A Monster Calls Harper Collins

Jenna Fischer's Hollywood journey began at the age of 22 when she moved to Los Angeles from her hometown of St. Louis. With a theater degree in hand, she was determined, she was confident, she was ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a professional actor was so much more vast and competitive than she'd imagined. It would be eight long years before she landed her iconic role on *The Office*, nearly a decade of frustration, struggle, rejection and doubt. If only she'd had a handbook for the aspiring actor. Or, better yet, someone to show her the way—an established actor who could educate her about the business, manage her expectations, and reassure her in those moments of despair. Jenna wants to be that person for you. With amusing candor and wit, Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable and hilarious experiences. She tells you how to get the right headshot, what to look for in representation, and the importance of joining forces with

other like-minded artists and creating your own work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for certain scams (auditions in a guy's apartment are probably not legit—or at least not for the kind of part you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey, and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards the life of a professional actor.

The Boy at the Back of the Class Yearling

A tried and tested approach to mathematics assessment for ages 5-14. Nationally standardised on over 12,500 pupils, MaLT can be used at any time during the school year - for screening, monitoring and tracking progress, as well as for individual diagnostic profiling. Available in both pencil-and-paper and interactive computer-adaptive (CAT) formats, these nationally standardised tests - for groups or individuals - also yield diagnostic information which will directly support individual and whole-class teaching. - MaLT Test booklet 7 - for Year 2 (Scottish P3, Northern Ireland Year 3) with norms for chronological ages 6:0 to 8:5 (NC levels W-21) - Purpose-written to highlight particular errors and misunderstandings which are diagnostic of key learning needs - counting errors, misconceptions with decimals, etc - Simple structure makes it easy for you to assess your pupils and get the information you need - Key Stage 1 Teacher Manual contains all the key information in one place for MaLT tests 5-7 - One Scorer/Profiler CD-ROM for use with all the tests. This makes it easier to record and monitor year-on-year progress across ages 5-14. It also enables you to mark all of the pencil-and-paper tests on-screen - All questions are mapped to the current strands and objectives, to make it easy to see how well your pupils are performing and to provide the information you need - Provides the summative measures of performance needed for

screening, monitoring and progress assessment. MaLT tests have been standardised nationally, ensuring secure, reliable results MaLT Year-on-Year Tests - Take only 45 minutes to test a whole class - Samples the full range of mathematical skills appropriate to each year group - MaLT Tests 5-7 are presented orally to minimise reliance on reading, so that pupils with reading difficulties are not disadvantaged

When they first arrived, they came quietly and stealthily as if they tip-toed into the world when we were all looking the other way. Ade loves living at the top of a tower block. From his window, he feels like he can see the whole world stretching out beneath him. His mum doesn't really like looking outside but it's going outside that she hates. She's happier sleeping all day inside their tower, where it's safe. But one day, other tower blocks on the estate start falling down around them and strange, menacing plants begin to appear. Now their tower isn't safe anymore. Ade and his mum are trapped and there's no way out . . .

Why are girls outperforming boys in literacy skills in the Western education system today? To date, there have been few attempts to answer this question. Literacy and Gender sets out to redress this state of affairs by re-examining the social organization of literacy in primary schools. In studying schooling as a social process, this book focuses on the links between literacy, gender and attainment, the role school plays in producing social difference and the changing pattern of interest in this topic both within the feminist community and beyond. Gemma Moss argues that the reason for girls' relative success in literacy lies in the structure of schooling and in particular the role the reading curriculum plays in constructing a hierarchy of learners in class. Using fine-grained ethnographic analysis of reading in context, this book outlines methods for researching literacy as a social practice and understanding how different versions of what counts as literacy can be created in the same site.

Written in an accessible and engaging style, this second edition of *The Psychology of Education* addresses key concepts from psychology which relate to education. Throughout the text the author team emphasise an evidence-based approach, providing practical suggestions to improve learning outcomes, while fictional case studies are used in this new edition to provide students with a sense of what psychological issues can look like in the classroom. Activities around these case studies give students the chance to think about how to apply their theoretical knowledge to these real-world contexts. 'Key implications' are drawn out at appropriate points, and throughout the book students are provided with strategies for interrogating evidence. Key terms are glossed throughout the book and chapters are summarised and followed by suggestions for further reading. A chapter on Learning interactions and social worlds is new to this edition. The following chapters have all

been extensively updated: Learning Assessment Individual differences and achievement Student engagement and motivation The educational context Society and culture Language Literacy Inclusive education and special educational needs Behaviour problems Dealing with behaviour problems. This book is essential reading for undergraduate students of Education Studies and Psychology as well as trainee teachers on BA, BEd and PGCE courses. It will also be of use to postgraduates training to be educational psychologists.
