The implementation of a TMS solution is a highly complex and mission critical project. If executed correctly a good TMS can deliver a number

of benefits to the organization in terms of optimization, greater efficiency, reduced errors and improved revenue through accurate invoicing. However a number of projects fail to realize these benefits for a host of reasons such as an incorrect product selection, over customization of the system and lack of detailed processes. The evaluation and selection of the right transportation management system is a very critical step in the successful implementation of a TMS product as well as ensuring that the organization is able to realize the benefits expected from the system. Transportation Management with SAP TM 9 is a guide for CIO/CXOs evaluating options for various transportation management solutions available in the market and helps in inappropriate decision making before committing investment. A proven evaluation framework and guidance provided in the book can help decision makers with product selection and help to create a business case for management approval and design a future roadmap for the organization. The book

provides a comprehensive understanding of what SAP transportation management is and is useful for teams involved in TM Implementation and roll outs to ensure preparedness. The book explains end-to-end freight life cycle processes, functional system landscape, implementation challenges and post go-live precautions required to optimize investments in SAP TM. *Transportation Management with SAP TM 9* also acts as a step by step implementation guide with details of configuration required to set up a TM9 system. This book also covers the upgrade of SAP TM8 to SAP TM9 which will be useful for existing clients who are on TM 8. Nonavailability of SAP TM skilled resources is a major challenge faced by organizations and the book provides a detailed competency building plan along with skill set requirements to create a competent and trained workforce to manage-transformation. The current book available in the market on SAP TM is based on Version 6 release which does not cover air freight processes. Our book covers end-to-end air

freight configuration scenarios for logistic companies.

This book, *SAP FICO Black Book*, brings to you a simple to the point non-technical jargon free discussion on SAP FICO along with comprehensive real life examples based on authors real life implementations. One of the first FICO books which cover business cycles rather than plain technical configuration. Targeting intermediate and advanced-level readers, this book discusses Implementation Tools; Enterprise Structure; New GL Configuration; Online Document Splitting; AR; AP; AA; Bank accounting; Integration of FI with Other Modules; Business Processes; Controlling; Cost Center Accounting; Product Costing; Material Ledger Configuration and Profit Center Accounting. The author has spent the last 10 years of his career acquiring this knowledge through the trial and error method. It covers the end user as well as technical configuration perspective. It can serve as a starting point for the people who want to comprehend how

the financial and managerial accounting functions in an ERP. Most of the FICO text deals with technical configuration and throws little light on its functional implementation. This book is author s humble attempt to bridge the gap by providing real life scenarios along with technical details. *SAP® ERP Financials and FICO Handbook Espresso Tutorials GmbH*

A Practical Guide to SAP S/4HANA Financial Accounting

SAP Press
Over the last few years,
financial statement
scandals, cases of fraud
and corruption, data
protection violations, and
other legal violations have
led to numerous liability
cases, damages claims,
and losses of reputation.
As a reaction to these
developments, several
regulations have been
issued: Corporate
Governance, the
Sarbanes-Oxley Act, IFRS,
Basel II and III, Solvency II
and BilMoG, to name just
a few. In this book,
compliance is understood
as the process, mapped
not only in an internal

control system, that is
intended to guarantee
conformity with legal
requirements but also
with internal policies and
enterprise objectives (in
particular, efficiency and
profitability). The current
literature primarily
confines itself to mapping
controls in SAP ERP and
auditing SAP systems.
Maxim Chuprunov not
only addresses this
subject but extends the
aim of internal controls
from legal compliance to
include efficiency and
profitability and then well
beyond, because a basic
understanding of the
processes involved in IT-
supported compliance
management processes
are not delivered along
with the software. Starting
with the requirements for
compliance (Part I), he not
only answers compliance-
relevant questions in the
form of an audit guide for
an SAP ERP system and in
the form of risks and
control descriptions (Part
II), but also shows how to
automate the compliance
management process
based on SAP GRC (Part
III). He thus addresses the
current need for solutions
for implementing an
integrated GRC system in
an organization,
especially focusing on the
continuous control
monitoring topics. Maxim

Chuprunov mainly targets compliance experts, auditors, SAP project managers and consultants responsible for GRC products as readers for his book. They will find indispensable information for their daily work from the first to the last page. In addition, MBA, management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment, on GRC in general and its implementation in particular.

Configuring SAP Financial Accounting - Vol. II Jones & Bartlett Learning

This book on 'Configuring SAP General Ledger Accounting' in SAP S/4HANA Finance, covers configuring your SAP system for making use of the important functional areas of SAP General Ledger (G/L) Accounting. As with my other books on SAP, this book also follows a case-study approach to make your learning easy. Efforts have been taken, throughout the book, to guide you step-by-step in understanding how to configure your SAP

system, to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots (from an SAP system) and illustrations to help you 'see' what is being discussed in that activity / step. You will see a lot of additional information, provided across the Chapters and the Sections, to help you comprehend a topic or a configuration setting or a concept better. The entire content of the book, vide various Chapters, has been presented as in SAP IMG (Implementation Guide), for easy reference. You will come across with appropriate menu paths and Transactions, to help you to navigate the various activities. The coverage includes: Case Study SAP General Ledger Accounting: Overview Features & Functionalities Pre-requisites for Configuring SAP G/L Accounting Master Data Business Transactions Periodic Processing Preparation for Productive Start Information System

The book starts with a case study, setting up the tone for further discussions, outlining the various business processes that you will be

configuring towards implementing SAP G/L Accounting for your business. You will come across with the case study brief per configuration activity / step, in each Chapter. We discuss the overview of SAP G/L Accounting, before moving on to discuss its important features and functionalities. You will learn about extensibility, ledger concept, document splitting, parallel accounting, segment reporting, fast close and integration of SAP FI with SAP Controlling. We, then, move on to discuss the pre-requisites for configuring SAP G/L Accounting. Here, you will learn about the important FI general settings and also on how to configure the fields, ledgers and currencies. You will learn more about parallel accounting and the FI integration with CO. While on G/L master data, we discuss the G/L account master data, the profit center master data and segment master data. We bring out, in detail, the preparations that you need to make for creating these master data, besides elaborating their creation and processing. You will, then, be taken to learn about the functionality as well as

the configuration of G/L business transactions, including document splitting, open item clearing, bank account interest calculation, and adjustment posting / reversal. In periodic processing for G/L, you will learn about the various closing operations like check/count, value, reclassify, allocation and carry forward. We, then, discuss the preparations that you need to make for productive start of SAP G/L Accounting system. You will learn about the preparations, in detail, for new implementation, as well as for migration from an existing non-HANA SAP system. Finally, towards the end, we discuss the G/L information system. You will learn about the various G/L reports that are available for your business, including the drilldown reports and reports created with Report Painter / Report Writer. In all, you can use this book as a desktop-reference or a refresher for configuring SAP G/L Accounting. As the Chapters have been progressively elaborated, you will find the book very informative and easy to read.

Espresso Tutorials GmbH SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples,

that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's view of the module's key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples,

Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO. *SAP® ERP Financials and FICO Handbook* Espresso Tutorials GmbH This guide dives into the basic SAP S/4HANA configuration settings for FSCM Credit Management. In this book, noted expert Andrew Okungbowa explains SAP Asset Accounting (FI-AA) in SAP-ERP, including its associated business benefits, and guides you through the considerable complexities of SAP-ERP configuration. Using FI-AA for fixed asset management enables you to manage assets in multinational companies across a broad range of industries and produce reports to meet various

needs in line with legal requirements. Configuring SAP-ERP can be a daunting exercise, however, and there are few resources that address these issues. Asset Accounting Configuration in SAP ERP fills that resource gap by covering the major aspects of SAP FI-AA for anyone with SAP experience and the basic accounting knowledge and bookkeeping skills necessary to apply configuration. It provides configuration explanations in the simplest forms possible and provides step-by-step guidance with illustrations and practical examples. Asset Accounting. Financial Accounting in SAP ERP SAP PRESS This book on 'Configuring SAP Financial Accounting' in SAP S/4HANA Finance (1909), has been published in two volumes: Volume I and Volume II. The Vol. II (this book) covers: Configuring SAP Financial Accounting - Vol. I Case Study (Project Dolphin & Project Starfish) Accounts Receivable and Accounts Payable Contract Accounts Receivable and Payable Bank Accounting Asset Accounting In Vol. I of the title we have covered: SAP HANA SAP S/4HANA SAP S/4HANA Finance Case Study (Project Dolphin & Project Oyster) Enterprise Structure FI Global Settings I (Fields, Ledgers, Fiscal Year, Posting Period, Parallel Accounting, Integration of SAP CO with SAP FI, and Company Code Global Parameters) FI Global Settings II (Documents, Inflation Accounting and Correspondence) FI Global Settings III (Taxes including Extended Withholding Tax) General Ledger Accounting To give you an idea of what has been covered in 'Configuring SAP Financial Accounting - Vol. I', we have captured the details, in this book, in a Chapter-

wise summary of that coverage with configuration highlights that has been discussed in each of those Chapters, from 1 to 9. The book covers Accounts Receivable (FI-A/R) and Accounts Payable (FI-A/P), in detail. It covers customer and vendor accounts, business transactions associated with both FI-A/R and FI-A/P and the information system. In business transactions, you will see topics like incoming invoices, release for payment, payments (outgoing & incoming, manual and automatic), dunning, open item clearing, down payment processing, adjustment posting, interest calculation and closing operations. In Contracts Accounts Receivable and Payable (SAP FICA), with a separate case study (Project Starfish), we discuss the functionality and the configuration required for setting up of SAP FICA for a business. In Bank Accounting (FI-BL), you will learn about bank master data (bank directory, house bank, business partner's bank, bank distribution etc.), bank chains, payment transactions including manual & electronic bank statement, lockbox

processing, cash journal and online payments. The book covers Asset Accounting (FI-AA) in great detail. It covers the organizational structure, structuring fixed assets in FI-AA (including special forms of assets, asset classes etc.), integration of FI-AA with other SAP components including SAP FI-G/L, general & special valuation, depreciation, master data, transactions (like acquisitions, retirements, transfers, capitalization of assets under construction etc.), FI-AA information system, asset data transfer, preparations for going live and overview for experts. As with my other books on SAP, this book also follows a case-study approach to make your learning easy. Efforts have been taken, throughout the book, to guide you step-by-step in understanding how to configure your SAP system, to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots (from an SAP system) and illustrations to help you 'see' what is being discussed in that activity / step.
