both key content review and testing practice. And the text review is North Carolina-specific – not just simplistic national content, but terse, relevant and accurate North Carolina laws and regulations presented as a well-organized set of state 'key point reviews' ideal for pre-test memorization. But let's not dismiss the importance of the national content either. NC-RELEP's national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook, Principles of Real Estate Practice – one of the most widely used principles textbooks in the country. Finally, our national content, as well as our question selection, is further tailored to the state testing outline promulgated by

PSI for North Carolina. Thus the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state's testing service and your North Carolina license exam. A word about the test questions... NC-RELEP's testing practice section consists of ten national practice tests, three state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length and the sample test is 105 questions. The test questions are designed to cover the content covered by the law reviews - which reinforces your learning of the total body of information tested by your state exam. The questions are direct, to the point, and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question's answer is accompanied by a brief explanation, or "rationale" to further reinforce your understanding. In the end, as you know, it's all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your North Carolina real estate exam. So good luck!!

Brealey, Principles of Corporate Finance 13e describes the theory and practice of corporate finance. We hardly need to explain why financial managers must master the practical aspects of their job, but we should spell out why down-to-earth managers need to bother with theory. Throughout this edition, the authors demonstrate how managers use financial theory to solve practical problems. They also explore what financial managers should do to increase company value. Some of the biggest changes in this edition were prompted by the tax changes enacted in the U.S. Tax Cuts and Jobs Act passed in December 2017.

Real Estate Principles: A Value Approach demonstrates how value is central to virtually all real estate decision-making. Students using Ling and Archer should finish the course with a value-oriented framework and a set of valuation and decision making tools that can be applied in a variety of real-world situations. The key to making sound investment decision

is to understand how property values are created, maintained, increased or destroyed. Since the launch of Real Estate Principles: A Value Approach, significant and lasting changes have come upon the world of real estate. This is very true in real estate finance and capital sources where most of the traditional lenders have been transformed or displaced, giving way

to a radically different set of players in mortgage finance. There has been change with profound and far-reaching implications in a world where it is understandable that property values can go down as well as up. This realization will color every aspect of real estate investment, finance and transactions for the foreseeable future.
