This book is meant to cover a basic topology course for undergraduates and I found it very approachable even with my limited background in pure math. Moreover, being about 200 pages long and published by Dover, it costs the equivalent of a cheap lunch. The exercises are (so far) not very long and complicated, so I just attempted to write and scan them as I go and post in batches. Solutions to B. Mendelson: Introduction to Topology ... In the second chapter Professor Mendelson discusses metric spaces, paying particular attention to various distance functions which may be defined on Euclidean n -space and which lead to the ordinary topology.
