It refers to Phase 1 only (Legal and Regulatory Framework). **394 Ready-To-Use Letters and Emails** Springer This book examines the ability of citizens across ten European countries to exercise their democratic rights to access their personal data. It presents a socio-legal research project, with the researchers acting as citizens, or data subjects, and using ethnographic data collection methods. The research presented here evidences a myriad of strategies and discourses employed by a range of public and private sector organizations as they obstruct and restrict citizens' attempts to exercise their informational rights. The book also provides an up-to-date legal analysis of legal frameworks across Europe concerning access rights and makes several policy recommendations in the area of informational rights. It provides

a unique and unparalleled study of the law in action which uncovered the obstacles that citizens encounter if they try to find out what personal data public and private sector organisations collect and store about them, how they process it, and with whom they share it. These are simple questions to ask, and the right to do so is enshrined in law, but getting answers to these questions was met by a raft of strategies which effectively denied citizens their rights. The book documents in rich ethnographic detail the manner in which these discourses of denial played out in the ten countries involved, and explores in depth the implications for policy and regulatory reform.

The demand of white, affluent society that all Americans should speak, read, and write "proper" English causes many people who are not white and/or middle class to attempt to "talk in a way that feel peculiar to [their] mind," as a character in Alice Walker's *The Color Purple* puts it. In this book, Sonja Lanehart explores how this valorization of "proper" English has affected the language, literacy, educational achievements, and self-image of five African American women—her grandmother, mother, aunt, sister, and herself. Through interviews and written statements by each woman, Lanehart draws out the life stories of these women and their attitudes toward and use of language. Making comparisons and contrasts among them, she shows how, even within a single family, differences in age, educational opportunities, and social circumstances can lead to widely different abilities and comfort in using language to navigate daily life. Her research also adds a new dimension to our understanding of African American English, which has been

little studied in relation to women.
