In Jungian Literary

Criticism: the essential guide, Susan Rowland demonstrates how ideas such as archetypes, the anima and animus, the unconscious and synchronicity can be applied to the analysis of literature. Jung's emphasis on creativity was central to his own work, and here Rowland illustrates how his concepts can be applied to novels, poetry, myth and epic, allowing a reader to see their personal, psychological and historical contribution. This multidisciplinary and transdisciplinary approach challenges the notion that Jungian ideas cannot be applied to literary studies, exploring Jungian themes in canonical texts by authors including Shakespeare, Jane Austen and W. B. Yeats as well as works by twenty-first century writers, such as in digital literary art.

Rowland argues that Jung's works encapsulate realities beyond narrow definitions of what a single academic discipline ought to do, and through using case studies alongside Jung's work she demonstrates how both disciplines find a home in one another. Interweaving Jungian analysis with literature, *Jungian Literary Criticism* explores concepts from the shadow to contemporary issues of ecocriticism and climate change in relation to literary works, and emphasises the importance of a reciprocal relationship. Each chapter concludes with key definitions, themes and further reading, and the book encourages the reader to examine how worldviews change when disciplines combine. The accessible approach of *Jungian Literary Criticism: the essential guide* will appeal to academics and students of literary studies, Jungian and post-Jungian studies, literary theory, environmental humanities and ecocriticism. It will also be of interest to Jungian analysts and therapists in training and in practice. *Cartomancy and Tarot in*

This second edition represents a wide-ranging critical introduction to the psychology of Carl Jung, one of the founders of psychoanalysis. Including two new essays and thorough revisions of most of the original chapters, it constitutes a radical assessment of his legacy. Andrew Samuels' introduction succinctly articulates the challenges facing the Jungian community. The fifteen essays set Jung in the context of his own time, outline the current practice and theory of Jungian psychology and show how Jungians continue to question and evolve his thinking and apply it to aspects of modern culture and psychoanalysis. The volume includes a full chronology of Jung's life and work, extensively revised and up to date bibliographies, a case study and a glossary. It is an indispensable reference tool for both students and specialists, written by an international team of Jungian analysts and scholars from various disciplines. Jungian Perspectives on Rebirth and Renewal
Routledge

Este libro estudia detalladamente las obras de dos poetas modernos prototípicos: T. S. Eliot y Salvador Espriu. Su imaginario es comparable, puesto que se proyectaba desde su experiencia y cosmovisión personal así como desde su profundo conocimiento de la tradición literaria. Ambos revelan los paralelismos

entre los contextos históricos y culturales en los que se crearon sus poemas y ejemplifican su propósito como poetas a la hora de preservar la tradición formada por sus predecesores y a la hora de suscribirse de un modo significativo a ella. El estudio de Dídac Llorens Cubedo lleva al lector a través de un viaje desde el árido desierto o la sórdida ciudad moderna hasta la paz imprecisa de un jardín ideal, desde las restricciones de lo secular hasta el todo sin trabas e intemporal imaginado por Eliot y Espriu, dos gigantes de la poesía. Since the publication of *Ghostwritten* (1999), David Mitchell has rapidly established himself as one of the most inventive and important British novelists of the 21st century. In this landmark study, Rose Harris-Birtill reveals the extent to which Mitchell has created an interconnected fictional world across the full run of his writing. Covering Mitchell's complete fictions, from bestselling novels such as *Cloud Atlas* (2004), *The Bone Clocks* (2014) and *number9dream* (2001), to his short stories and his

libretti for the operas *Sunken Garden* and *Wake*, this book examines how Buddhist influences inform the ethical worldview that permeates his writing. Using a comparative theoretical model drawn from the Tibetan mandala to map Mitchell's fictional world, Harris-Birtill positions Mitchell as central to a new generation of post-secular writers who re-examine the vital role of belief in galvanizing action amidst contemporary ecological, political and humanitarian crises. David Mitchell's *Post-Secular World* features two substantial new interviews with the author, a chronology of his fictions and a selected bibliography of important critical writings on his work.

Crossing Textual Boundaries in International Children's Literature

Taylor & Francis
Jungian Perspectives on Rebirth and Renewal brings together an international selection of contributors on the themes of rebirth and renewal. With their emphasis on evolutionary ancestral memories, creation myths and dreams, the chapters in this collection explore the

indigenous and primordial bases of these concepts. Presented in eight parts, the book elucidates the importance of indirect, associative, mythological thinking within Jungian psychology and the efficacy of working with images as symbols to access unconscious creative processes. Part I begins with a comparative study of the significance of the phoenix as symbol, including its image as Jung's family crest. Part II focuses on Native American indigenous beliefs about the transformative power of nature. Part III examines synchronistic symbols as liminal place/space, where the relationship between the psyche and place enables a co-evolution of the psyche of the land. Part IV presents Jung's travels in India and the spiritual influence of Indian indigenous beliefs had on his work. Part V expands on the rebirth of the feminine as a dynamic, independent force. Part VI analyses ancestral memories evoked by the phoenix image, exploring archetypal narratives of infancy. Part VII focuses on eco-psychological, synchronistic carriers of death, rebirth and renewal through mythic

characterisations. Finally, part VIII explores the mythopoetic, visionary dimensions of rebirth and renewal that give literary expression to indigenous people/primordial psyche re-navigated through popular literature. The chapters both mirror and synchronise a rebirth of Jungian and non-Jungian academic interest in indigenous peoples, creation myths, oral traditions and narrative dialogue as the 'primordial psyche' worldwide, and the book includes one chapter supplemented by an online video. This collection will be inspiring reading for academics and students of analytical psychology, Jungian and post-Jungian studies and mythology, as well as analytical psychologists, Jungian analysts and Jungian psychotherapists. Converging Poetic Imaginations Oxford

University Press
 In this book, Steve Gronert Ellerhoff explores short stories by Ray Bradbury and Kurt

Vonnegut, written between 1943 and 1968, with a post-Jungian approach. Drawing upon archetypal theories of myth from Joseph Campbell, James Hillman and their forbearer C. G. Jung, Ellerhoff demonstrates how short fiction follows archetypal patterns that can illuminate our understanding of the authors, their times, and their culture. In practice, a post-Jungian 'mythodology' is shown to yield great insights for the literary criticism of short fiction. Chapters in this volume carefully contextualise and historicize each story, including Bradbury and Vonnegut's earliest and most imaginatively fantastic works. The archetypal constellations shaping Vonnegut's early works are shown to be war and fragmentation, while those in Bradbury's are family and the wholeness of the sun. Analysis is complemented by the explored significance of illustrations that featured alongside the stories in their first publications. By uncovering the ways these popular writers redressed old myths in new tropes—and coined new narrative elements

for hopes and fears born of their era—the book reveals a fresh method which can be applied to all imaginative short stories, increasing understanding and critical engagement. Post-Jungian Psychology and the Short Stories of Ray Bradbury and Kurt Vonnegut is an important text for a number of fields, from Jungian and Post-Jungian theories and American studies to Bradbury and Vonnegut studies. Scholars and students of literature will come away with a renewed appreciation for an archetypal approach to criticism, while the book will also be of great interest to practising depth psychologists seeking to incorporate short stories into therapy.

Tabooed Jung: Marginality as Power Routledge

The American father is constantly depicted by contemporary Hollywood as being under pressure and forever struggling, but why? By utilising an analytical psychological approach, this fascinating book reveals the depths, complexities and nuances of the depictions of the American father and his struggles with contemporary contextual challenges and offers a fresh and intellectually exciting set of perspectives and interpretations of this key masculine figure and his effect on cinematic masculinities. Using a post-Jungian methodology and close textual analysis, the book seeks to explore the presence and impact of the American filmic father, and the effect his Shadow has on himself, his children and US society. It does this by examining the concept of 'father hunger', a term popularised by the mythopoetic men's movement that holds fathers to be an essential link to the masculine continuum and masculinity in general.

Analysing the role that Hollywood plays in depicting fathers and their relationships with their children and American society, *The American Father Onscreen* concludes that Hollywood presents the American paternal as crucial to the construction of US society and, consequently, American cultural myths, such as the American Dream. Providing an alternative perspective into the fascinating, complex, and under-researched figure of the American father, this book will be of great interest to academics and students of film, gender studies, American studies, and post-Jungian psychology.

Jung as a Writer traces a relationship between Jung and literature by analysing his texts using the methodology of literary theory. This investigation serves to illuminate the literary nature of Jung's writing in order to shed new light on his psychology and its relationship with literature as a cultural practice. Jung employed literary devices throughout his writing, including direct and indirect argument, anecdote, fantasy, myth, epic, textual analysis and

metaphor. Susan Rowland examines Jung's use of literary techniques in several of his works, including *Anima and Animus*, *On the Nature of the Psyche*, *Psychology and Alchemy* and *Synchronicity* and describes Jung's need for literature in order to capture in writing his ideas about the unconscious. Jung as a Writer succeeds in demonstrating Jung's contribution to literary and cultural theory in autobiography, gender studies, postmodernism, feminism, deconstruction and hermeneutics and concludes by giving a new culturally-orientated Jungian criticism. The application of literary theory to Jung's works provides a new perspective on Jungian Psychology that will be of interest to anyone involved in the study of Jung, Psychoanalysis, literary theory and cultural studies.

[Symbols and Images in Fairytale and Miniature Literature](#) Northwestern University Press

The Child That Haunts Us focuses on the symbolic use of the child archetype through the exploration of miniature characters from the realms of children's literature. Jung argued that the child archetype should never be mistaken

for the 'real' child. In this book Susan Hancock considers how the child is portrayed in literature and fairytale and explores the suggestion from Jung and Bachelard that the symbolic resonance of the miniature is inversely proportionate to its size. We encounter many instances where the miniature characters are a visibly vulnerable 'other', yet often these occur in association with images of the supernatural, as the desired or feared object of adult imagination. In *The Child That Haunts Us* it is emphasised that the treatment by any society, past or present, of its smallest and most vulnerable members is truly revealing of the values it really holds. This original and sensitive exploration will be of particular interest to undergraduate and postgraduate students as well as academics engaged in Jungian studies, children's literature, childhood studies and those with an interest in socio-cultural constructions of childhood.

Transcendent Writers in Stephen King's Fiction

combines a post-Jungian critical perspective of the puer aeternus. Offering new insight into King's work, it provides reconceptualisation of the eternal youth to develop a new theory: the concept of the transcendent writer. Combining recent Jungian and Post-Jungian developmental theories, this analysis of a selection of classic King novels addresses the importance of the stories within King's main narrative, those of King's writer-protagonists; an aspect often overlooked. Using these stories-within-stories, it demonstrates the way in which King's novels illustrate their young protagonist's trajectories into adulthood and delineates King's portrayal of the psychological development of adolescence and their ambivalent experience of the world. This book demonstrates how the act of writing plays a crucial role for King's writer-protagonists in their search for a stable identity, guiding us through their journey from disaffected youths to well-rounded adults.

Transcendent Writers in Stephen King's Fiction will be of interest to Jungian and post-Jungian scholars,

philosophers and teachers focusing on the theme of psychological development and identity, and to those studying literature with a particular interest in horror.

Does art connect the individual psyche to history and culture?

Psyche and the Arts challenges existing ideas about the relationship between Jung and art, and offers exciting new dimensions to key issues such as the role of image in popular culture, and the division of psyche and matter in art form.

Divided into three sections - Getting into Art, Challenging the Critical Space and Interpreting Art in the World - the text shows how Jungian ideas can work with the arts to illuminate both psychological theory and aesthetic response.

Psyche and the Arts offers new critical visions of literature, film, music, architecture and painting, as something alive in the experience of creators and audiences challenging previous Jungian criticism. This approach demonstrates Jung's own belief that art is a healing response to collective cultural norms. This diverse yet focused collection from

international contributors invites the reader to seek personal and cultural value in the arts, and will be essential reading for Jungian analysts, trainees and those more generally interested in the arts.

From Mrs Peel to the first female Doctor Who, this book offers a timely focus on the popular phenomenon of the cult TV heroine. The enduring phenomenon of cult TV itself is carefully explored through questions of genre, the role of the audience and the external environment of technological advances and business drivers.

Catriona Miller then suggests a fresh account of the psychological dimension of the phenomenon utilising Carl Jung's concepts of the transcendent function and active imagination. Her analysis of the heroines themselves considers the workings of the audio-visual text alongside narrative and character arcs, exploring the complex and contradictory ways in which the heroines are represented. Established cult TV favourites such as Buffy the Vampire Slayer, The X Files, and Xena: Warrior Princess are

examined alongside more recent shows such as Chilling Adventures of Sabrina, Jessica Jones and American Horror Story: Coven.

Who Owns Jung? Post-Jungian Criticism Theory and Practice

Rhetorical analysis of texts exposes plausible 'truths' and presumptions implied by the writer's presentation. In this volume, Leslie Gardner analyses the master psychologist Jung, who claimed to be expert at uncovering personal, psychological truths. In his theoretical writings, his rhetoric reveals philosophical ramifications which bear strong similarities to those of the rhetorician of the 18th century, Italian philosopher Giambattista Vico. This book is driven by an interest in arguing that it is possible to read Jung's works easily enough when you have a set of precepts to go by. The paradox of scientific discovery being set out in Jung's grotesque and arcane imagery begins to seem a startling and legitimate psychology for the 21st century. It is time Jungian studies took on this most appropriate examination of analytical psychology. Bringing Vico to bear directly on Jung's

thought has only been cursorily attempted before although much alluded to. We find indeed that some of Jung's ideas derive directly from rhetorical theory, and this volume proposes to highlight Jung's innovations, and bring him into forefront of contemporary psychological thought. Rhetorical Investigations will be of interest to analysts and academics, and also to those studying philosophy and psychology.

Despite the increasing variety of heroic women portrayed in film,

It features award-winning authors from a variety of disciplines, broadening our understanding of how heroines are portrayed, as well as how these important popular culture representations both simultaneously empower and/or constrain real life women.

Myth pervades heavy metal. With visual elements drawn from medieval and horror cinema, the genre's themes of chaos, dissidence and alienation transmit an image of Promethean rebellion against the conventional. In dialogue with the modern world, heavy metal draws imaginatively on myth and folklore to construct an aesthetic and worldview embraced by a vast global audience. The author explores the music of Black Sabbath, Iron Maiden, Judas Priest, Metallica and many others from a mythological and literary perspective.
