Interpersonal Rejection

Routledge
The Andromache has
long been disparaged
despite being a brilliant
piece of theatre. In this
book Dr Allan draws

attention to the neglected artistry of this very impressive and intriguing text. Through careful analysis the *Andromache* emerges as a play that poses fundamental questions, especially about the polarity of Greek and barbarian, and the morality of the gods. Dr Allan shows how the play also challenges revenge as a motive for action, and explores the role of women as wives, mothers, and victims of war, be they Greek or Trojan, victorious or defeated. These are among the central concerns that make the *Andromache* a moving and thought-provoking tragedy, full of suffering, suspense, and moral interest. This book contributes both to an appreciation of the *Andromache* in

its own right, and to a wider understanding of the variety and quality of Euripides' uvre. The chapters in this book are of two styles: Essays describing what changes will be happening Stories that put a deeply human twist on the ramifications of these changes This is the second book about what will people be experiencing, thinking about, and aspiring for in the 2050s.

Interpersonal rejection ranks among the most potent and distressing events that people experience. Romantic rejection, ostracism, stigmatization, job termination, and other kinds of rejections have the power to compromise the quality of people's lives. As a result, people are highly motivated to avoid social rejection, and, indeed, much of human behavior appears to be designed

to avoid such experiences. Yet, despite the widespread effects of real, anticipated, and even imagined rejections, psychologists have devoted only passing attention to the topic, and the research on rejection has been scattered throughout a number of psychological subspecialties (e.g., social, clinical, developmental, personality). In the past few years, however, we have seen a surge of interest in the effects of interpersonal rejection on behavior and emotion. The goal of this book is to pull together the contributions of several scholars whose work is on the cutting edge of rejection research, providing a scholarly

yet readable overview of recent advances in the area. In doing so, it not only provides a look at the current state of the area but also helps to establish the topic of rejection as an identifiable area for future research. Topics covered in the book include: ostracism, unrequited love, betrayal, stigmatization, rejection sensitivity, rejection and self-esteem, peer rejection in childhood, emotional responses to rejection, and personality moderators of reactions to rejection. *The Love Styles and Reactions to Romantic Betrayal* Basic Books George Orwell's famous satire of the Soviet Union, in which "all animals are equal but some animals are more equal than

others.”

This book explores the recall of the Victorians, displayed by select novels ranging in time from Rhys's *Wide Sargasso Sea* (1996) to A. S. Byatt's *Possession: A Romance* (1990). These Victorianist novels are complex studies of Victorian literature, society and modes of representation.

Fictional Styles of George Orwell

This volume considers strategies, modalities, and styles of media use and reception. Dynamic changes in media technology and infrastructure have spurred important changes in media use. Looking at these developments within the common conceptual framework of reception strategies, modes and styles of media use and reception, this volume is highly relevant against the background of the changing media environment. When it comes to media use

and reception, communication research has mainly dealt with two much-cited questions: What do the media do with the people? What do the people do with the media? In comparison, the discipline has devoted less attention to how the media are used, the modalities, patterns or configurations of the actual practices of media use. The volume features original contributions, both empirical and theoretical, on the key concepts and approaches in the field, covering old and new media and different types of media content. Offering a comprehensive overview of existing research as well as promoting original findings and insights,

the volume will be of interest to communication researchers, students, and scholars.

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward

to. We have killed our past and are busy killing our future."--

 As commonly understood, professional ethics consists of shared duties and episodic dilemmas--the responsibilities incumbent on all members of specific professions joined together with the dilemmas that arise when these responsibilities conflict. Martin challenges this "consensus paradigm" as he rethinks professional ethics to include personal

commitments and ideals, of which many are not mandatory. Using specific examples from a wide range of professions, including medicine, law, high school teaching, journalism, engineering, and ministry, he explores how personal commitments motivate, guide, and give meaning to work.
How We Use the Media Greenwood Publishing Group
 Styles of Extinction: Cormac McCarthy's *The Road* brings together several leading literary scholars, one major philosopher, as well as a handful of emerging critical voices, all of whom deploy their own specialist methods in order to think through this bestselling, Zeitgeist-defining

event of contemporary literature. There are two dominant modes of analysis gathered here: the first, performed by Julian Murphet, Paul Sheehan, and Mark Steven, is to locate the novel within its political, spiritual, and economic climates; the second, whose exponents include Paul Patton, Sean Pryor, Chris Danta, and Grace Hellyer, deals with the formal dimensions of McCarthy's characteristically brilliant prose in relation to its sparse narrative. By coupling historically sensitive analysis with incisive formal criticism, the contributors not only account for the matchless form of this exemplary novel; they also suggest that *The Road* has something unique to disclose

about the world we inhabit.

With contributions from prominent experts, this pragmatic book takes a close look at the nature of complex psychological trauma in children and adolescents and the clinical challenges it presents. Each chapter shows how a complex trauma perspective can provide an invaluable unifying framework for case conceptualization, assessment, and intervention amidst the chaos and turmoil of these young patients' lives. A range of evidence-based and promising therapies are reviewed and illustrated with vivid case vignettes. The volume is grounded in clinical innovations and

cutting-edge research on child and adolescent brain development, attachment, and emotion regulation, and discusses diagnostic criteria, including those from DSM-IV and DSM-5. See also Drs. Courtois and Ford's edited volume *Treating Complex Traumatic Stress Disorders (Adults) and their authored volume, Treatment of Complex Trauma: A Sequenced, Relationship-Based Approach. Applied Social Psychology BoD - Books on Demand* Using new technology, recently discovered documents and sophisticated investigative techniques, an international team-led by an obsessed retired

FBI agent-has finally solved the mystery that has haunted generations since World War II: Who betrayed Anne Frank and her family? And why? Over thirty million people have read *The Diary of a Young Girl*, the journal teen-aged Anne Frank kept while living in an attic with her family and four other people in Amsterdam during World War II, until the Nazis arrested them and sent them to a concentration camp. But despite the many works-journalism, books, plays and novels-devoted to Anne's story, none has ever conclusively explained how these eight people managed to live in hiding undetected for over two years-and who or what finally brought

the Nazis to their door. With painstaking care, retired FBI agent Vincent Pankoke and a team of indefatigable investigators pored over tens of thousands of pages of documents—some never before seen—and interviewed scores of descendants of people familiar with the Franks. Utilizing methods developed by the FBI, the Cold Case Team painstakingly pieced together the months leading to the infamous arrest—and came to a shocking conclusion. *The Betrayal of Anne Frank: A Cold Case Investigation* is the riveting story of their mission. Rosemary Sullivan introduces us to the investigators, explains the behavior of both the captives and their captors and profiles a group of

suspects. All the while, she vividly brings to life wartime

Amsterdam: a place where no matter how wealthy, educated, or careful you were, you never knew whom you could trust.

What sets *The Theological Intentions of Mark's Literary Devices* apart from other books? What niche does it fill that makes its publication important? This volume will interest all those who value a literary approach to the Gospel of Mark. Dean Deppe introduces some new literary devices in the research of the Gospel of Mark as well as demonstrates the theological intentions of Mark when he

employs these literary devices. Deppe argues that Mark employs the literary devices of intercalation, framework, allusionary repetitions, narrative surprises, and three types of mirroring to indicate where he speaks symbolically and metaphorically at two levels. Mark employs these literary devices not just for dramatic tension and irony, but also for theological reasons to apply the Jesus tradition to specific problems in his own day.

No other book in the New Testament compares to John in its complexity of style and structure. So many factors confuse Johannine scholars, including the complexity of styles, repetition, duplication, and seemingly distracted structures that are difficult to discern. Sourcebook of the Structures and Styles in John 1-10 is designed to scrutinize the structures and styles in John 1-10, reading John according to John's way, with the following integrated points of view: First, this reading is indebted to both diachronic and synchronic approaches. Second, macro structure and micro style are treated

together and interactively. Third, specific and overall analyses are made together. Fourth, grammatical and relational considerations are brought together. Fifth, syntactic, semantic, and pragmatic relations are considered all together. Sixth, both parallelisms and chiasms (including their variations) are examined, whether in macro structure or in micro style, without excluding either. Seventh, all types of parallelisms and chiasms are examined, whether simple or complex. Eighth, ancient and modern ways in writing-reading processes complement each other. Ninth, Western and Eastern perspectives become

complementary. Tenth, the Greek text and its English version (by the author) are used interactively. Eleventh, analysis and discussion are brought to complement one another.

Remediating deficits and managing disabilities has been a central preoccupation for clinical psychologists for much of the past 50 years. Positive psychology, in contrast, is concerned with the enhancement of happiness and well-being, involving the scientific study of the role of personal strengths and positive social systems in the

promotion of optimal well-being. The central themes of positive psychology, including happiness, hope, creativity, and wisdom,

are all investigated in this book in the context of their possible applications in clinical practice. (Midwest).
