Biogeochemical Dynamics at Major River-Coastal Interfaces Left Coast Press

The waters of the Nile are fundamental to life in Egypt. In this compelling ethnography, Jessica Barnes explores the everyday politics of water: a politics anchored in the mundane yet vital acts of blocking, releasing, channeling, and diverting water. She examines the quotidian practices of farmers, government engineers, and international donors as they interact with the waters of the Nile flowing into and through Egypt. Situating these local practices in relation to broader processes that affect Nile waters, Barnes moves back and forth from

farmer to government ministry, from irrigation canal to international water conference. By showing how the waters of the Nile are constantly made and remade as a resource by people in and outside Egypt, she demonstrates the range of political dynamics, social relations, and technological interventions that must be incorporated into understandings of water and its management.

The Nile Basin Metropolitan Museum of Art

Explore the entire history of the ancient Egyptian state from 3000 B.C. to 400 A.D. with this authoritative volume The newly revised Second Edition of A History of Ancient Egypt delivers an up-to-date survey of ancient Egypt's history from its origins to the Roman Empire's banning of hieroglyphics in the fourth century A.D. The book covers developments in all

aspects of Egypt's history and their historical sources, considering the social and economic life and the rich culture of ancient Egypt. Freshly updated to take into account recent discoveries, the book makes the latest scholarship accessible to a wide audience, including introductory undergraduate students. A History of Ancient Egypt outlines major political and cultural events and places Egypt's history within its regional context and detailing interactions with western Asia and Africa. Each period of history receives equal attention and a discussion of the problems scholars face in its study. The book offers a foundation for all students interested in Egyptian culture by providing coverage of topics like: A thorough introduction to the formation of the Egyptian state between the years of 3400 B.C. and 2686 B.C. An exploration of the end of the Old Kingdom

and First Intermediate period, from 2345 B.C. to 2055 B.C. An analysis of the Second Intermediate Period and the Hyksos between 1700 B.C. and 1550 B.C. A discussion of Greek and Roman Egypt between 332 B.C. and A.D. 395. Perfect for students of introductory courses in ancient Egyptian history and as background material for students of courses in Egyptian art, archaeology, and culture, *A History of Ancient Egypt* will also earn a place in the libraries of students taking surveys of the ancient world and those seeking a companion volume to *A History of the Ancient Near East*.

Geography Matters in Ancient Greece

Cotsen Institute of Archaeology Press

This volume presents up-to-date research on the Nile Delta and discusses the challenges involved in and opportunities for improving its productivity. The topics addressed include: groundwater in the Nile Delta and its quality; the mapping of groundwater with remote sensing technologies; land degradation; salt-affected soils; on-farm irrigation; the remediation of agricultural drainage water for sustainable reuse; the use of satellite images to estimate the bathymetry of coastal lakes; the assessment of the Nile Delta coastal zone and its management; its sediment and water quality; and fishing ports, fish and fisheries. The book closes with a review of the latest findings on the Nile Delta and offers conclusions and recommendations for future research to fulfill the requirements for sustainable development. It provides a unique and topical resource for researchers, graduate students and policymakers alike.

The Lived Nile Cambridge University Press
-Could the Grand Canyon's rock layers have formed in a single year of Noah's flood?-Why are there no dinosaur, bird or mammal fossils in the canyon's layers?-How do we know that radiometric dating methods are reliable?-How can we tell what happened in the unobserved past?-How long did it take to carve out the canyon?-Is Young Earth Creationism really biblical? Learn the answers to these questions and more to understand how the Grand Canyon testifies to an old earth. Insights from top geologists, highlighted by stunning photographs, provide a memorable guide to these ancient wonders of creation.

The Nile River Basin Macmillan

A comprehensive, state-of-the-art synthesis of biogeochemical dynamics and the impact of human alterations at major river-coastal interfaces for advanced students and researchers.

Art of Ancient Egypt Getty Publications

After entering an ancient chamber on an

archaeological dig, Cloe Kingsley is sent back in time to the year 1452 B.C. to the Egyptian court of Hatshepsut and into the body of a corrupt priestess, where she is now forced to face her new environment and the challenges it holds. A first novel. *Ralph Masiello's Ancient Egypt Drawing Book* Routledge

This multidisciplinary book by the author of *The Geology of Egypt* is the result of many years of research. It attempts to reconstruct the history of the River Nile from its origins to its present shape and regimen and also to ascertain the amount of water which has been carried by the river during the course of its history. It examines the manner in which this water was utilized in the past and the ways in which it will have to be used in future if the inhabitants of the river basin are to cope with their anticipated needs. Part One traces the geological history of the Nile from the time it started to excavate its valley some six million years ago until the present shape was assumed during the wet period which affected Africa after the retreat of the ice of the last glacial age some 10,000 years ago. Part Two deals with the amount of water that the river and its tributaries carry at present and have carried in the past. Part Three discusses the utilization of the water of the Nile from the time of the first appearance of man in the valley until the present time. It traces man's attempt to harness the river from the earliest time to the building of the Aswan High Dam. The book evaluates the effects of the dam after twenty years of operation. Part Four covers the present water supply-demand balance in each basin state and discusses the future plans of these countries to use the waters of the Nile. The rapidly growing populations and the prolonged droughts of recent years have put pressure upon the available waters of the river.

A Brief History of Egypt Raintree

From about 2000 BCE onward, Egypt served as an important nexus for cultural exchange in the eastern Mediterranean, importing and exporting not just wares but also new artistic techniques and styles. Egyptian, Greek, and Roman craftsmen imitated one another's work, creating cultural and artistic hybrids that transcended a single tradition. Yet in spite of the remarkable artistic production that resulted from these interchanges, the complex vicissitudes of exchange between Egypt and the Classical world over the course of nearly 2500 years have not been comprehensively explored in a major exhibition or publication in the United States. It is precisely this aspect of Egypt's history, however, that *Beyond the Nile*

uncovers. Renowned scholars have come together to provide compelling analyses of the constantly evolving dynamics of cultural exchange, first between Egyptians and Greeks—during the Bronze Age, then the Archaic and Classical periods of Greece, and finally Ptolemaic Egypt—and later, when Egypt passed to Roman rule with the defeat of Cleopatra. *Beyond the Nile*, a milestone publication issued on the occasion of a major international exhibition, will become an indispensable contribution to the field. With gorgeous photographs of more than two hundred rare objects, including frescoes, statues, obelisks, jewelry, papyri, pottery, and coins, this volume offers an essential and inter-disciplinary approach to the rich world of artistic cross-pollination during antiquity.

Modernism on the Nile Springer Science & Business Media

Studies of seals and sealing practices have traditionally investigated aspects of social, political, economic, and ideological systems in ancient societies throughout the Old World. Previously, scholarship has focused on description and documentation, chronology and dynastic histories, administrative function, iconography, and style. More recent studies have emphasized context, production and use, and increasingly, identity, gender, and the social lives of seals, their users, and the artisans who produced them. Using several methodological and theoretical perspectives, this volume presents up-to-date research on seals that is comparative in scope and focus. The cross-cultural and interdisciplinary approach advances our understanding of the significance of an important class of material culture of the ancient world. The volume will serve as an essential resource for scholars, students, and others interested in glyptic studies, seal production and use, and sealing practices in the Ancient Near East, Egypt, Ancient South Asia and the Aegean during the 4th-2nd Millennia BCE.

The Nile Feminist Press at CUNY

In this sequel to their underground bestseller *Witches, Midwives, and Nurses*, Ehrenreich and English document the tradition of American sexism in medicine before and after the turn of the century. Citing numerous 'treatments' and 'rest cures' perpetrated on women through the decades, they analyze the biomedical rationales used to justify sex discrimination.

Ethnic Identities in the Land of the Pharaohs The Rosen Publishing Group, Inc

"[A] comprehensive resource, which

contains texts, posters, slides, and other materials about outstanding works of Egyptian art from the Museum's collection"--Welcome (preliminary page). *Red Nile* Random House Trade Paperbacks Instructions for drawing Egyptian images and symbols.

[Gifts of the Nile](#) Cosimo, Inc.

Ethnic Identities in the Land of the Pharaohs deals with ancient Egyptian concept of collective identity, various groups which inhabited the Egyptian Nile Valley and different approaches to ethnic identity in the last two hundred years of Egyptology. The aim is to present the dynamic processes of ethnogenesis of the inhabitants of the land of the pharaohs, and to place various approaches to ethnic identity in their broader scholarly and historical context. The dominant approach to ethnic identity in ancient Egypt is still based on culture historical method. This and other theoretically better framed approaches (e.g. instrumentalist approach, habitus, postcolonial approach, ethnogenesis, intersectionality) are discussed using numerous case studies from the 3rd millennium to the 1st century BC. Finally, this Element deals with recent impact of third science revolution on archaeological research on ethnic identity in ancient Egypt.

The Rise and Fall of Ancient Egypt

Raintree

This book considers the evidence for actual contacts between Egypt and other early African cultures, and how influential, or not, Egypt was on them.

[The Ancient Egyptian Economy](#) Cambridge University Press

How did the River Nile shape Egyptian life? What is a shaduf and what was it used for? How did the Ancient Egyptians make papyrus paper? *Geography Matters in Ancient Egypt* looks at how the Egyptian Empire changed through time and gives fascinating insights into many different aspects of Egyptian life through its geography. Read about how the Egyptians made use of desert oases, how they found and used resources such as limestone and granite for building pyramids in desert areas, and how early Egyptian settlers who

had decided to build in areas around the River Nile prevented their houses from flooding.

The Nile Macmillan

What have we learnt about the Nile since the mid-1970s, the moment when Julian Rzóška decided that the time had come to publish a comprehensive volume about the biology, and the geological and cultural history of that great river? And what changes have meanwhile occurred in the basin? The human population has more than doubled, especially in Egypt, but also in East Africa. Locally, industrial development has taken place, and the Aswan High Dam was clearly not the last major infrastructure work that was carried out. More dams have been built, and some water diversions, like the Toshka lakes, have created new expanses of water in the middle of the Sahara desert. What are the effects of all this on the ecology and economy of the Basin? That is what the present book sets out to explore, 33 years after the publication of "The Nile: Biology of an Ancient River". Thirty-seven authors have taken up the challenge, and have written the "new" book. They come from 13 different countries, and 15 among them represent the largest Nilotic states (Egypt, Sudan, Ethiopia, Uganda, and Kenya). Julian Rzóška died in 1984, and most of the authors of his book have now either disappeared or retired from research. Only Jack Talling and Samir Ghabbour were still available to participate again.

Over 200 faience objects from museums and collections are shown together with a detailed description of each piece, with a technical glossary, maps and chronological table. Colour photos. Quarto.

A History of Ancient Egypt Cambridge University Press

The Nile is the world's longest river and sustains the livelihoods of millions of people across ten countries in Africa. This book provides unique and up-to-date insights on agriculture, water resources, governance, poverty, productivity, upstream-downstream linkages, innovations, future plans and their

implications.

Beyond the Nile Hachette+ORM

An A-Z reference providing concise and accessible information on Ancient Egypt from its predynastic cultures to the suicide of Cleopatra and Mark Anthony in the face of the Roman conquest. Annotation. Bunson (an author of reference works) has revised her 1991 reference (which is appropriate for high school and public libraries) to span Egypt's history from the predynastic period to the Roman conquest. The encyclopedia includes entries for people, sites, events, and concepts as well as featuring lengthy entries or inset boxes on major topics such as deities, animals, and the military. A plan and photograph are included for each of the major architectural sites.

[The Story of Egypt](#) Thames & Hudson

The last quarter century has seen extensive research on the ports of the Red Sea coast of Egypt, the road systems connecting them to the Nile, and the mines and quarries in the region. Missing has been a systematic study of the peoples of the Eastern Desert--the area between the Red Sea and the Nile Valley--in whose territories these ports, roads, mines, and quarries were located. The historical overview of the Eastern Desert in the shape of a roughly chronological narrative presented in this book fills that gap. The multidisciplinary perspective focuses on the long-term history of the region. The extensive range of topics addressed includes specific historical periods, natural resources, nomadic survival strategies, ancient textual data, and the interaction between Christian hermits and their neighbors. The breadth of perspective does not sacrifice depth, for all authors deal in some detail with the specifics of their subject matter. As a whole, this collection provides an outline of the history and sociology of the Eastern Desert unparalleled in any language for its comprehensiveness. As such, it will be the essential starting point for future research on the Eastern Desert. Includes a CD of eleven audio files with music of the Ababda Nomads, and six short videos of Ababda culture.
